THE

British Negociator:

OR,

FOREIGN EXCHANGES

Made perfectly Easy.

CONTAINING

TABLES for all the various COURSES of EXCHANGE from, and the several COINS equated of,

HOLLAND,	LEGHORN,
HAMBURGH,	GENOA,
GERMANY,	DENMARK,
FRANCE,	POLAND,
SPAIN,	SWEDEN,
PORTUGAL,	RUSSIA, &
VENICE,	IRELAND.

TOGETHER WITH

TABLES and RULES for EXCHANGES, from *Asia*, *Africa*, and *America*, or the *West-Indies*: And the Exchanges of the Principal *Foreign* Nations with one another.

ALSO,

ARBITRATIONS of EXCHANGES, in a new and concise Method applicable to Business.

LIKEWISE,

The WEIGHTS and MEASURES of FOREIGN NATIONS.

To which is annexed,

Several MERCANTILE TABLES, equally useful to Foreign Traders and Factors, and to Inland Merchants and Dealers; among which is inserted an entire new Table for the FLAX TRADE.

AND

An ESSAY on the NATURE and BUSINESS of EXCHANGING in general is prefixed, by Way of Introduction.

The Third EDITION, Corrected and Enlarged.

By S. THOMAS, Merchant.

LONDON:

Printed for G. ROBINSON and J. ROBERTS in Pater-noster Row; and T. SLACK in Newcastle.

MDCCLXIX.

NEW BOOKS, printed for G. ROBINSON and J. ROBERTS, London; and T. SLACK, Newcastle.

(To which is prefixed, a new and concise Treatise on Decimals, being the most comprehensive, and cheapest Book of the Kind extant.)

The SECOND EDITION, carefully corrected, of

THE BANKER's SURE GUIDE:
Or MONIED MAN's ASSISTANT.

In Three Parts, viz.

1. Tables of Interest for any Sum, at the current Prices of 2, $2\frac{1}{2}$, 3, $3\frac{1}{2}$, 4, $4\frac{1}{2}$, and 5 per Cent. from 1 to 90 and 300 Days, and from one Month to a Year.

2. Sundry Tables shewing the Value of Annuities certain, and Annuities on Lives, Reversions, Advowsons, Presentations, &c. in the most approved Methods now in Use, viz. M. de Moivre's, Dr Halley's, and Mr Simpson's, with Examples under each, and the Answers set in Contrast; together with many additional Observations.

3. A large and accurate Table of Commission and Brokerage, from $\frac{1}{8}$ to $2\frac{7}{8}$ per Cent. rising only $\frac{1}{8}$ per Cent. at a Time.

ALSO,

A NEW EDITION, (Enlarged and improved, with new Mottos in Verse prefixed to the Essays) of

THE

PLEASING INSTRUCTOR:

OR,

ENTERTAINING MORALIST.

Containing, Select Essays, Visions, and Allegories. Designed for the Use of Schools as well as the Closet; with a View to form the rising Minds of the Youth of both Sexes to Virtue, and destroy in the Bud those Vices and Frailties which Mankind, and Youth in particular, are addicted to.

To which are prefixed, Thoughts on EDUCATION, and the Manner of conveying Instruction properly,

——" *To* rear *the tender Thought*,
" *To* teach *the young Idea how to shoot*,
" *To* pour *the fresh Instructions o'er the Mind*,
" *To* breathe *the enliv'ning Spirit, and to fix*
" *The* gen'rous *Purpose in the glowing Breast.*"

*** Herein is exhibited a connected Plan of Morality, free from Jumble or Incoherence: the *Utile Dulci* having been consulted throughout the whole, Morality here appears gay and smiling, steals insensibly into our good Graces, and makes the most lasting Impressions, being divested of that unpleasing Formality with which she is too often disguised by partial or mistaken Pedants.

☞ The Thoughts on Education, by A. FISHER, Author of the New English Grammar, with Exercises of bad English.

15 87 AUG

THE PREFACE.

THIS Performance having employed my leiſure Hours for ſeveral Years, at laſt I prevailed upon myſelf to offer it to the Public without any Solicitations; and if I have rendered the Buſineſs of Exchanging eaſy and intelligible to young Merchant-Adventurers, Factors, and Agents, thereby, I ſhall not repent of the Pains I have taken.—How far I have ſucceeded, muſt be left to the Deciſion of the Public: But whatever Judgment may be paſſed upon the Work, my Motives for undertaking it muſt appear diſintereſted and commendable; for as foreign Exchanges are confined to one particular Set of Men, I could not flatter myſelf with any pecuniary Advantage ariſing from the Sale of large Impreſſions; and conſequently could only expect the Pleaſure, which every ingenious Perſon muſt feel from his Labours proving uſeful to that Society of which he is himſelf a Member.

In order to effect ſo valuable a Purpoſe, and render the Book as uſeful as poſſible, I have ſolved all the Queſtions by common Arithmetic, and wherever a Fraction happened to occur in any of the Numbers, that Number, and alſo the other to which it ſtands proportioned, are always equated in whole Numbers, by an eaſy Method. See Pages 66, 129, &c. *So that any Perſon who underſtands the Rule of Three, may perform any of the Queſtions as exactly, (though not always ſo readily) as thoſe who are Maſters of Fractions, or Algebra; equating the Coins only excepted.*

The Tables in general, I am confident, will be found exact, they having not only been twice carefully read with the Copy, but alſo examined by a different Hand.—In the DUTCH *Exchanges, where the Guilders would not carry half a Farthing more, it is generally thrown away, and when they did or exceeded it, another Farthing is added.—In the French Exchanges, the half Farthings are inſerted where they exceeded a Fourth, and thrown away when they come ſhort of it.—In the Portugal Exchanges, the Quarter Farthings are inſerted.—And in the Exchanges from Spain, Italy, Germany, Denmark, Sweden and Ruſſia, the Calculations are carried to the hundredth Parts of a Farthing.*

In

PREFACE.

In all the Trials I have made I never found the Answer from the Table, differ from that by Calculation, above a Farthing or two, and that in the Dutch Exchanges.—And if in any other of the Exchanges the Answers should differ so much, 'tis a certain Proof that either the Table, or your Operation must be wrong.—In order therefore to discover the Error, you should solve the Question by the Table, in a different Manner (i. e. *by taking different Numbers, to make up what you want*) *and if the Results of both are the same, you may be assured the Answer given by the Table is the right one; and consequently your Operation erroneous: But the contrary, if the two Answers from the Table differ.—The Tables will, I presume, serve for all the various Courses of Exchange, as they may happen to rise above, or fall under the Pars.*

Since to reduce English Money into the Species of foreign Nations, is nothing more than reversing the Tables: See Pages 63, 126, 132. *It was judged, from the Approbation of several Merchants, needless to repeat* (*for it would have been little more*) *Tables of Exchanges from England to foreign Nations, as those from foreign Nations to England will answer the same End by using them reversly, & making a very trifling Allowance.*

In the Values of the principal Coins, I have been guided by the best Authorities, and have equated from thence the Subdivisions with the greatest Exactness.—The real and imaginary Coins are in general properly distinguished.—The Pars are most of them taken from Sir ISAAC NEWTON's *Table of the Equation of foreign Coins* (*which is inserted at Length*); *or from approved Authors, who have written on this Subject since that great Philosopher: And tho' in some Places they may differ from those received among Merchants, that will not at all affect either the Method of Exchanging or the Course; such Difference arising from the Inequality or Disproportion between some of the principal Coins, and their Aggregates, in the intrinsic Values thereof.*

As I have had, or been favoured with original Accounts, from many of the principal Places of Exchange, and, in the rest, have but seldom depended on a single Authority however celebrated, the Methods of Exchanging, both with respect to England, and foreign Nations with one another, will, 'tis presumed, be found exactly right.

And

And as England has all or moſt of its Exchange. from Germany, Denmark, Sweden, Ruſſia, &c. coming brough Holland, or Hamburgh, ſeveral Specimens of riginal Accounts, kept in Holland, are inſerted to illuſtrate thoſe Exchanges.

Arbitrations of Exchanges, which have been generally treated of rather as an Amuſement for Schools than of real Uſe to Trade, are rendered eaſy and applicable to Buſineſs, to all who underſtand common Arithmetic only, being illuſtrated by a Number of new and pertinent Queſtions.

In this Edition the Exchanges to Holland are much enlarged, as well in the Table of the Current Prices, *as in that for the* Agio, *the former being carried ſo far as* 8 *s.* 1½ *d. and the latter begins with* 1 *l. and goes to* 10 *l. per Cent. both which will be found more full and complete than any extant.—I have alſo added a complete new Table for the Flax Trade, which ſhews the prime Coſt per Cwt. in England, including Charges, according to the Rate per Head in Stivers in Holland, at all the current Exchanges.—This will be a Guide to Importers, and, as it will anſwer to a very Triſle in all Caſes, will be of great Uſe and Advantage.—It is conſtructed on eighteen Times the Price of the Head in Holland, and* 3 *s. are added for Freight, &c. on the Cwt. which Allowance brings it as near the Truth as may be.**

The Exchanges to Dantzick, the reſt of Poland, and France, are all improved, and the Book in general has been carefully reviſed and corrected by the Editor and his Friends. And,

As the Subject of this Book will be found more general and univerſal than in any Thing extant upon Exchanges, eſpecially with reſpect to England, *I flatter myſelf I am on that Account intitled to a greater Share of Indulgence from the Public, for any Miſtakes that may have eſcaped my Notice, eſpecially when it is conſidered, that the Public Benefit was my principal Motive for ſtepping out of the common Road.*

* *It may be worth obſerving, that every Stiver difference or leſs in the Price per Head, makes near about Twenty Pence leſs on the Hundred Weight in England.—— And every Penny more in the Price of Exchange, about Two-pence leſs on the Hundred at the ſame Rate per Head.—And as the Courſe of Exchange is generally known to* 2*d. or* 3*d. the Table will always ſhew the real Price per Hundred within* 6*d. or* 8*d. on the Receipt of the Invoice.*

INTRODUCTION.

IN the Buſineſs of Exchanging between one Kingdom or Nation and another, the one gives the *certain* Price, and the other the *uncertain* Price of Exchange to each other: For Inſtance, *England* gives the *certain* Price, *viz.* One Pound *Sterling* to *Holland*, *Hamburgh*, and the *Netherlands*; and the *uncertain* Price, *viz.* an *uncertain* Number of Pence and Parts to almoſt all other Nations.

The Par of Exchange, or *Par pro Pari*, is what foreign Nations ſhould allow in Exchange according to the intrinſic Value of the ſeveral Species to be exchanged, and exchanging at the Par with *foreign* Nations, is no more than exchanging one Sum or Debt at Home for another; any Quantity of Money, of one Nation or Party, being exactly equal in Value to the like Quantity of the other, if Regard be had to the Weight and Fineneſs of the Metal in both.

The Courſe of Exchange is the Price governed by the Courſe of Trade, and is always upon the Fluctuation; being ſometimes above, and ſometimes under the Par.—The current Price, or exact Courſe of Exchange, can only be known by Advices from Merchants, *&c.* reſiding at the ſeveral Places: But the Exchanges of *London*, *Holland*, *Hamburgh* and *Venice*, govern, in a great Meaſure, thoſe of all other Places in *Europe*.

At thoſe Places where the Courſe of Exchange is above the Par, 'tis a certain Indication the Balance of Trade runs againſt them; and on the contrary, where it is [illegible] Par, 'tis a ſure

Sign

Sign the Balance of Trade is in their Favour. — For Inſtance, let it be ſuppoſed that in the Courſe of Trade between *London* and *Newcaſtle*, in any given Time, the latter takes Goods from the former to the Value of 100,000 *l.* and that in the ſaid Time it (*Newcaſtle*) ſends up Goods to the Value of 90,000 *l.* Now 'tis manifeſt, that *Newcaſtle* can only diſcharge to the Value of the Goods ſent to *London*, viz. 90,000 *l.* by Bills of Exchange, and that it will ſtill owe a Balance of 10,000 *l.* which Sum it will be obliged to apply for elſewhere, in Bills, at as low a Premium as can be met with, (for it cannot be ſuppoſed that the ſame Place can furniſh Bills, being in Debt, on as good Terms as others from which no Balance is due) probably at $\frac{3}{4}$, or 1 *l. per* Cent. So 'tis plain *Newcaſtle* would be forced to pay 10,075 *l.* or 10,100 *l.* to diſcharge the Debt of 10,000 *l.* or ſend up the Balance in Specie, which would be near as much, beſides the Riſk; this makes the Courſe of Exchange from *Newcaſtle* conſiderably above the Par in Favour of *London*, which in order to avail itſelf of, muſt have an Agent at *Newcaſtle* to prevent any other Place, as before hinted, from taking the Advantage of the Exchange; an Agent at the Place from which the Balance is due is ſtill more neceſſary in foreign Exchanges.—On the contrary, if any Place ſhould apply to *London* for Bills on *Newcaſtle*, as it has a Balance due from thence, it would be ready to draw at or under the Par, to have its Balance in Hand as ſoon as poſſible.—And tho' the aforeſaid Reaſons for the Fluctuations of the Courſe of Exchange above or below the Par, be only illuſtrated by the Courſe of Trade between two of the moſt noted Places at Home; the ſame Reaſons will hold good between *England* and any foreign Nation, or between one foreign Kingdom and

another: Experience proves the ſame to be Matter of Fact, and that the Balance of Trade will always govern the Courſe of Exchange.—The Sums ſent abroad for the Payment of Armies, Alliances, *&c.* are found to have alſo the ſame Effect upon the Courſe of Exchange as the Balance of Trade. Yet the Abundance of Specie in a Nation will have ſome Influence on the Courſe from the Place in its Favour, as it can at worſt remit the Balance in Caſh.—The Scarcity of Caſh will have the contrary Effect.

The well known Truth, that the more one gets for any Commodity, or the leſs one gives, 'tis ſo much the better Bargain.—This holds good in the Price of Exchange, not only with reſpect to *England*, but with all other Nations: Therefore when *England* remits to *France*, *Spain*, *Portugal*, or any other Nation, to which it gives the *uncertain* Price, the lower the Price of Exchange is, 'tis ſo much the better; for it is evident that 100 *l.* remitted to *France* at 32 *d. per* Crown; to *Spain* at 42 *d. per* Piaſtre; or to *Portugal* at 63 *d. per* Mill-ree, will be worth more Crowns, Piaſtres, or Mill-rees, at thoſe Places reſpectively, than if at the Time of the ſaid Remittance, the Prices of Exchange had been at 33 *d.* 43 *d.* and 66 *d.* reſpectively.——The contrary muſt be obſerved in Drawing.

In Remitting to *Holland*, *Hamburgh*, *Ireland*, the *Weſt-Indies*, and all Places to which *England* gives the *certain* Price, the higher the Price of Exchange runs, 'tis ſo much the better, ſince 'tis plain it would be more advantageous to receive at the Rate of 36 *s.* Flemiſh for a Pound Sterling; than 35 *s.* or 110 *l.* Iriſh Money for 100 *l.* Sterl. than only 108, *&c.*——The contrary muſt be obſerved in Drawing.

INTRODUCTION.

It is always to be considered that the Price or Courſe of Exchange rules the Value of the Whole, be the Negociation ever ſo large, and that tho' at that Place which gives the *certain* Price, the Fluctuation ſeems to fall altogether upon the other, yet in fact it equally falls upon both; for we may with equal Juſtice ſay, 100*l. Engliſh*, is equal only to 105 *l. Iriſh*, when the Exchange is at 5 *l. per* Cent. advance (tho' the Par be 108, 6, 8) as that 100 *l. Engliſh*, is equal in Value to 110 *l. Iriſh*, when the Exchange runs at 110 *l. per* Cent.—And ſo of any other Exchanges, the *certain* Price always falls or riſes in its Value, as the Courſe is below, or above the Par; and the *uncertain* Price fluctuates in Value in the contrary Manner.

Brokers and Factors have a ſmall Allowance of ſo much *per* C. for negociating Buſineſs for others which is uſually divided into two Sorts, *viz.* Commiſſion, and Brokerage.—What they pay for, or lay out, they are allowed Commiſſion upon at $\frac{1}{2}$ *per* Cent. or thereabouts, as agreed.—And for what they draw for, if Factors abroad, they have alſo about 1 *per* Mill. or 1 *per* 1000, for negociating their own Draughts, which is called Brokerage.

Payments abroad are generally made by Bills of Exchange, which may be effected either by remitting, or allowing the foreign Merchants to draw to the Value.

Merchants commonly draw two Bills, if Foreign, and ſometimes three, for the ſame Sum, leſt the firſt or ſecond ſhould be loſt.

The Word Uſance, in foreign Bills, implies a Calendar Month, double Uſance, two, *&c.*—But Uſance from *London* to any Part in *France* is thirty Days, (this being declared to be a Month in Regard to Exchanges in that Kingdom) whether the

Month has more or fewer Days in it.—Uſance from *London* to *Hamburgh*, *Amſterdam*, *Rotterdam*, *Midleburgh*, *Antwerp*, *Brabant*, *Zealand*, *Flanders*; and from theſe Places to *London*, is one Calendar Month after the Date of the Bill.

Uſance from *London* to *Spain*, *Portugal*, and from theſe Places to *London*, is two Calendar Months after Date.

Uſance from *London*, to *Genoa*, *Leghorn*, *Milan*, *Venice*, *Rome*, and from theſe Places to *London*, is three Months.

The Uſance of *Amſterdam*, upon *Italy*, *Spain*, and *Portugal*, is two Months.

Upon *France*, *Flanders*, *Brabant*, *Geneva*, and upon any Place in the ſeven *United Provinces*, is one Month.

Upon *Frankfort*, *Nuremburgh*, *Vienna*, *Augsburgh*, *Cologn*, *Leipſic*, and other Places of *Germany*, upon *Hamburgh* and *Breſlau*, is fourteen Days after Sight, two Uſances, twenty-eight, and half Uſance, ſeven.

Uſance upon *Dantzick*, *Koningſberg*, and *Riga*, upon *Amſterdam*, is at one Month's Sight.

And from *Amſterdam* on the ſaid Places, at a Month's Date, without mentioning Uſance.

Days of Grace are a certain Number of Days allowed for the Payment of Bills (or promiſſory Notes) after the ſame becomes due, according to the Cuſtom of the Place.

At *London*, *Bergamo*, and *Vienna*, three Days are allowed; at *Frankfort*, (out of the Fair-Time) four; at *Leipſic*, *Naumburgh*, and *Augſburgh*, five; at *Venice*, *Amſterdam*, *Rotterdam*, *Middleburgh*, *Antwerp*, *Cologn*, *Breſlau*, and *Nuremburgh*, ſix; at *Naples*, *Denmark*, and *Norway*, eight;

eight; at *Dantzic*, *Koningsberg*, and in *France*, ten; at *Hamburgh* and *Stockholm*, twelve; in *Spain*, fourteen; at *Rome*, fifteen; at *Genoa*, thirty. At *Leghorn*, *Milan*, and ſome other Places in *Italy*, there is no fixed Number of Reſpite Days. *Sundays* and other Feſtivals are included in theſe Days at *London*, *Naples*, *Amſterdam*, *Rotterdam*, *Antwerp*, *Middleburgh*, *Dantzic*, *Koningsberg*, and in *France*; but not at *Venice*, *Cologn*, *Breſlau*, and *Nuremburgh*; at *Hamburgh*, and in *France*, the Day on which the Bill falls due makes one of the Days of Grace, but no where elſe.

To Bills from the following Places, which ſtill obſerve the *Old Stile*, 11 Days muſt be added to know when they become due (all other Places obſerving the *New Stile*) viz. *Moſcovy*, the Electorate of *Brandenburgh*, *Denmark*, *Eaſt Friezland*, *Frankfort* on the *Main*, *Genoa*, and the Proteſtant Cantons of *Switzerland*, *Hamburgh*, and all *Holſtein*; *Lubeck*, and all *Mecklenburgh*; *Leipſic*, *Magdeburgh*, *Naumburgh*, and all *Saxony*; *Riga*, *Stockholm*, and all *Sweden*; *Strasburgh*; the *Proteſtant* Electorates and Principalities of *Germany*.—And to Bills on the above Places 11 Days muſt be deducted.

TABLE

TABLE I.

Of DUTCH EXCHANGES.

THE Merchants in Holland, Flanders, and the Low Countries, make out their Bills of Charges for Goods and Merchandizes ſent over to England by, or after the Rate of, the Flemiſh Pound, or its Sub-diviſions: And the Totals of their ſeveral Accounts are generally ſent over in Guilders, Stivers, and Penningens. In the Courſe of Exchange, England gives 1*l. Sterl.* for an uncertain Number of Schillings and Pence Flemiſh. The Par is $37\frac{1}{27}$ *s. per* Pound Sterling, or rather 36,59 *s.* Flemiſh or Dutch Money. See Page 120.

Books and Accounts are kept in moſt Places in Guilders, Stivers, and Penningens, and in others in Pounds, Schillings, and Pence Flemiſh.

The Current Coins are, viz.		*l.*	*s.*	*d.*	*q.*
A Duyte, or Denier, Cop.		0	0	0	$1\frac{2}{25}$
2 Duytes	= a Groot, Penny, or Denier d'Groſs	0	0	0	$2\frac{4}{25}$
2 Groots	= a Stiver, Sil. mixed	0	0	1	$0\frac{8}{25}$
6 Stivers	= a Schilling, Silv.	0	0	6	$1\frac{24}{25}$
20 Stivers	= a Guilder or Florin	0	1	9	$2\frac{2}{5}$
$1\frac{1}{2}$ Guilder	= a Dollar, Silv.	0	2	8	$1\frac{3}{5}$
2 Guilders	= a Crown, Silv.	0	3	7	$0\frac{4}{5}$
$2\frac{1}{2}$ Guild.	= a Rix-dollar, Silv.	0	4	6	0
3 Guilders	= a DrieGuilder, Sil.	0	5	4	$3\frac{1}{5}$
$3\frac{3}{20}$ Guild.	= a Ducatoon, Silv.	0	5	8	$0\frac{4}{25}$
11 Guilders	= a Roſe-noble, Gold	0	10	9	$2\frac{2}{5}$
15 Guilders	= a Sovereign, Gold	1	7	0	0
20 Guilders	= a Ducat, Gold	1	16	0	0

Note, That Money of Exchange, as well as Money of Account, for the Convenience of Trade and Buſineſs, is generally imaginary; as in England the Pounds and the Pence are; ſo in Holland is the Flemiſh Pound. The Sub-diviſions of the Flemiſh Pound are,

2 Pence,

2 Pence, or Groots, make a Stiver.
12 Pence, or 6 Stivers, a Schilling.
20 Stivers a Guilder.
20 Schillings a Pound, } = 10*s.* 9*d.* $2\frac{2}{5}q.$
16 Guilders a Pound, }
A Stiver is alſo divided into 16 Penningens.

EXPLANATION.

This Table is calculated to ſhew the Value of any Number of Guilders, &c. in Pounds Sterling, by Inſpection only, at any Rate of Exchange from 33*s.* to 38*s.* $1\frac{1}{2}d.$ Flemiſh, for One Pound Sterling.——The firſt Column in each Page ſhews the Number of Guilders and Stivers to be exchanged; and in the other Columns oppoſite thereto, are the Pounds, Shillings, Pence, and Farthings Sterling, the Value thereof. At the Top of which Columns is ſet the Rate of Exchange in Dutch Money.

EXAMPLE I.

What will 2470 Guilders, being a Bill of Exchange from Amſterdam, Exch. at 36*s.* 8*d.* Flemiſh for 1 *l.* Sterl. amount to in Engliſh Money?

Look at the Top of the Table for Exchange at 36*s.* 8*d.* and over againſt

		£.	s.	d.	q.
2000 Guilders ſtand	—	181	16	4	1
400	——	36	7	3	1
70	——	6	7	3	1
Anſwer		£. 224	10	10	3

OPERATION *by the Rule of Three.*

RULE.—As the Flemiſh Pence (or Half-pence) in the Exchange, are to 1 *l.* Sterl. ſo are the Pence (or Half-pence) in the Guilders given to be exchanged, to the Anſwer in Pounds Sterl.—If the Exchange be rated in Guilders and Stivers, as it ſometimes is, 'tis the beſt Method to reduce it into Pence, or Half-pence, before the Operation.

s. *d.* Fl. *l.* St. *Guilders.*

If 36 8 : 1 : : 2470
12 40

l. *s.* *d.*
440 Diviſor) 98800(224 10 $10\frac{3}{4}$
(Anſwer.)

Rem. 240 = 10*s.* $10\frac{3}{4}d.$

The

The Remainder (in this Caſe, 240 Parts of 440 of a Pound) muſt be multiplied by 20, 12 and 4; and the Product each Time divided by the old Diviſor, will give the Shillings, Pence, and Farthings.

EXAMPLE II.

What will 2474 Guilders, being a Bill from Amſterdam, Exchange at 33 *s.* $4\frac{1}{2}$ *d. Flem.* for 1 *l. Sterl.* amount to in *Engliſh* Money?

—By the Table as before, againſt

2474		Anſw. *£.* 247	1	9	3

OPERATION by the *Rule of Three.*

This may be wrought as the former Queſtion (only it ſhould be reduced into Half-pence or Quarter Stivers) or by Decimals, as under.—— Obſerve to add ,5 in the firſt Place of Decimals in the Diviſor, for the $\frac{1}{2}$ *d.* (if $\frac{1}{4}$ or $\frac{3}{4}$ occur, add ,25 for the former, and ,75 for the latter); then put as many Cyphers to the Dividend, as will occaſion at leaſt three Decimal Places in the Quotient.

	s.	*d.*			*Guilders.*
If	33	$4\frac{1}{2}$	: *£.* 1	: :	2474
	12				40
	400,5 Diviſor				)98960,000(247,091 *£. D. Parts*

The Product is 247 *l.* 1 *s.* $9\frac{3}{4}$ *d.* the Anſwer.

The Value of the Decimal Parts in the Quotient is found by multiplying them by 20 for Shillings, 12 for Pence, and 4 for Farthings, marking off as many Decimal Places in each Product as you have in the firſt, thus—,091 multiplied by 20 produces 1,820,——,820 by 12, 9,840, and ,840 by 4, 3,360 = 1 *s.* 9 *d.* 3 *q.*

Note, That every 4 *d.* or every 2 Stivers, in the Rate of Exchange, (above the imaginary Par, 33 *s.* 4 *d.*) is 1 *per C.* better Exchange, within a Trifle; if under, 1 *per Cent*, worſe, as to Great-Britain.

Note, As *Bank* Money and *Current* Money are reckoned or computed after one and the ſame Manner, this Table will anſwer for either, they being properly one Sort of Money of different Values. It will alſo ſerve for Hamburgh Exchanges, by obſerving an eaſy Rule, which ſee under Hamburgh.—Note alſo, that a Groot or Penny Flemiſh is in ſeveral Places called a Denier de Groſs, and two Penningens reckoned to and called a Duyte.—The Price of Exchange between Holland and Germany is often rated in Deniers de Groſs.

To reduce Serling *Money* into *Flemiſh* Money.

ENgliſh Money may be equated in *Flemiſh* Guilders, Stivers, and Penningens, by any of the three following Methods, viz.

RULE I. The preceding Table which equates Guilders into Sterling Money, will alſo equate Sterling Money in Guilders, by reverſing it thus; make up the Sum propoſed to be exchanged from ſeveral Sums under the Rate of Exchange given, and mark down the Guilders which ſtand oppoſite to each on the Left Hand; the Total will be the Guilders in the propoſed Sum.

EXAMPLE.

Suppoſe a Merchant in England draws on his Correſpondent at Amſterdam for, or remits to him, 265 *l.* 17 *s.* 6 *d.*— Exchange at 35 *s.* 8 *d.* *Flemiſh*, for 1 *l.* *Sterling*,—how many Guilders will the ſame amount to?

OPERATION by the TABLE.

	l.	*s.*	*d.*	*q.*		Guilders		
Oppoſite to	186	18	3	3	ſtand	2000		
	46	14	7	0	——	500		
	28	0	9	0	——	300		
	3	14	9	0	——	40		
		7	5	3	——	4		
			11	1	——		10	Stiv.
			5	2	——		5	
			2	1	——		2	
				1	——			4 Pen.
	265	17	6	0		2844	17	4 Anſ.

As the Table is not carried to Tenths of a Farthing, ſomething muſt be abated of the Sum propoſed; in this Caſe only one Farthing is taken ſhort.—But in a general Way, a Farthing muſt be abated for every three Sums taken from the Table.

RULE II. As 1 *l.* Sterling is to the Rate or Price of Exchange: ſo is the Sum given to be exchanged, to the Anſwer; which will always be of the like Denomination with the Rate of Exchange, as reduced before the Operation.

The former Queſtion reſumed.

OPERATION.

	l.		*s.*	*d.*	*Flem.*		*l.*		*s.*	*d.*

							63810			
							428	}	Rate of Exchange.	
								}	*Pence Fl.*	

240)27310680(113794 the Anſ.

Which divided by 40 (the Number of Pence in a Guilder) produces 2844 Guilders 17 Stiv. 4 Pen.

The Remainder of the firſt Diviſion (in this Caſe 120, equal to 4 Penningens) muſt be multiplied by 8 (as the Exchange was reduced to Pence, and 8 Penningens make one Penny or Groot) and divided by the old Diviſor for the Penningens; and the Remainder of the ſecond Diviſion (in this Caſe 34, equal to 17 Stivers) being ſo many fortieth Parts of a Guilder, muſt be multiplied by 20, and divided by 40 for the Stivers.

The ſame Queſtion is wrought fraction-wiſe, as under, the Exchange being firſt reduced to Guilders, and the Shillings and Pence in the Sum to be exchanged, into the Fraction of a Pound.

	l.		*Guild.*		*l.*
If	1	:	$10\frac{7}{10}$	: :	$26\frac{7}{8}$

$\frac{107}{10} \times \frac{2127}{8} = \frac{227589}{80}$, or $2844\frac{69}{80}$ Guild.

Equal to 2844 Guil. 17 Stiv. 4 Pennin.

The

The Value of $\frac{69}{80}$ is found by multiplying the Numerator by 20 and 16, and dividing each Time by the Denominator.

RULE III. Multiply the Pounds Sterling by the Difference of Exchange, and divide by 20, if you multiply by Stivers; but if by Pence, or Half-stivers, divide by 40, and if by Half-pence, divide by 80: For the odd Shillings, Pence, and Farthings, work the Exchange by the Aliquot Parts of a Pound Sterling, and add them to your Multiplication: When you have found the Guilders, add a Cypher to the Pounds Sterling, and then add them up: The Total is Guilders, Stivers, and Penningens.

The former Queſtion again reſumed.

TABLE II.

Of the AGIO *in* DUTCH EXCHANGE.

THE Word *Agio* is originally Italian, and is particularly made Uſe of at Amſterdam and Venice, where it is underſtood to denote the Difference between the Value of *Bank* Stock, Bills or Money in Bank, and their *current* Coin.—*Bank* or *Banco* Money (in ſome Places called *Permiſſion* Money) is conſiderably better than *Caſh* or *Current* Coin; the Difference or *Agio* being generally from 3 to 5 *l.* per Cent.—This Table, by giving the *Agio* or Difference, reduces *Bank* Money to its Equivalent in *Current* Money, by Addition only.

EXPLANATION.

The firſt Column in the Table ſhews the Number of Guilders on which the Agio is to be equated; and the other two Columns give the Amount thereof in Guilders, Stivers, and Penningens, according to the Rate per Cent. which is ſet at the Top of each Column.

EXAMPLE.

What will 4420 Guilders in Bank Money amount to in Holland Currency, the Agio being $3\frac{1}{8}$ *l.* per Cent.

OPERATION by the TABLE.

4420 ——	138	2 8
The Agio	138 2 8	
Money Cur.	4558 2 8	

OPERATION by the *Rule of Three.*

RULE. As 100 Guilders are to 100 and the Agio; ſo are the Guilders given to be equated, to the Anſwer.—Obſerve always to multiply the ſecond Term by the Denominator of the Fraction, and take in the Numerator; alſo to multiply the firſt Term by the Denominator of the ſaid Fraction before the Operation.—This equates the Agio in whole Numbers.

Note,

Note, *Here it may be neceſſary to obſerve, that in all direct Proportions, the* 1*ſt and* 2*d Numbers, or Terms, may be increaſed or diminiſhed equally at Pleaſure, without altering the Value of the Proportion.—Alſo, if the* 1*ſt and* 3*d Numbers be increaſed or abridged equally, the Proportion will be the ſame as before.*

The former Queſtion reſumed.

16500 Stiv.		1458600 Penningens.		
16		800		
264|000)		1166880|000 (4420 the Answer.		

In either Case where Stivers and Penningens are to be equated with the Guilders, observe to multiply the first and second Terms by the Denominator of the Fraction of the Agio, as before. Then reduce the first and third Terms into Penningens, and proceed by the Rule of Three as before, and the Quotient will be the Guilders, &c. required.

☞ All Bills from Holland, or Hamburgh, on England, or the contrary, are always drawn for Bank Money; for tho' in some Places they make out their Notes in Current Money, at these Places they either allow a higher Price of Exchange, or the Agio, which brings their Charges to an Equivalent in Bank Money.—When England deals with Riga, Peterſburgh, or any other Places down the Baltic, or in Germany, (Hamburgh excepted) the Merchants generally have their Buſineſs tranſacted, and make Payments for Goods and Merchandizes bought at all theſe Places, in Holland; and as Holland deals with all thoſe Places in Current Money, England, therefore, in all ſuch Caſes is intitled to the Agio: And England finds from Experience, 'tis generally more for its Intereſt to have the Buſineſs from all ſuch Places negociated at Holland, or Hamburgh, for the Sake of having the Agio allowed, than to deal directly to the Places themſelves.

EXPLANATION of the foregoing TABLE.

THIS Table is calculated from the Par given by Mr *Caſtaign*, who was one of the moſt eminent Exchange Brokers of his Time in London, and well acquainted with the intrinſic Value and current Prices of the Monies of Holland. His Par is looked upon to be very exact, being ſtill approved of by the beſt Judges to be as near the Truth as poſſible. By this Par it appears that Holland ought to give England 36,59 *Flemiſh* Shillings for one Pound; and by that Proportion $1097\frac{7}{10}$ *Guilders* or *Florins* for 100 Pounds Sterling: And when this Exchange is allowed, the Coins of the two Nations are upon an Equivalent, according to their intrinſic Values.—100 Pounds of England ſent over to Holland,* at this Rate of Exchange, would pay a Debt of 1097 Guilders, 14 Stivers; or if the Guilders, &c. ſhould be ſent over hither, they would pay a Debt of 100*l.*—But when the Courſe of Exchange is only 35*s.* *Flemiſh* for 1*l.* Sterling, the Caſe is quite different. At this Rate of Exchange, 100*l.* will only be found to be worth 1050 Guilders: Or if a Debt of 100*l.* be to be paid in Holland,—at this Rate of Exchange, 104*l.* 10*s.* 10*d.* muſt be ſent over to diſcharge it; ſo 'tis plain England would loſe 4*l.* 10*s.* 10*d.* by this Negociation, and Holland would gain 47 Guilders and 14 Stivers. When the Price of Exchange is above 36,59, or 36*s.* 7*d.* 08, England gains per *Cent.* according to the Table.

A further Uſe of the Table.

London remits to Amſterdam a Parcel of Money at 35*s.* 4*d.* with Intent to take the Opportunity of the Courſe to draw in the ſaid Sum back again: In about one Month after the above Remittance was made, the Courſe between London

* *Note*, As before obſerved in Page 3, that every 4*d.* Advance in the Price of Exchange above 33*s.* 4*d.* the imaginary Par, is nearly 1*l. per Cent.* better Exchange, as to Great Britain.

and Amſterdam is at 34*s.* 3 *d.* London accordingly takes the Opportunity of this laſt Courſe to draw upon Amſterdam for the Parcel remitted thither. The *Query* is. How much *per Cent.* does London make by this Negociation?

To anſwer ſuch *Queries:* Put down the drawing Price firſt, and the Sum England loſes *per Cent.* at that Price. And underneath put down the Price remitted at, and the Loſs *per Cent.* at that Price. Subtract one from the other, the Difference *per Cent.* will be the Anſwer.

	s.	*d.*		*l.*	*s.*	*d.*
The Drawing Price	34	3	*per Cent.*	6	16	8
The Remitting Price	35	4	*per Cent.*	3	11	1
Remains £.				3	5	7

The Difference *per Cent.* is the Anſwer.

So that London does get by the above Negociation about 3*l.* 5*s.* 7*d.* *per Cent.* the Charges included; that is to ſay, the Perſon who made the above Negociation would be Gainer of about 3*l.* 5*s.* 7*d.* *per Cent.* including Charges, And the like is to be underſtood at all Times.

More EXAMPLES.

	s.	*d.*		*l.*	*s.*	*d.*	
If a Merchant of London draws at	34	2	from	7	1	10	*per C.*
And remits at	34	11	take	4	15	10	*per C.*
He gains £.				2	6	0	*per C.*

But if he had remitted at 34*s.* 2*d.* and had drawn the ſame Sum in again at 34*s.* 11*d.* he would have loſt 2*l.* 6*s.* *per Cent.* or thereabouts.

Of HAMBURGH EXCHANGES.

BOOKS and Accounts are kept at the Bank, and by moſt People, in Marks, Schilling-Lubs, and Phennings. But ſome keep them as they do at Antwerp, in Pounds, Schillings, and Groots, *Flemiſh*.

Of their Money, the Mark is an imaginary Coin, and the reſt are real ones. And

			s.	*d.*
1	Phenning is equal to	——	0	$0\frac{3}{5}\frac{1}{2}$
12	Phennings = one	Schilling-Lub	0	$1\frac{1}{8}$
16	Schilling-Lubs = a	Mark ——	1	6
2	Marks = a	Dollar —	3	0
3	Marks = a	Rix-dollar —	4	6
$6\frac{1}{4}$	Marks = a	Ducat ——	9	$4\frac{1}{2}$

Bank and Current Money are reckoned in one and the ſame Manner, *i. e.* 12 Phennings to a Schilling-Lub, &c.

Exchanges between this Place and London are negociated by ſo many *Flemiſh* Schillings for a Pound Sterling as from Holland. But here it muſt be obſerved, that a Penny or Groot *Flemiſh* is worth $\frac{54}{96}$ of a Penny *Engliſh*, and in Holland only $\frac{54}{100}$, ſo that 35 *s*. $6\frac{2}{3}$ *d*. are here, alſo at Antwerp, the Par of 1 *l*. Sterling. A Mark is therefore equal to 1*s*. 6*d*. Engliſh, and the Flemiſh Pound 11 *s*. 3 *d*. at Par.—And

6	Phennings are but	1 Groot	} *Flemiſh*.
6	Schilling-Lubs —	1 Schilling	
$7\frac{1}{2}$	Marks ——	1 Pound	

Thus it appears that $2\frac{2}{3}$ Schillings *Flemiſh* (or 32 Pence) make a Mark; and ſince 40 *d*. make a Guilder of Holland, 'tis plain Marks may be reduced to Guilders by the following eaſy Rule, and then the foregoing Table for Dutch Exchanges will anſwer for this Place alſo, with equal Exactneſs, viz.

Multiply the Number of Marks given by 4; divide the Product by 5, and the Quotient will be the Number of Guilders equal thereto.——Or if one-fifth of the Number of Marks given be ſubtracted from itſelf, the Anſwer will be the ſame.

EXAMPLE.

How much Engliſh Money will a Bill of 3460 Marks of Hamburgh amount to, Exchange at 35 *s.* 10 *d. Flemiſh* for 1 *l.* Sterling?

OPERATION.

If 5 : 4 : : 3460 Marks

4

5)13840(2768 Guilders.

Or thus,—3460

$\frac{1}{5}$ 692

2768 Guilders

Then by the Table, under 35*s.* 10*d.* Exchange, againſt

		l.	*s.*	*d.*	*q.*
2000	Guilders ſtand	186	0	11	0
700	———	65	2	3	3
60	———	5	11	7	2
8	———		14	10	3
	The Anſwer £.	257	9	9	0

Note, Exchanges are negociated from Antwerp in the ſame Manner, the Par being the ſame as at this Place; and as they reckon by Guilders and Stivers, as in Holland, the Table will anſwer for that Place without further Trouble.

The ſame may be wrought by the Rule of Three, as in Dutch Exchanges; thus,

	s.	*d.* Flem.		*l.* Sterl.		Marks.
If	35	10	:	1	: :	3460
	12					32*d. in a Mark.*
	430					430)110720(257
						2472
						3220
						210

l.	*s.*	*d.*
257	9	9

= 9 *s.* 9 *d.*

EXAMPLE II.

What will 2683 *Marks*, 14 *Schil.* 9 *Phennings* of Hamburgh amount to in England, Exchange at 34 *s.* 11$\frac{1}{2}$*d.* Flemiſh?

OPE-

OPERATION.

If 5 : 4 : : 2683
4

5)10732(2146

Rem. 2 = 8 *St.*

14 Schil. = 14
9 Phen. = 1½

Guilders 2147 2 1½

Of what remains of this Diviſion, every Unit is 4 Stivers; and obſerve that every Schilling-Lub is 1 Stiver; and alſo every 6 Phennings 1 Groot or Penny Flemiſh.

By the Table,—againſt	*l.*	*s.*	*d.*	*q.*
2000 Guilders ſtand	190	14	0	3
100 ———	9	10	8	1
40 ———	3	16	3	1
7 ———		13	4	1
2 *St.* 1½ *Gr.*	—		3	2
The Anſwer *£.*	204	14	8	0

The ſame performed by the Rule of Three.

s.	*d.*		*l.*	*Ma.*	*Sc.*	*P.*
If 34	11½	: 1 : :	2683	14	9	
24				64 Half-pence in a Mark.		
839 H. Pence.			171712		*Sch.*	*P.*
				60 Half-pence in	14	9

l. *s.* *d.* *q.*
839)171772(204 14 8 0 Anſw.

Remainder 616 = 14*s.* 8*d.* found by multiplying by 20, 12, and 4, and dividing each Time by the old Diviſor.

To reduce Engliſh Money into Marks, Schilling-Lubs, ana Phennings of Hamburgh.

RULE.—As one Pound Engliſh, is to the Rate or Price of Exchange; ſo is the Sum given to be equated, to the Anſwer in Flemiſh Money.

EXAMPLE.

How many Marks muſt be received at Hamburgh for 204 *l.* 14 *s.* 8 *d.*———Exchange at 34 *s.* 11½ *d. Flemiſh* for 1 *l.* Sterling?

OPERATION.

l.	*s.*	*d. Fl.*	*l.*	*s.*	*d.*
If 1 :	34	11½ :	204	14	8

d.	*H. Pen. Fl.*	*d.*
Or, 240 :	839 : :	49136

839

240)41225104(171771

Remainder 64

Which Quotient (viz. 171771) divided by 64 the Number of Half-pence in a Mark, produces 2683 *Ma.* 14 *Sch.* 9 *Phen.* the Anſwer.

What remains of the latter Diviſion muſt be multiplied by 16 and 12, and divided each Time by the old Diviſor for the Schilling-Lubs and Phennings. What remains of the former by 3 for Phennings, as 3 Phennings are half Groot.

Note, This Place deals always with England in Bank Money, but with Holland moſtly in Current Money.——It may be worth obſerving, that the Value of the Mark of Exchange at this Place, as well as the Guilder in Holland, varies according to the Price of Exchange.———At Par the former is worth 1*s.* 6*d.* and the latter 1*s.* 9*d* 2$\frac{2}{51}$*q.* (or rather 21*d.* ,8639, according to Mr *Caſtaign*'s Par.)—But the Par of the Guilder of Hamburgh is 1*s.* 10½*d.*—24 Guilders there being equal to 25 of Holland; yet their different Values do not alter the Properties of the preceding Table, as both are computed one Way. When the Exchange is above Par, they are of leſs Value, and when under, of more, as it appears by the Table.

The *Agio* is ſometimes ſo high at this Place as between 30 and 40 *per Cent.*

TABLE IV.

Of FRENCH EXCHANGES.

ACcounts are kept in almoſt all the French Dominions in Livres, Sols, and Deniers, and they reckon

12 Deniers to a Sol,
20 Sols to a Livre, and
3 Livres to a Crown, or Ecu.

At Dunkirk, and ſome other Places in the Northern Parts of France, they reckon by Livres, Patarts, and Deniers; 15 Deniers making a Patart, and 16 Patarts a Livre of 20 Sols, as at other Places.

The Values of their principal Coins are as follow:

			l.	*s.*	*d.*
A Denier is equal to			0	0	$0\frac{13}{320}$
A Laird	= 3	Deniers —	0	0	$0\frac{39}{320}$
A Dardene	= 2	Lairds —	0	0	$0\frac{39}{160}$
A Sol	= 2	Dardenes —	0	0	$0\frac{39}{80}$
A Patart	= 5	Lairds —	0	0	$0\frac{39}{64}$
A Frank	= 20	Sols, or 1 Livre	0	0	$9\frac{3}{4}$
A Crown	= 60	Sols or 3 Livr.	0	2	$5\frac{1}{4}$
Double ditto	= 120	Sols or 6 Livr.	0	4	$10\frac{1}{2}$
A Louis d'Ore	= 8	Crowns —	0	19	6

They have alſo Fractions of the Frank and the Crown.

The Livre is an imaginary Coin, the reſt are real ones.

The French make out their Notes for Goods and Merchandizes in Livres, Sols, and Deniers: But Exchanges to and from this Kingdom are always rated by the Crown, or Ecu of 3 Livres; and they uſe the Word *Tournois* to diſtinguiſh their Money from others, in the ſame Manner as we do the Word *Sterling*.—England gives an uncertain Number of Pence and Parts of a Penny, for a French Crown of 3 Livres, according to the Courſe of Exchange, which is commonly between 30 and 34 Pence Sterling, for the Crown of 3 Livres, or 60 Sols.

The

The Exchange between France and other Countries varies more than any other, owing to the frequent Alterations of their Coin, which are made by the King's Arret, wherein he declares and orders how many Crowns in Specie are to be coined at his Mint, out of the Mark, as they call it, or 8 of their Ounces of Silver; but this Mark is only *7 oz.* 17 *penny wt.* 12 *gr.* Engliſh Weight, which at 5*s.* 2*d. per* Ounce, is worth only 2*l.* 0*s.* 8¼*d.* —By the laſt Arret in France, of June 15, 1726, the King ordered that there ſhould be coined out of the Mark 8⅜ Crowns, each Crown to paſs for 6 Livres, that is, the Mark when coined to paſs for 50 Livres, 5 Sols; from whence we have this Equation, that 50¼ Livres are intrinſically worth 2*l.* 0*s.* 8¼*d.* from whence the Par of the Exchange Crown of 3 Livres may be deduced, which will be found to be 29*d.* ,149 Sterling; and whatever is paid more or leſs for it, is ſo much Loſs or Gain: Every Farthing Advance in the Price of Exchange being 17*s.* 1¾*d. per Cent.* Loſs,—and a Farthing leſs, ſo much Gain at this Par.

By the Equation of the French Coins aforeſaid, the Value of the Crown of 3 Livres is 29¼ *d.* Engliſh, which is rather better than 29 *d.* and the Decimal ,149; but being the neareſt it can be reduced to in Engliſh Money, it may, without much Injuſtice, be deemed its Par, or intrinſic Value: Every Farthing Advance in the Price of Exchange being 17*s.* 1 *d.* Loſs or Gain at this Par.

In theſe Calculations it muſt be obſerved, that the Silver or Metal itſelf is only valued at 5*s.* 2*d. per* Ounce. If 5*s.* 6*d. per* Ounce be ſuppoſed the current Price for *Standard* Silver, (*Standard* Silver being nearly of equal Goodneſs at moſt of the principal Places in Europe) and the Computation made at that Price, the Mark before-mentioned will be worth 2*l.* 3*s.* 3¾*d.* which being the intrinſic Value of 50¼ Livres, a Crown of 3 Livres will therefore be 31*d.*,02985.—This ſeems to be its real Par at preſent, ſince if their Silver Coins were imported (and there is no Prohibition

hibition here againſt it) they would give near 5*s.* 6*d. per* Ounce. Every Farthing Advance above the Par of 31 $\frac{1}{4}$*d.* (which, tho' rather better than 31*d.* and the aforeſaid Decimal, without much Injuſtice, may be deemed the true Par of the French Crown) will be 16 *per Cent.* Loſs to England,—and every Farthing leſs, ſo much Gain.

Note, The Value of the French Crown of Exchange is never altered, unleſs by a new Arret from the King.

EXAMPLE I.

Suppoſe a Merchant in France ſends over Goods to England to the Value of 5427 Livres, 12 Sols, and 9 Deniers, Exchange at 32$\frac{5}{8}$*d.* Sterling, for one French Crown, or Ecu; how much Engliſh Money will the ſame amount to?

OPERATION *by the Rule of Three.*

RULE.—As 3 Livres, (equal to 1 Crown, or Ecu) are to the Price of Exchange; ſo are the Livres, &c. given to be equated, to the Anſwer in Pence Sterling:—Obſerving to equate the Price of the Exchange, and the firſt Term in whole Numbers, as directed in Page 66 for equating the Agio.—Alſo to reduce the firſt Term into the like Denomination with the third, how long ſoever it may be neceſſary to reduce that before the Operation.—Thus,

Liv.		*d.*		*Li.*	*Sols.*	*D.*
If 3	:	32$\frac{5}{8}$	: :	5427	12	9
8					20	
—		261				
24				108552		
20					12	
480				1302633		
12					261	Price of Exchange.
5760	)			339987213	(59025	Quotient.

Remainder 3213 = $\frac{1}{2}$*d.*

Which Quotient being divided by 12 to reduce it into Shillings, and then by 20 for Pounds, produces 245 *l.* 18 *s.* 9$\frac{1}{2}$ *d.* the Anſwer.

The

The former Queſtion reſumed.

OPERATION.

By the Table, under the Exchange of $32\frac{5}{8}$ *d.*

oppoſite to		*l.*	*s.*	*d.*	*q.*
5000 Livres ſtand	——	226	11	3	0
400 ——	——	18	2	6	0
20 ——	——	0	18	1	2
7 ——	——	0	6	4	0
12 Sols	——	0	0	6	2
9 Deniers	——	0	0	0	1½
Anſwer *£.*		245	18	9	2

N. B. As the Eighths will always divide into Farthings or Half Farthings, the Work may be ſhortened by the Rule of *Practice*; thus, obſerving as you go along to divide the Livres, Sols, and Deniers throughout; then by dividing the Sum of all the Products by 3, you will have the Anſwer in Pounds, Shillings, Pence, & Farthings.

The former Queſtion again reſumed.

d.		*Liv.*	*Sols*	*Den.*	
30 is $\frac{1}{8}$ *£.*		5427	12	9	
$2\frac{1}{2}$ is $\frac{1}{12}$ of 30		678	9	1	$0\frac{1}{2}$
$\frac{1}{8}$ is $\frac{1}{20}$ of $2\frac{1}{2}$		56	10	9	$0\frac{1}{4}$
		2	16	6	$1\frac{3}{4}$
		3)737	16	4	$2\frac{1}{2}$

The Anſwer *£.* 245 18 9 2

At Dunkirk, and ſome other Places in the northern Parts of France, the Price of Exchange is ſometimes rated by an uncertain Number of Livres and Sols for one Pound Sterling.——When this happens to be the Caſe, the Queſtion cannot be ſolved directly by the Table, but the Exchange muſt be firſt reduced to the uſual Way of rating it, *i. e.* to its equivalent in Engliſh Pence for one French Crown,—thus,

RULE.—As the Livres in the Exchange given, are to 20 *s.* (or rather the Pence in a Pound Sterling) ſo are 3 Livres, to the Anſwer in Pence Engliſh, which will be the Price of Exchange *per* French Crown.

EXAMPLE II.

What will 7655 Livres, 12 Sols amount to, Exchange at 22 Livres, 10 Sols for 20*s.* Sterling?

Liv. *s.* *Liv.*
If $22\frac{1}{2}$: 20 : : 3
Sols. *d.* *Sols.*
Or, if 450 : 240 : : 60
60

d.
450)14400(32 Price of Exchange *per* French Crown.

Then proceed by the Table as before,—under 32*d.* Exchange, viz.

		l.	*s.*	*d.*
Oppoſite to	5000 Livres ſtand —	222	4	$5\frac{1}{4}$
	2000 —— —— ——	88	17	$9\frac{1}{4}$
	600 —— ——	26	13	4
	50 —— —— —	2	4	$5\frac{1}{4}$
	5 —— — —	0	4	$5\frac{1}{4}$
	12 Sols —— —	0	0	$6\frac{1}{2}$
	The Anſwer *£.*	340	4	$11\frac{1}{2}$

N. B. If the Exchange ſhould happen to be rated in Livres and Patarts, obſerve that every 4 Patarts are equal to 5 Sols.——This muſt be obſerved both in the Rate of Exchange and Sum to be exchanged, when you apply to the Table.

This Queſtion, and others of the like Kind, may be wrought by the Rule of Three, from the Exchange given, without finding the Price *per* Crown,—thus,

Liv. *Sol* *l.* *Liv.* *Sols*
If 22 10 : 1 : : 7655 12
20 20
l. *s.* *d.*
450 450)153112(340 4 $11\frac{1}{2}$

Remainder 112 = 4 $11\frac{1}{2}$*d.*
found by multiplying by 20, 12, and 4, in the common Way.

Or from the Price of Exchange *per* Crown, by the Rule of *Practice*, as the former Queſtion.

To

To reduce Engliſh Money into French Money.

Sterling Money may be reduced to French by reverſing the Proportion of the former Caſe, or by making up the Sum to be exchanged from the Table under the Price of Exchange given, and marking down the Livres, Sols, and Deniers, oppoſite to each. The Sum of the whole will be the Value of the Sterling Money.

EXAMPLE.

How much French Money will 365*l.* 15*s.* 6*d.* Sterling amount to, Exchange at $32\frac{7}{8}d.$ for one French Crown?

OPERATION *by the Table.*

On the Left Hand Side, and oppoſite to

l.	*s.*	*d.*	*q.*		*Liv.*	*So.*	*D.*
228	5	11	3	ſtand	5000		
136	19	7	0	——	3000		
	9	1	$2\frac{1}{2}$	——	10		
		9	$2\frac{1}{2}$	——		17	9
365	15	6	0	Anſ. *Liv.*	8010	17	9

OPERATION *by the Rule of Three.*

	d.		*Liv.*		*l.*	*s.*	*d.*
If	$32\frac{7}{8}$	:	3	: :	365	15	6
	263		8		20		
			24		7315		
					12		
					87786		

24 = 3 Livres equated to the Exchange.

263)2106864(8010 17 9 Anſwer.

Sols Den.

Remaind. 234 = 17 9

What remains of this Diviſion muſt be multiplied by 20 and 12, and the Product each Time divided by the old Diviſor, for the Sols and Deniers.

☞ The Table adjoined ſhews the Value of any Number of Livres, Sols, and Deniers, in Engliſh Money, at all the common Prices of Exchange.

TABLE V.

of PORTUGAL EXCHANGES.

BOOKS and Accounts are kept in general throughout this Kingdom in Mill-reas and eas, 1000 Reas making a Mill-rea, and they parate the Mill-reas from the Reas by a Mark us, 567Θ476, which is as much as to ſay 567 ill-reas and 476 Reas.

The principal Current Coins of Portugal are follow, viz.

		l.	*s.*	*d.*	*q.*
(COPPER.)					
Quarto Vintin =	5 Reas	0	0	0	$1\frac{7}{20}$
Vintin — =	20 Do.	0	0	1	$1\frac{2}{5}$
(SILVER.)					
Teſtoon (5 Vintins) =	100 Do.	0	0	6	3
Cruiſade, or Crown, (4 Teſtoons) =	400 Do.	0	2	3	0
new Cruiſade (24 Vintins) or $\frac{1}{10}$ Moidore =	480 Do.	0	2	8	$1\frac{3}{5}$
(GOLD.)					
Teſtoon Piece =	800 Do.	0	4	6	0
Moidore (48 Teſtoons) =	4800 Do.	1	7	0	0
Joaneſe (64 Teſtoons) =	6400 Do.	1	16	0	0

Likewiſe 5 Moidore Pieces, $2\frac{1}{2}$, $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$ ditto. ſo 4 Joaneſe, double Joaneſe, $\frac{1}{2}$, $\frac{1}{4}$, and $\frac{1}{8}$ ditto.

The Mill-rea and the Rea are imaginary. A ill-rea is 5*s.* $7\frac{1}{2}d.$ and a Rea $\frac{27}{100}$ of a Farthing *erling*.

England (as well as other Nations) exchanges th this Kingdom by the Mill-rea, and gives nce and Parts of a Penny for it, according to e Courſe of Exchange, which is generally from 3*d.* to 5*s.* 8*d.* ——The Par of the Mill-rea is . $7\frac{1}{2}$ *d.* and every Farthing that is given leſs more for it, is 7*s.* $4\frac{3}{4}d.$ $\frac{15}{27}$ *per Cent.* Loſs or ain.—As England has generally a Balance due om thence, the Exchange is ſeldom higher than the Rate of 5 *s.* 4 *d.* *per* Mill-rea,—which at

this Price is 5*l.* 3*s.* 8½*d. per Cent.* under Par, a to England, and therefore ſo much Loſs; but t any particular Merchant, being ſo much better Exchange, the leſs he gives for the Mill-rea, it is 5*l.* 3*s.* 8½*d.* Gain *per Cent.*

The TABLE explained.

In the following Table Mill-reas and Reas ar equated in Engliſh Money.—The firſt Column o each Page ſhews the Number of Reas; and th Pounds, Shillings, Pence, and Farthings, in th other Columns; oppoſite to each Number o Reas is the Value thereof, according to the Pric of Exchange.

EXAMPLE.

A Merchant of Oporto ſends over to England a Cargo of Wine, to the Value of 1654320 Reas, Exchange at 5*s.* 3⅜*d. per* Mill-rea; how much does the ſame amount to in *Sterling* Money

OPERATION *by the Table.*

Under 5*s.* 3⅜*d.* Exchange, and oppoſite t

Reas.			*l.*	*s.*	*d.*
900,000		ſtand	237	13	1

The Anſwer £. 436 16 10

OPERATION *by the Rule of Three.*

RULE.—As 1000 Reas are to the Price of Exchange, ſo are the Reas given, to the Anſwer i Pence Engliſh,—obſerving to proceed with th Parts of a Penny, when any occur, as befo directed under French Exchanges.

Th

The former Queſtion reſumed.

Reas.	*s.*	*d.*		*Reas.*
If 1000 :	5	$3\frac{3}{8}$	: :	1654320
Or, if 8000 :	507		: :	1654320
				507

11580240
82716000

8000)838740240(104842 Quot.

Remainder 4240 or ,53 = $0\frac{1}{2}d.$

Which Quotient (viz. 104842) divided by 12, and 20, produces 436*l.* 16*s.* $10\frac{1}{2}d.$ the Anſwer.

Queſtions of this Kind may alſo be wrought by the Rule of *Practice*, as under, obſerving to keep the Mill-reas ſeparate from the Reas, and that the Quota of the Reas make only decimal Parts of a Pound; but the Method aforeſaid is preferable, being more plain and eaſy, and generally ſhorter, as the laſt three Figures in the Dividend may always be cut off, which, with what remains from the fourth, are but ſo many fractional Parts of a Penny, according to the Diviſor,—thus,

The former Queſtion again reſumed.

OPERATION.

Reas 1654,320 at 5*s.* $3\frac{3}{8}d.$

1 *s.* is	$\frac{1}{4}$	413,580
3 *d.* is	$\frac{1}{20}$	20,679
$\frac{2}{8}$ *d.* is	$\frac{1}{12}$	1,723
$\frac{1}{8}$ *d.* is	$\frac{1}{2}$	,862

Anſwer 436,844 or 436*l.* 16*s.* $10\frac{1}{2}d.$

The Value of the laſt Figures (viz. 844) is found by multiplying by 12, and 4, and cutting off the Figures to the Left Hand above three in each Product;—ſo of any other.

To reduce Engliſh Money into Reas of Portugal, is but to reverſe the former Rule, *i. e.* begin the Proportion with the Price of Exchange, and multiplying the firſt and ſecond Terms into the fractional Part of the Exchange, as before.

The former Queſtion reverſed.

OPERATION.

	s.	*d.*		*Reas.*		*l.*	*s.*	*d.*
If	5	$3\frac{3}{8}$	:	1000	: :	436	16	$10\frac{1}{2}$

TABLES VI. and VII.

EXCHANGES *from* SPAIN, ITALY, GERMANY, DENMARK, RUSSIA, *&c. may respectively be reduced to Engliſh Money, by the joint Application of thoſe two Tables: And firſt,*

Of SPANISH EXCHANGES.

AT Cadiz, Madrid, Bilboa, Malaga, and moſt of the principal Places in this Kingdom, Books and Accounts are kept in Piaſtres, or Dollars, Rials and Marevedies,—and they reckon

34 Marevedies make 1 Rial
8 Rials —— 1 Piaſtre
11 Rials 1 Mar. — 1 Ducat
} of Exchange old Plate

The principal of their current Coins are, viz.

	l.	*s.*	*d.*	*q.*
(COPPER.)				
A Marevedie is	0	0	0	$\frac{43}{272}$
A Quartil, or Ochavo = 2 Marev.	0	0	0	$\frac{43}{136}$
A Quarto = 2 Quartils, or 4 Marev.	0	0	0	$\frac{43}{68}$
(SILVER.)				
A Rial = 17 Quartils, 34 Marev.	0	5	1	$\frac{1}{2}$
A Piſtine = 2 Rials ——	0	10	3	
A Piaſtre, Dollar, Peſo, or Livre } 8 Rials old Plate	3	7	0	
A Dollar of Seville = 10 Rials ditto	4	6	0	
(GOLD.)				
A Ducat is 375 Marevedies	4	11	0	$\frac{77}{272}$
A Piſtole = 4 Dollars of 10 Rials nearly }	17	11	0	

They have alſo 4 and 2 Piſtole Pieces, and $\frac{1}{2}$ and $\frac{1}{4}$ ditto. Likewiſe Dollars of Peru of 4 *s.* 5 *d.* Pillar Dollars of 4 *s.* $6\frac{3}{4}$ *d.* and Croſs Dollars of 4 *s.* $4\frac{3}{4}$ *d.* each.

The Marevedie and Ducat of Exchange are both imaginary; the Piaſtre conſiſts of 8 Rials of old, and 10 of new Plate.

Exchanges between England and this Kingdom are generally negociated by the Piaſtre, ſometimes by the Ducat. England gives an uncertain Number of Pence and Parts for 1 Piaſtre.—The Courſe of Exchange is between 35 *d.* and 45 *d.* Sterling for a Piaſtre of 8 Rials.

The Par of the Piaſtre is 3 *s.* 7 *d.* and every Farthing that is given more or leſs for it is 11*s.* 7½*d.* Loſs or Gain per Cent.

The TABLES explained.

The firſt Column in Table VI. of each Page ſhews the Number of Piaſtres, or Coin of Exchange, and oppoſite thereto ſtands the Engliſh Money, the Value thereof according to the Price of Exchange, and the Parts at the Bottom ſhew the Value of the Rials, or any Coin of the next lower Denomination to that the Exchange is made by, obſerving in this Caſe that a Half is equal to 4 Rials, 1-8th 1 Rial, &c. and in other Caſes according to the Piece of Exchange reſpectively. In ſhort, Table VI. gives the Value of the Piaſtres and Rials, (or other Pieces) to be exchanged in Engliſh Money, according to the Pence Sterling in the Price of Exchange. And Table VII. gives the Value for the Parts of a Penny reſpectively.

EXAMPLE.

Suppoſe a Merchant at Cadiz ſends over Goods to Hull, to the Value of 4326 Piaſtres, 6 Rials, old Plate, Exchange at 38⅜ *d. per* Piaſtre; how much will the ſame amount to in Sterling Money?

By Table VI. under 38 *d.* Exchange, and oppoſite to

		l.	*s.*	*d.*	*q.*
4000	ſtand	633	6	8	0
300	———	47	10	0	0
20	———	3	3	4	0
6	———	0	19	0	0
Half = 4 Rials	———	0	1	7	0
1-4th = 2 ditto	———	0	0	9	2
By Table VII. for the Parts under ⅜*d.* Exchange.					
4000	——— ———	6	5	0	0
300	——— ———	0	9	4	2
20	——— ———	0	0	7	2
6	——— ———	0	0	2	1
Half = 4 Rials	———	0	0	0	0,75
1-4th = 2 ditto	———	0	0	0	0,37
Anſwer £.		691	16	7	0,12

Theſe Tables being carried to 100 Parts of a Farthing, will be found always to anſwer to the greateſt

greateſt Exactneſs, provided due Care be obſerved in taking the Coins of the next leſs Denomination to thoſe of the Exchange from the Parts in the Tables reſpectively.

OPERATION *by the Rule of Three.*

	Piaſtre.		*d.*		*Piaſt.*	*Rials*
If	1	:	$38\frac{3}{8}$	: :	4326	6
	8		8		8	
	8					
Or	64	:	307	: :	34614	Rials
					307	Exch.

64)10626498(166039 Quot.

Which Quotient divided by 12 and 20, produces 691 *l.* 16 *s.* 7 *d.* the Anſwer.

Or by the Rule of Practice,—thus

4326 Piaſtres at $38\frac{3}{8}d.$

					Rials		*d.*	
30 is	$\frac{1}{8}$	540	15				$38\frac{3}{8}$	Ex.
6—	$\frac{1}{5}$	108	3					
2—	$\frac{1}{3}$	36	1					
$\frac{2}{8}$	$\frac{1}{2}$	4	10	$1\frac{1}{2}$	4 = $\frac{1}{2}$		19	$0\frac{3}{4}$
$\frac{1}{8}$	$\frac{1}{2}$	2	5	$0\frac{3}{4}$	2 = $\frac{1}{4}$		9	$2\frac{1}{4}$
		691	14	$2\frac{1}{4}$		*s.* 2	4	3
			2	$4\frac{3}{4}$				

£. 691 16 7 the Anſwer.

In Valencia, Accounts are kept in Livres or Dollars, Sueldos and Deneros, 12 Deneros making a Sueldo, and 20 Sueldos a Dollar.—A Sueldo is $2\frac{3}{10}d.$ and a Denero $\frac{43}{60}$ of a Farthing, 30 making a Rial of Plate. AtCaſtalia and ſome of the inland Towns, Accounts are kept in Marevedies, ſeparating the 100ths from the 1000ths, as they do the Reas in Portugal, and at theſe Places they exchange by the imaginary Ducat of 375 Marevedies. At the Cuſtomhouſe at Madrid, and ſome public Offices in the Kingdom, Accounts are kept in Rials, and Marevedies, Vellon, or Copper Money.

It muſt be obſerved that the Money of Spain is of two Sorts, viz. old and new Plate, and that the old is 25 *l. per Cent.* better than the new.—Yet the Piaſtre of Exchange is of equal Value in

both, tho' the former consists of 8 Rials, and the latter of 10. But in the Rials and Marevedies of old Plate, $\frac{1}{4}$ must be added to reduce them to new Plate, or on the contrary $\frac{1}{5}$ deducted from the new to reduce them to the old, as Occasion may require.

The following Example will make this easy

	Piast.	*R.*	*Mar.*	
	3462	6	10	Old Plate
Add $\frac{1}{4}$		1	$19\frac{1}{2}$	
	3462	7	$29\frac{1}{2}$	New Plate
Deduct $\frac{1}{5}$		1	$19\frac{1}{2}$	
=	3462	6	10	Old Plate again.

There is also another Distinction to be made in the Coins of this Nation, *i. e.* between those of Plate and those of Vellon; yet as England always exchanges by those of Plate, this seems almost needless.—But as the Knowledge thereof may be of Service to some, the Proportions they bear to those of old Plate are here inserted, and are as under, viz.

Vellon.		*Vellon.*
A Quarto	is	4 Marevedies
A Rial	is	34 Marevedies $8\frac{1}{2}$ Quartos
A Piastre	is	512 Marevedies 128 Quartos 15 Rials 2 Mar.

And,

In equating the Vellon Coins to those of Plate, a Rial of old Plate is reckoned 16 Quartos Vellon, so that any Number of Piastres and Rials Vellon reduced to Quartos, and divided by 16, the Quotient will give the Rials old Plate, which divided again by 8, gives the Piastres old Plate.

And Piastres, Rials, &c. of old Plate may be equated to Vellon Money, by reducing them into Quartos, *i. e.* by multiplying the Rials by 16; and if Occasion require, the Quartos may be reduced to Marevedies Vellon by multiplying by 4. Then,

Marevedies Quartos Rials	divided by	512 128 $15\frac{1}{17}$	*Quere* Piastres, Vell.
Quartos	divided by	$8\frac{1}{2}$	Rials ditto.

The Piaſtre Vellon is of the ſame Value with the Piaſtre of Exchange of old and new Plate; but the Rial, which is imainary, is worth but a Trifle more than half a Rial of old Plate,——32 Rials Vellon being equal to 17 of Plate.

Note, Inland Bills are frequently paid in Vellon Coins.——Alſo foreign Bills, if the Drawer does not mention Payment to be made in Gold or Silver, whereby a Loſs of about $1\frac{1}{2}$ *per Cent.* will accrue to the Bearer of the Bills, the Vellon Coins being ſo much worſe than thoſe of Plate.

VEnice, Leghorn, and Genoa are the principal Places of Exchange in Italy.

EXAMPLE for Venice.

How much will 5640 Ducats, 9 Groſs Banco, amount to in Sterling Money, Exchange at $53\frac{3}{8}$ *d.* per Ducat?

OPERATION *by the Tables.*

DOUBLES, &c. RIX-DOLLARS, RUBBLES, PEZZOS,

TABLE VIII.

Of VENICE EXCHANGES.

THE Money of Venice is of three Sorts, viz. two of Bank Money, and the Picoli Money. One of the Banks deals in Banco Money, and the other in Banco Current; and the Bank Money is always reckoned 20 *per Cent.* better than the Banco Current Money.

The Picoli Money (the 3d Sort) is the Money with which Merchandizes are generally bought, which is about 19 or 20 *per Cent.* worſe than the Current Banco Money,—ſo that 100 Ducats Banco Money are 120 Ducats Current Banco, and about 140 Picoli Money. The Current Banco Money, and the Picoli Money, are both computed in one and the ſame Manner;—and Lires multiplied by 20, the Soldi in a Lire, and the Product divided by 124, the Soldi in a Ducat, produce Ducats current in both.

Accounts are kept in Ducats and Groſs Banco, or in Lires, Soldi, and Denari Current Banco, reckoning in the former 24 Groſs to a Ducat, and in the latter 12 Denari to a Soldi, and 20 Soldi to a Lire. The Ducat and Groſs Banco, and the Lire Current Banco, are all imaginary.

Note, The Ducat Banco, for Facility of Computation, is frequently ſubdivided into 20 Sols d'Or, and each Sol into 12 Deniers d'Or,—every Groſs making 10 Deniers d'Or; and Bankers keep their Accounts in Ducats Banco, Sols, and Deniers d'Or.

If the Value of Goods and Merchandizes be computed in Picoli Money, as 'tis generally at home, as Exchanges are always rated in Banco, the foreign Purchaſer is intitled to an Agio of about 40 *per Cent.* If in Current Banco, of 20 *per Cent.* more or leſs as the Agio rules.——The Method of finding the Agio is ſimilar to that for Holland.

The

The Par of the Current Ducat of 120 Soldi $40\frac{1}{2}$ *d.* therefore the Par of the Ducat Banco 124 Soldi will be 50,22 *d.* or 4 *s.* $2\frac{1}{4}$ *d.* Sterg nearly, and every Farthing that is given more leſs for it is 9 *s.* $11\frac{1}{4}$ *d. per Cent.* Loſs or Gain. And the Courſe of Exchange is from 45 to 55 *d.* terling *per Ducat.*

Banco Money equated in Current Money.

	Banco.	*Current.*
Ducat =	24 Groſs $6\frac{1}{5}$ Lires, or 124 Soldi	$28\frac{4}{5}$ Groſs $7\frac{11}{25}$ Lires, or $148\frac{4}{5}$ Soldi
Groſs =	$5\frac{1}{6}$ Soldi	= $6\frac{1}{5}$ Soldi
Lire =	10 Ducats	= 12 Ducats

And every Species is $\frac{1}{5}$ better than Current oin reſpectively.

The Current Coins equated.

		s.	*d.*
Picoli or Denari		0	$0\frac{27}{960}$
Soldi	= 12 Picoli or Denari	0	$0\frac{27}{80}$
Groſs	= $5\frac{1}{6}$ Soldi, or 62 Picoli	0	$1\frac{357}{480}$
Julio	= 18 Soldi	0	$6\frac{3}{40}$
Lire	= 20 Soldi	0	$6\frac{3}{4}$
Teſtoon	= 3 Julios	1	$6\frac{9}{40}$
Ducat	= $6\frac{1}{5}$ Lires, or 124 Soldi	3	$5\frac{17}{20}$
Chequin or Sequin	= 17 Lires	9	$6\frac{3}{4}$
Piſtole	= 29 Lires	16	$3\frac{7}{4}$

Exchanges are always negociated by the Ducat anco, and England gives an uncertain Number f Pence and Parts for it.

Queſtion in Page 185 *reſumed.*

D.		*s.*	*d.*		*Duc.*	*Gr.*	
f 1	:	4	$5\frac{3}{8}$	: :	5640	9	
Or, if	24	*Gr.*	: :	$53\frac{3}{8}$ *d.*	: :	135369	*Gr.*

	192			427		192)57802563(301055	

(Quotient.)

Which Quotient being divided by 12 and 20, roduces 1254 *l.* 7 *s.* $11\frac{3}{292}$ *d.* the Anſwer.

N. B. The Word *Picoli* ſignifies a Denier o Penny, and Picoli and Current are generally ſy nonimous Words, but here the latter muſt b underſtood Current Banco Money, which is nea 20 *per Cent.* better than the Picoli Mone throughout,—as Circumſtances and Conjunctur vary, it is more or leſs ſo.

To reduce Engliſh Money into Banco Mone is but to reverſe the Proportion, which in the a foreſaid Queſtion will ſtand thus:

If $53\frac{3}{8}$ *d.* : 1 *Duc.* : : 1254 *l.* 7 *s.* 11 *d.* will be found to be 5640 *Duc.* 9 *Gr.* Banco; obſerving in this Caſe to multiply the Remainder of the firſt Diviſion by 24, the Groſs in a Ducat (and in any other Caſe, by the Number of the next leſs Denomination contain'd in the Piece the Exchange is rated by) which divided by the old Diviſor, will give the Groſs. Or the Sum given may be taken at ſeveral Times from the Tables, under the Price of Exchange, and the Ducats, &c. oppoſite to each, added together, will be the Anſwer, or Value of the whole.—And as this Method will anſwer in all Caſes to any other Place in Italy, Germany, Denmark, Ruſſia, &c. it need not be repeated.

The Method of computing the Agio.

In 1467 Ducats, 16 Sols d'Or Current Banco, Agio 23 Ducats, or 460 Sols d'Or *per Cent.* or *per* 100 Ducats, how many Ducats Banco?

D. C.		*D. B.*		*D. C.*	*Sols.*
If 120	:	100	: :	1467	16
20				20	
2400	Sols			29356	
460	Agio add			100	
2860					*D. So. D.*

2860)2935600(1026 8 8 (Anſwer.)

Rem. 1240 = 8 *Sols.* 8 *Den.*

Current Money	1467	16	0
Banco ditto	1026	8	8
Agio	441	7	4

IN-

INSTRUCTION. 120 Ducats Current being only 100 Banco, the Proportion muſt always ſtand as above, and to the 120 reduced to Sols the Agio muſt be added for the Diviſor—In reducing Banco Money to Current, the Proportion muſt be reverſed.—The Ducat Current as well as the Ducat Banco, is divided into 20 Sols d'Or, and each Sol into 12 Deniers d'Or.

Of GENOA EXCHANGES.

AT this Place Exchanges are negociated by the Pezzo, England giving an uncertain Number of Pence and Parts for it:—And Books and Accounts are generally kept in Pezzos, Soldi, and Denari, reckoning 12 Denari to a Soldi, and 20 Soldi to a Pezzo. The Pezzo of Exchange is $5\frac{3}{4}$ Lires, the Lire being imaginary.

Some keep their Accounts in Lires, Soldi, and Denari, 1 Lire being 20 Soldi of the Lire, and 1 Soldi 12 Denari of the Lire; ſo that Exchange Money is $5\frac{3}{4}$ Times better than the Lire Money throughout.

The Courſe of Exchange is from 47 to 58 *d.* Sterling for 1 Pezzo of $5\frac{3}{4}$ Lires, or 115 Soldi of the Lire; but Exchanges are always computed in Pezzos, Soldi, and Denari of the Pezzo.

The Current Coins are, viz.			*s.*	*d.*
A Denari	——	——	0	$0\frac{13}{345}$
A Soldi	= 12 Denari	——	0	$0\frac{54}{115}$
A Chevalet	= 4 Soldi	——	0	$1\frac{101}{115}$
A Lire	= 20 Soldi	——	0	$9\frac{9}{23}$
A Teſtoon	= 30 Soldi, or $1\frac{1}{2}$ Lires		1	$2\frac{2}{23}$
A Pezzo	= 115 Soldi, or $5\frac{3}{4}$ Lires		4	6
A Genouini	= 6 Teſtoons	——	7	$0\frac{12}{23}$
A Piſtole	= 20 Lires	——	15	$7\frac{19}{23}$
A Span. do.	= 24 ditto	——	18	$9\frac{9}{23}$

The Par of the Pezzo is 4 *s.* 6 *d.* and every Farthing that is given more or leſs for it, is 9 *s.* 3 *d. per Cent.* Loſs or Gain.

EXAMPLE.

How much will a Bill of Parcels from Genoa of 3390 Pezzos, 16 Soldi, amount to, Exchange at $51\frac{7}{8}$ *d.* Sterling *per* Pezzo?

Of

Of LEGHORN EXCHANGES.

BOoks and Accounts are kept here in Piaſtres (or Pezzos) Soldi, and Denari, reckoning (as at Genoa) 12 Denari to a Soldi, and 20 Soldi to a Piaſtre.

Exchanges are negociated by the Piaſtre, which at this Place conſiſts of 6 Lires, or 120 Soldi, tho' but of the ſame Value with the Pezzo of Genoa, its Par being 4 *s.* 6 *d.*—The Lire is imaginary; and Pezzos, Soldi, and Denari muſt be multiplied by 6 throughout, to reduce them to Lire Money.

The Current Coins of Leghorn are, viz.

			s.	*d.*
A Denari			0	$0\frac{3}{80}$
A Quatrini	=	4 Denari	0	$0\frac{3}{20}$
A Soldi	=	3 Quatrini	0	$0\frac{9}{20}$
A Craca, or Grain	=	5 Quatrini	0	$0\frac{3}{4}$
A Julio, or Paulo	=	8 Grains	0	6
A Lire	=	20 Soldi	0	9
A Piaſtre	=	120 Soldi	4	4
A Ducat	=	150 ditto	5	$7\frac{1}{2}$
A Piſtole	=	21 Lires	15	9

The Courſe of Exchange is from 47 to 58 *d.* Sterling *per* Piaſtre, the Par of which is 4 *s.* 6 *d.* and every Farthing that is given more or leſs for it is 9 *s.* 3 *d. per Cent.* Loſs or Gain.

The Manner of computing Exchanges from this Place is ſimilar to that of Genoa.

EXCHANGES *from* ROME.

BOoks and Accounts are kept in Crowns, Julios, and Bajoches, or in Crowns, Soldi, and Denari d'Or.—A Crown is 10 Julios, and a Julio 10 Bajoches, or 20 Soldi, and a Soldi 12 Denari.—Some keep their Accounts in Crowns, Julios, Grains, and Quatrins, reckoning 4 Quatrins to a Grain, 8 Grains to a Julio, &c.

The Current Coins are, viz.			*s.*	*d.*
A Quartrin			0	$0\frac{51}{288}$
A Bajoche	= $3\frac{1}{5}$	Quatrins	0	$0\frac{11}{18}$
A Grain	= 4	Quatrins	0	$0\frac{55}{72}$
A Julio or Paulo	= 10	Bajoches, or 8 Grains	0	$6\frac{1}{9}$
A Teſtoon	= 3	Julios	1	$6\frac{1}{3}$
A Crown	= 10	Julios	5	$1\frac{1}{9}$
A Piſtole	= 3	Crowns	15	$3\frac{1}{3}$

Goods and Merchandizes are bought and ſold by the Crown of 10 Julios, but the Exchanges are negociated by the ſtampt Crown of 12 Julios, ſo that the Banco or Exchange Money, called d'Ova, or d'Or, is 20 *l. per Cent.* or $\frac{1}{5}$ better than the Current Coin, which may be termed the Agio; but here is alſo another Agio upon the Current Money from about 20 to 60 Julios *per* 100 Crowns, which riſes and falls as the Courſe of Trade varies.

The Par of the Crown of Exchange is 6 *s.* $1\frac{1}{3}$ *d.* nearly, and the Courſe of Exchange is from 65 to 75 *d.* Sterling for the ſtampt Crown.

Exchanges are computed in much the ſame Manner as at Venice; and the following Example ſhews how Crowns Current may be reduced to Banco, and alſo how the Agio may be computed.

In 5420 Crowns, 8 Julios, Agio 55 Julios *per Cent.* or *per* 100 Crowns, how many ſtampt Crowns or Banco.

RULE.—As 100 Crowns of 12 Julios and the Agio, are to 100 Crowns; ſo are the Crowns given to the Anſwer.

OPERATION.

Of NAPLES EXCHANGES.

SEveral Coins are Current in this Kingdom. The principal of their own Current Coins are, viz.

			s.	d.
A Quatrin			0	$0\frac{2}{15}$
A Grain	= 3	Quatrins	0	$0\frac{6}{15}$
A Carlin	= 10	Grains	0	4
A Julio	= 40	Quatrins	0	$5\frac{1}{3}$
A Tarin	= 2	Carlins	0	8
A Teſtoon	= 2	Tarins, 3 Julios, or Paulos	1	4
A Ducat	= 10	Carlins, or 5 Tarins	3	4
A Piſtole	= $4\frac{1}{2}$	Ducats, or 45 Carlins	15	0

They keep their Accounts in Ducats, Tarins, and Grains; and Exchanges are negociated by the Ducat of 10 Carlins.—England gives from 35 to 45 *d.* Sterling for the Ducat, according to the Courſe of Exchange.

The Par of the Bank Ducat is 40,32 *d.* or $40\frac{1}{2}$ *d.* nearly; and every Farthing that is given more or leſs for it, is 12 *s.* $4\frac{1}{4}$ *d. per Cent.* Gain or Loſs.—Exchanges from this Place are negociated as thoſe from Leghorn.

Of FLORENCE EXCHANGES.

BOoks and Accounts are kept in Crowns, Soldi, and Denari, Picoli, or Current Money of the Place, reckoning 20 Soldi to a Crown, and 12 Deniers to a Soldi,

The

The Current Coins are, viz.

			s.	*d.*
A Quatrin			0	$0\frac{517}{3600}$
A Sol	=		0	$0\frac{517}{1200}$
A Draca or Grain	=	5 Quatrins	0	$0\frac{517}{720}$
A Julio	=	8 Grains	0	$5\frac{67}{90}$
A Livre	=	12 Grains, or $1\frac{1}{2}$ Julios	0	$8\frac{37}{60}$
A Teſtoon	=	2 Lires, or 3 Julios	1	$5\frac{7}{30}$
A Crown	=	$7\frac{1}{2}$ Lires, or 150 Soldi	5	$4\frac{5}{8}$
A Piſtole	=	21 Lires	15	$0\frac{19}{20}$

Some keep their Accounts in Livres, Sols, and Deniers of the Livre; ſo that Sols and Deniers of the Crown are $7\frac{1}{2}$ Times better than thoſe of the Livre.

Exchanges are negociated by the Crown of 150 Soldi or Sols of the Livre, and England gives an uncertain Number of Pence and Parts for it; the Courſe being from 60 to 70 *d.* Sterling *per* Crown.

The intrinſic or Par of the Crown of $7\frac{1}{2}$ Livres is 5 *s.* $4\frac{5}{8}$ *d.* and every Farthing that is given more or leſs for it is 7 *s.* $8\frac{3}{4}$ *d per Cent.* Gain or Loſs.—The Method of computing the Exchanges is ſimilar to that from Leghorn, or Genoa.

Of MILAN EXCHANGES.

AT this Place many Sorts of Money are Current, but their own Species are Livres, Sols, and Deniers, and Accounts are kept in thoſe Species: They are reckoned as Pounds, Shillings, and Pence.

Exchanges are negociated by the Ecu, Crown, or Ducat of 117 Sols; but the Current Crown is only 115 Sols, or $5\frac{3}{4}$ Livres. The Current Money of this Place is called Imperial, and the Bank Money d'Or, or Ova.

The Par of the Ducat of Exchange is 55 *d.* nearly; and Exchanges are negociated as from Leghorn, the Courſe being from 50 to 60 *d.* Sterling *per* Ducat or Crown.

Of

Of BOLOGNA EXCHANGES.

ACcounts are kept in Livres, Soldi, and Denari, reckoned as Pounds, Shillings and Pence.

Their Current Coins are, viz.		s.	d.
A Quatrin	—— —— ——	0	$0\frac{1}{10}$
A Bajoche	= 6 Quatrins	0	$0\frac{3}{5}$
A Julio	= 10 Bajoches	0	6
A Livre	= 20 Bajoches, or 2 Julios	1	0
A Teſtoon	= 3 Julios	1	6
A Piaſtre or Dollar	$= 4\frac{1}{4}$ Livres	4	3
A Ducat	$= 5\frac{1}{4}$ Livres	5	3
A Piſtole	$= 15\frac{1}{2}$ ditto	15	6

Beſides many Coins of France, Spain, and the Empire paſs here.

Exchanges are negociated by the Dollar of 85 Soldi, or $4\frac{1}{4}$ Livres; the Par is 51 *d. per* Dollar, —England giving from 48 to 56 *d.* Sterling for it, according to the Courſe of Exchange.

At PARMA, Accounts are kept in Crowns, Soldi, and Denari, reckoning by 20 and 12. The Crown of Exchange is accounted at 4 Lires, with an unſettled Premium with the other Places in Italy, &c.

At MODENA many foreign Coins paſs; they keep their Accounts in Livres, Soldi, and Denari, and the Ducat of Exchange is reckoned 5 Livres.

At MANTUA they have the like Species; and Accounts are kept, and Exchanges negociated in the ſame Manner as at Modena.

At FERRARA and ANCONIA, Accounts are kept, and the Species the ſame, as at Rome; and Exchanges are negociated in the like Manner by the Crown of 12 Julios.

At LUCCA Accounts are kept in Livres, Soldi, and Denari d'Or, and the Crown is $7\frac{1}{2}$ Livres d'Or.——Exchanges are negociated by the ſaid Crown of $7\frac{1}{2}$ Livres, $= 65\frac{10}{31}$ *d.* and here the Piaſtre of Leghorn is worth $6\frac{1}{5}$ Livres.

At

At BERGAMO many foreign Coins are current, and they keep their Accounts in Livres, Soldi, and Denari. The Ducat or Crown of Exchange is reckoned at 7 Livres = 7 *s.*

At NOVI, Accounts are kept, and Exchanges negociated in the ſame Manner as at Genoa.

At SAVOY and PIEDMONT the Species are Madonines or Piſtoles of Savoy, worth 13 Livres, Ducatoons of 7 Florins, or 84 Soldi.—A Crown is 3 Livres 12 Soldi, and the Soldi 4 Quatrins or Lairds.—Accounts are kept in Livres, or Lires, Soldi, and Quatrins; and Exchanges to or from this Place are made by the Ducatoon of $4\frac{1}{4}$ Lires, or 84 Soldi.

At GENEVA, the Gold Coins are Piſtoles and Ducats; thoſe of Silver are Crowns of 10 Florins 6 Sols, or 3 Livres; and thoſe of Copper are Pieces of 1 and 2 Florins, of 6, 3, 2, and 1 Sol, and of 9 and 6 Deniers of Geneva.—Exchanges are negociated at this Place, as in France, by the Crown of 3 Livres *Tournois*. A Livre is 20 Sols, and a Sol 12 Deniers.—A Geneva Florin is $5\frac{2}{3}$ Sols = 3 *d.* nearly: A Piſtole is $11\frac{1}{2}$ Livres: A Ducat 6 Livres 6 Sols.—The Manner of exchanging is much the ſame at this Place as from France, and the Par is alſo the ſame.

EXCHANGES *from the* ISLANDS *of* ITALY.

IN SICILY the Coins are much like thoſe of Naples, and Accounts are kept in the ſame Manner as at Naples.——In their Coins 6 Picoli make a Grain, 8 Picoli a Ponti, 10 Grains a Carlin, 2 Carlins a Tarin, 12 Carlins a Florin, 13 Tarins a Ducat, and 12 Tarins a current Crown.—A Tarin is only 5 *d.* here, ſo the Par of the Crown of 12 Tarins, by which Exchanges are negociated, will be 5 *s.* England giving an uncertain Number of Pence and Parts for the ſaid Crown.

At

At MALTA, Accounts are kept as in Sicily, and Naples; their Money is of Silver, and Copper, or Braſs, and the latter is the current Species.—In all Negociations of Purchaſes or Sales, it is always ſtipulated that Payment be made in Silver or Braſs Money, the former being eſteemed 50 *l. per Cent.* better than the other.——In their Coins 6 Picoli make a Grain, 10 Grains a Carlin, 2 Carlins a Tarin, a Deci Tarini, or Ducat 10 Carlins; beſides which, many foreign Coins are current on the Iſland.——Exchanges are negociated by the Ducat or Crown, as at Naples or Sicily.

At SARDINIA, Accounts are kept as in moſt Places of Italy, in Livres, Soldi, and Denari. The Dollar (or Piece of Eight of Spain) is worth $9\frac{1}{5}$ Rials, and the Rial 15 Soldi, Sardinia Money. The Livre is 20 Soldi; ſo that the Dollar or Piaſtre is valued at 6 Livres 18 Soldi, or 138 Soldi, that Iſland's Currency.—Exchanges are negociated by the Piaſtre or Dollar of $6\frac{9}{10}$ Livres, or 138 Soldi; and the Par of it is 3*s.* 7 *d.*

In CANDIA the ſame Coins are in Uſe, and the ſame Method of Accounts practiſed as at Venice: And the ſame are in Uſe and practiſed in the Iſland of MOREA.

Of EXCHANGES *from* GERMANY, *and* SWITZERLAND.

THough Exchanges from Germany and Switzerland are generally negociated by Way of Holland or Hamburgh, as before obſerved, yet as Exchanges from thoſe Places are ſometimes made directly to England; the Methods by which they are calculated when made in the direct Manner, are here inſerted, and are as follow, viz.

1. By the Rix-dollar of the Empire, Holland or Hamburgh, for which England gives from 50 to

to 58 *d.* according to the Courſe of Exchange: The Par being 4 *s.* 6 *d. per* Rix-dollar: Or by the Guilder or Florin, the Par of which runs from 3 *s.* to 3 *s* 6 *d.*

2. By a Number of Rix-dollars for 100 *l.* Sterl. where the Par of the Dollar is from 3 *s.* 6 *d.* to 4 *s.*—The Courſe of Exchange is from 540 to 600 Dollars for 100 *l.*—This being the Price of Exchange, the Sums to be exchanged muſt be equated from the ſaid Proportion.

N. B. When the Exchange is made by the Rix-dollar, 'tis generally rated by a Number of Pence and Parts Sterling, *per* Rix-dollar: If otherwiſe, the Price of Exchange is rated by an uncertain Number of Rix-dollars for 100 *l.* viz. from 430 to 460, or ſo,—the Par being $444\frac{4}{9}$ for 100 *l.*—[*See the Examples at the End of German Exchanges.*]

EXCHANGES *from* VIENNA.

ACcounts are kept here in Guilders, Cruitzers, and Penins or Deniers, reckoning 8 Penins to a Cruitzer, and 60 Cruitzers to a Guilder.—Many foreign Coins are current,—and their own are called the Imperial; the principal of which are, viz.

		s.	*d.*
A Penin or Denier	———	0	$0\frac{7}{120}$
A Dryer	= 6 Penins	0	$0\frac{21}{60}$
A Cruitzer	= 8 Penins	0	$0\frac{7}{15}$
A Patre	= 4 Cruitzers	0	$1\frac{13}{15}$
A Groſs	= $3\frac{1}{4}$ Cruitzers, or 26 Penins	0	$1\frac{31}{60}$
A Schilling	= 10 Dryers or $7\frac{1}{2}$ Cruitzers	0	$3\frac{1}{2}$
A Guilder	= 60 Cruitzers or 8 Schillings	2	4
A Rix-dollar	= 2 Guilders or Florins	4	8
A Ducat	= 4 Guilders	9	4

Beſides they have imaginary Rix-dollars of $1\frac{1}{2}$ and of 1 Guilder, or of 90 and 60 Cruitzers.

Exchanges are negociated by the Rix-dollar, and England gives commonly from 52 to 58 *d.* for it in the Courſe of Exchange.—The Par of the Rix-dollar of this Place is 4 *s.* 8 *d.*—and every Farthing that is given more or leſs for it is 8 *s.* $11\frac{1}{8}$ *d. per Cent.* Loſs or Gain. The

The Par with Holland is 52 Stivers nearly per Rix-dollar.

EXCHANGES *from* AUSBURGH.

IN this Place they keep their Accounts, and reckon their Monies in much the ſame Manner as they do at Vienna. When Exchanges are negociated directly to or from this Place, they are rated by the Rix-dollar of 90 Cruitzers, or by the Florin of 60.—The Par of the Florin is 3 *s.* $1\frac{1}{3}$ *d.*—and the Par with Holland is a Rix-dollar for about 52 Stivers of Amſterdam, allowing a Premium in Exchanges.

EXCHANGES *from* FRANCFORT.

AT this Place the Guilder, Gould, or Florin, is the ſame as at Vienna, viz. 1 Guilder is 60 Cruitzers, and 1 Cruitzer 8 Hellers, or 4 Penins only. They alſo reckon 4 Cruitzers to a Batzen, and 15 Batzens to a Guilder, or 15 Cruitzers to an Ort, and 4 Orts to a Guilder.——Two Guilders make a Rix-dollar of 4 *s.* 8 *d.* Current, and a Guilder is 2 *s.* 4 *d.* ditto —Books and Accounts at this Place are uſually kept in Guilders, Cruitzers, and Deniers, reckoning 4 Deniers or Penins to a Cruitzer.

Exchanges are negociated by the Guilder or Florin of 60 Cruitzers, or by the imaginary Florin of 65 moſt commonly. The Money of Exchange is $\frac{2}{9}$ better than the current Specie very nearly, and the current Money $\frac{2}{7}$ worſe than the Exchange Money; ſo that the Par of the Florin of 60 Cruitzers of Exchange will be 3 *s.* and that of 65, 3 *s.* 3 *d.*—Bills from England or Holland are always paid in Guilders of Francfort, which are reckoned from 6 to 10 *per Cent.* better than current Money,—ſo that the Guilder of Exchange of 65 Cruitzers is $79\frac{4}{9}$ Current, and but $72\frac{2}{9}$ to 75 nearly, of Francfort.

The Par of the Florin is 39 *d.* and every Farthing that is given more or leſs for it, is 12 *s.* $9\frac{3}{4}$ *d.*

per Cent. Gain or Loſs.—The Courſe runs from 38 to about 44 *d. per* Florin.—The Par with Holland is 3 Florins of 60 Cruitzers for 2 Rix-dollars of Amſterdam.

EXCHANGES *from* NOREMBURGH.

ACcounts are kept here in Guilders, Cruitzers, and Hellers, as at Francfort, and their Coins are much the ſame as thoſe uſed at Francfort.—The Rix-dollar of 90 Cruitzers is 4 *s.* 6 *d.* here, and the Florin of 60=3 *s.* Sterling. The Rix-dollar is divided into 22½ Batzen, or 30 Imperial Groſs. A thick Dollar is 1⅔ Florins, or 25 Batzen, or 100 Cruitzers.

A Florin is alſo divided into 20 Imperial Groſs, or 15 Batzen.——A Groſs is 3 Cruitzers, or 12 Pence, and a Batzen is 4 Cruitzers, or 16 Pence or Penins.——When any direct Exchange is made to or from this Place, it is negociated by the Rix-dollar.——The Par with Holland is one Florin of 65 Cruitzers for 72⅔ Groots or Pence of Amſterdam.

EXCHANGES *from* BREMEN.

AT this Place Accounts are kept in Rix-dollars and Groſs, reckoning 72 Groſs to a Rix dollar.

Of their Coins, 2 Penins make a Swaar, and 5 Swaars make 1 Groſs, 3 Groſs a double Schilling, 48 Groſs a double Mark, or Head Piece of 240 Swaars, 3 Marks (or 24 double Schillings) a Rix-dollar.

The Par of the Rix-dollar of this Place is 3 *s.* 6 *d.* nearly, and Exchanges are negociated with England by the ſaid Rix-dollar, rated by an uncertain Number of Dollars for 100 *l.* Sterling, from which the Value of the whole Exchange is computed.—The Courſe of Exchange from this Place runs from about 540 to 570 Dollars for 100 *l.* Sterling.

This

This Place commonly gives Holland from 128 to 130 Rix-dollars for 100 Rix-dollars Banco of Amſterdam; and the Par is 1 Rix-dollar for 77½ Groots of Amſterdam.

EXCHANGES *from* BRESLAU.

ACcounts are kept at this Place in Rix-dollars, Imperial or Silver Groſs, and Penins, and they reckon 30 Groſs to a Rix-dollar, and 12 Penins to a Groſs.—The Rix-dollar is alſo divided into 90 Cruitzers, and each Cruitzer into 4 Penins, and Rix-dollars are called Imperial augmented by 17 Cruitzers.

One Imperial is 1½ White Groſs, 3 Cruitzers, or 6 Dryers; a Cruitzer is 4 Penins, and a Groſhen or Groſs 3 Penins, and a Dryer 2.

A Slitch Dollar is imaginary, and is 72 Cruitzers or 24 Silver Groſhen.

The Par of the Rix-dollar of this Place is 3 *s.* 3 *d.* nearly, and Exchanges are negociated with England by an uncertain Number of Rix-dollars for 100 *l.* Sterling,—and with Holland by about 138 to 140 for 100 Rix-dollars Banco of Amſterdam.——The Par with Holland is 1 Rix-dollar for 36 Stivers of Amſterdam.

EXCHANGES *from* LEIPSIC, NAUMBURGH, DRESDEN, *&c. in* SAXONY.

IN theſe Places Accounts are kept in Rix-dollars or Crowns; double Marien Groſs, and Penins or Deniers, reckoning 24 Groſs to a Rix-dollar, and 12 Penins to a Groſs.—The ſaid Dollar is 1½ Guilder, and the Guilder is 16 Groſs. A Ducat is 4 Guilders or 2⅔ Rix-dollars. Beſides which they have 8, 4, 2, 1½, and 1¼ Groſs Pieces; and ſome ſtill ſmaller, of 9, 8, 6, 4, and 3 Penins or Phennings.

The Par of the Rix-dollar is 4 *s.* 6 *d.* by which Exchanges are negociated.—But it muſt be obſerved that their Money of Exchange is between 10 and 20 *per Cent.* better than their current Money; and of all Bills that are drawn upon theſe Places for current Money, they pay three Quarters of the Sum in 4 Groſs Pieces, and the other Quarter in Groſs Pieces, this being called their current Money.—Bills that are drawn for Money of Exchange are always paid in Rix-dollars, commonly called Crowns: But Bills of Parcels and Notes of Hand are paid in current or Groſs Money.

The Par of theſe Places with Holland is 2 Rix-dollars for 5 Guilders of Amſterdam; and the Courſe of Exchange is from 140 to 156 Florins for 100 Rix-dollars Banco of Amſterdam.

At Dreſden the Rix-dollar is divided into 2 Guilders, and into 32 Good and 48 MarienGroſs, Accounts being kept in Guilders, Marien Groſs, and Penins, reckoned by 24 and 8. A Penin is divided into two Hellers; $1\frac{1}{2}$ Penin make a Dryer-Heller, and 3 a Dryer.—At ſome Places in Saxony, the Rix-dollar is valued at 4 *s.* 8 *d. Ster.*

EXCHANGES *from* BERLIN.

IN this City, and in moſt Parts of the Kingdom of Pruſſia, Accounts are kept in Florins, Groſs, and Penins or Pence; and they reckon 18 Pence to a Groſs, and 30 Groſs to a Guilder. A Rix-dollar is 3 Guilders; a Florin is alſo divided into 20 Brimmers.—A Rix dollar is alſo 5 Orts, and an Ort 18 Groſs;—a Brimmer or Abraſe is $1\frac{1}{2}$ Groſs;—1 Groſs is 2 Polchin, or 18 Pence; a Sol or Schilling, is 6 Pence;—a Polchin 9 Pence;—an imaginary Mark is 20 Groſs;—a Croſs Dollar is 3 Florins, 16 Groſs; and a Specie Dollar 3 Florins, 18 Groſs. Theſe two ſometimes give an Agio of 10 or 15 *per Cent.*

The Par of the Rix-dollar, by which the Reſt may be equated, is juſt about 4 *s.*—Exchanges are negociated by the ſaid Rix dollar, England giving

an

an uncertain Number of Pence and Parts for it, according to the Courſe of Exchange, which commonly runs from about 45 to 50 *d.* per Dollar.

The Par with Holland is 1 Rix-dollar for about 44 Stivers of Amſterdam; and the Courſe is from 40 to 48 per Rix dollar, or from about 110 to 120 Rix-dollars for 100 of Amſterdam.

Of LUBEC EXCHANGES.

AT this Place Accounts are kept in Marks, Schillings, and Denier Lubs, reckoning 16 Schillings to a Mark, and 12 Deniers, or Penins to a Schilling. Exchanges are negociated by the Mark as at Hamburgh, the Par being 1 *s.* 6 *d. per* Mark; and the Par with Holland is 3 Marks for 1 Rix-dollar of Amſterdam.

Of STETIN EXCHANGES.

IN this Place Accounts are kept in Marks, Schillings, and Deniers, reckoning here only 12 Schillings to a Mark, and 12 Deniers to a Schilling.——Exchanges are negociated by the Mark. the Par of which is 1 *s.* 6 *d.* Sterling; and the Par with Holland is 3 Marks for a Rix-dollar of Amſterdam.—A Rix-dollar is 36 Schillings, or 3 Marks; and Exchanges are ſometimes negociated by it.

Of BRUNSWIC *and* OSNABURGH EXCHANGES.

ACcounts are kept in thoſe Places in Rix-dollars, Marien Groſs, and Penins, reckoning 36 Marien Groſs to a Rix-dollar, and 8 Penins to a Marien Groſs.—Exchanges are negociated by the Rix-dollar, the Par of which is 4 *s.* 6 *d.* and the Par with Holland is a Rix-dollar for a Rix-dollar of Amſterdam.

Of EMBDEN EXCHANGES.

ACcounts are kept here in Guilders (or Florins) Stivers, and Deniers, reckoning 20 Stivers to a Guilder, and 16 Deniers to a Stiver. A Rix-dollar, by which Exchanges are negociated, is 54 Stivers, or $2\frac{7}{10}$ Guilders, here: The Par of it is about 3 *s.* 6 *d* and the Par with Holland is one Rix-dollar for about 40 Stivers of Amsterdam.——Exchanges with England are rated by a Number of Rix-dollars for 100 *l.* Sterling; or by an uncertain Number of Pence and Parts for a Rix-Dollar; and they exchange with Holland Rix-dollar for Rix dollar, or Florin for Florin, allowing a considerable Premium per Cent.

Of COLOGN EXCHANGES.

THE Rix-dollar is here divided into 78 Albusses; and Accounts are kept in Rix-dollars, Albusses, and Deniers, 12 making an Albus.—The Albus is also divided into 2 Cruitzers and the Cruitzer into 4 Hellers.—There are also Bussarts of 4 Albusses,—Guilders of 24, and Dollars of 50 Albusses.—The Par of the Rix-dollar is 4 *s.* 6 *d.* Sterling, by which Exchanges are negociated.—They exchange with Holland Rix-dollar for Rix-dollar, at a fluctuating Premium.

In some Parts of this Bishoprick they divide the Guilder into 40 Stivers, and each Stiver into 8 Duytes, (in which they keep their Accounts) 6 Duytes making an Albus, and $1\frac{1}{3}$ Albus a Stiver; so that the Rix-dollar, by this Way of reckoning will be $106\frac{2}{3}$ Albusses, or 80 Stivers, or 2 Guilders.

Of LIEGE EXCHANGES.

AT this Place Accounts are kept in Livres Schillings and Penins, reckoning 20 Schillings to a Livre, and 12 Penins to a Schilling.—The Rix-dollar of this Place is 4 Livres, b

whi

which Exchanges are negociated.—The Par is 4 *s.* 6 *d.* Sterling, and at Amſterdam 50 Stivers, or a Rix-dollar Banco.——Exchanges with Holland are often made by giving a Livre for a Current Guilder.

Of STRASBURGH EXCHANGES.

IN this Place Accounts are kept in Rix-dollars, and Cruitzers, reckoning 90 Cruitzers to a Rix dollar; or in Florins and Cruitzers, reckoned 60 Cruitzers to a Florin,—and by ſome in Livres, Sols, and Deniers, reckoned as Pounds, Shillings, and Pence.—A Rix-dollar is 1½ Guilders, 15 Schillings, 3 Livres, or 60 Sols; a Guilder is 2 Livres, or 10 Schillings; a Livre is 20 Sols, 5 Schillings, or 30 Cruitzers; a Schilling is 6 Cruitzers, or 4 Sols.

Exchanges from this Place are negociated with moſt Places in the Silver of Alſace, which is the ſame with the Silver of France, and the Par of the Rix-dollar is reckoned 4 *s.* 6 *d.* Sterling, or about 110 Sols of France. The Agio is 1 to 2 *per Cent.* commonly. The Par with Holland is a Rix-dollar, or Crown, for a Rix-dollar of Amſterdam.

EXAMPLES *for* GERMANY.

HOW much will a Bill of Parcels for Goods bought in Saxony, of 5676 Rix-dollars, and 18 Groſs, Exchange at 52⅝ *d.* *per* Rix-dollar, amount to in Sterling Money?

EXCHANGES *from* SWITZERLAND.

MAny Sorts of Money are current in the Cantons of Switzerland, as well as in the Empire; and as St Gall, Bazil, Zurich, and Bolenna are the principal Places of Trade and Exchange, ſuch Coins as are current at thoſe Places, are more or leſs ſo in all the Cantons.——And firſt,

Of EXCHANGES *from* ST GALL.

AT this Place Accounts are kept in Florins, Cruitzers, and Phennings, St Gall Money; or in Florins, Cruitzers, and Penins of the Money of the Empire, reckoned by 60 and 4.

A Rix-dollar is reckoned 17 Schillings, or 102 Cruitzers, St Gall Money.

A Gould, or Florin, is 10 Schillings, or 60 Cruitzers, and a Cruitzer is 4 Phennings; a Schilling is 6 Cruitzers. The Florin is alſo divided into 12 Good and 15 Current Batzen; and a Good Batzen goes at 5 Cruitzers, and the common one at 4. The Par of the Rix-dollar is 4*s.* 6*d.* and that of the Florin 2*s.* $7\frac{13}{17}d.$—Exchanges from this Place are confined moſtly to Venice, Vienna, and ſome other Places in Germany and France. They are commonly negociated by the Florin of 60 Cruitzers.

Of BAZIL EXCHANGES.

IN this Canton Accounts are kept in ſundry Manners; ſome keep them in Rix-dollars, Schillings, and Deniers, reckoned by 20 and 12; ſome

ſome in Livres, Sols, and Deniers, reckoned alſo by 20 and 12; by others in Rix-dollars, Cruitzers, and Penins, reckoned by 108 and 4; and by ſome others in Florins, Cruitzers, and Pfennings, reckoned by 60 and 4.

A Rix-dollar is 3 Livres, or 20 *d.* Gold, or 60 *d.* common, or 108 Cruitzers; a Livre is 20 *d.* common, or 36 Cruitzers; a Florin is 60 Cruitzers, and a Sol 12 Deniers.

The Rix-dollar is alſo divided into 27 good Batzen, and the good Guilder into 15. The good Batzen is 10 Raps, or 4 Cruitzers. The Guilder of the Empire is here worth 25 Schillings or Plapperts, or 20 Groſs. The Groſs is $7\frac{1}{2}$ Raps, and the Plappert 6 Raps.

The Par of the Rix-dollar of 108 Cruitzers, is reckoned 4 *s.* 6 *d.* by which the Exchanges of this Place are negociated.

Of ZURICH EXCHANGES.

AT this Place Accounts are kept in Florins, Cruitzers, and Hellers, reckoned by 60 and 8; or in Rix-dollars, Cruitzers, and Hellers, reckoned by 108 and 8.

A Rix-dollar is $1\frac{4}{5}$ Florins, 24 good, or $28\frac{4}{5}$ common Batzen, or 72 Schillings, or 108 Cruitzers.

The Florin is $13\frac{1}{3}$ good Batzen, or 16 common, or 40 Schillings, or 60 Cruitzers;—a good Batzen is 3 Schillings, and a common one $2\frac{1}{2}$.—Exchanges from this Place are negociated by the Rix-dollar, or Florin; the Par of the Rix-dollar being 4 *s.* 6 *d.* and that of the Florin 2 *s.* 6 *d.*

Of BOLSENNA EXCHANGES.

ACcounts are kept at this Place in Rix-dollars, and Cruitzers, or in Florins, Cruitzers, and Hellers, reckoned by 90, or 60 and 8. This is a conſiderable Place of Exchange, and it gives an uncertain Number of Cruitzers to moſt Places for

a

Rix-dollar, or a Crown, &c. of the ſaid Places eſpectively.

The Rix-dollars here are of two Sorts, viz. of o and 93 Cruitzers.—The Dollar of Exchange f 90 Cruitzers is nearly on a Par with 74 Cruitrs of Exchange of Francfort; and the Florin of o Cruitzers is made uſe of in ſome Exchanges rom this Place.—The Par of the Dollar is about . 8 *d.* that of the Florin 2 *s.* 6 *d.* nearly, and at of the Cruitzer is about a Half-penny.

EXCHANGES *from* DENMARK *and* NORWAY.

IN theſe Countries, Books and Accounts are kept in Marks and Schillings, reckoning 16 chillings to a Mark; or in Rix-dollars, Marks, nd Schillings, reckoned by 6 and 16.

The Current Coins are, viz.

			s.	*d.*
Penin			0	$0\frac{3}{16}$
Daniſh Schilling	= 3 Penins		0	$0\frac{9}{16}$
Schilling-Lub	= 2 Daniſh Schillings		0	$1\frac{1}{8}$
Mark	= 16 Dan. Schillings		0	9
Rix-Mark	= $1\frac{1}{4}$ Mark		0	$11\frac{1}{4}$
Rix-Ort	= $1\frac{1}{5}$ Rix-Mark		1	$1\frac{1}{2}$
Dollar or Crown	= $2\frac{2}{3}$ Rix-Orts, or 4 Marks		3	0
Rix-Dollar	= $1\frac{1}{2}$ Dollars, 6 Marks or 4 Orts		4	6
Double ditto	= $1\frac{1}{3}$ Rix-dollars		6	0

Exchanges are negociated by the Rix-dollar of Marks. The Par of it is 4 *s.* 6 *d.* and England gives Pence and Parts for it, from 45 to about 56 in the Courſe of Exchange.

The Rix-dollar is reckoned on a Par with the urrent Rix-dollar of Holland or Hamburgh, and the Courſe of Exchange they allow a conſiderble Premium on their Rix-dollars, to receive in Amſter-

Amſterdam Rix-dollars Banco, or they give Crowns, or Dollars, to have in Amſterdam 2 Rix dollars, and allow a Premium.

Of EXCHANGES *from* SWEDEN.

AT Stockholm, and the reſt of Sweden, Accounts are kept in Copper Dollars, and Runſticks or Orts, reckoning 32 Orts to a Dollar or in Copper Rix-dollars, Copper Dollars, and Runſticks, reckoning 6 Copper Dollars to a Copper Rix dollar, and 32 Runſticks to a Copper Dollar.

A Rix-dollar is 4 Carolines, 12 Silver or 36 Copper Marks, 96 Ores, 288 Orts or Runſticks, or 576 Farthings. A Copper Dollar is 10⅔ Whittens, 32 Runſticks, or 64 Farthings; the Ort or Runſtick is imaginary.

A Copper Rix-dollar is 64 Whittens, or Ores, or 192 Runſticks: And the Silver Dollar is equal to half the Number of each Subdiviſion thereof reſpectively.

The Current Coins are, viz.		s.	d.
A Runſtick, or Ort	= 2 Farthings	0	0 7/36
An Ore or Whitten	= 6 Farthings, or 3 Orts	0	0 7/12
A Copper Mark	= 2⅔ Ores, or 8 Orts	0	1 5/9
A Silver Mark	= 3 Copper Marks	0	4⅔
A Copper Dollar	= 4 Copper Marks or 1⅓ Silver ditto	0	6⅔
A Caroline	= 3 Silver, or 9 Copper Marks	1	2
A Silver Dollar	= 3 Copper Dollars	1	6⅔
A Copper Rix-dol.	= 6 ditto, or 24 Marks	3	1⅓
A Rix-dollar	= 3 Silver ditto	4	8

The Duty of all Goods exported muſt be paid in Silver Dollars, and the Duty of all Goods imported in Copper Rix-dollars.

Exchanges are negociated with Holland, or Hamburgh, by the Cop. Mark; the Par of which is 1 5/9 *d.* or rather better than Three Half-pence Engliſh

ngliſh; and in the Courſe of Exchange, they ive from 30 to about 48 Copper Marks for a ix-dollar in Specie of thoſe Places. The Par is $4\frac{5}{7}$, and every Mark that is given more or leſs the Price of Exchange, is 18 Guilders, $13\frac{1}{3}$ tivers Current, *per Cent.* Flemiſh, Loſs or Gain. Exchanges are alſo negociated by the Copper Rix-ollar of 24 Marks, for the Current Rix-dollar of Holland, allowing a conſiderable Premium.

When Exchanges are made directly to England, they are rated by an uncertain Number of Copper Dollars for a Pound Sterling. The Par $38\frac{4}{7}$ for a Pound. The Courſe is commonly rom 40 to 50 Dollars *per* Pound; and every Dollar that is given more or leſs *per* Pound in the Price of Exchange than $38\frac{4}{7}$, is 2 *l.* 11 *s.* $10\frac{2}{9}$ *d.* *per Cent.* Gain or Loſs.

EXCHANGES *from* POLAND.

DAntzic and Koningſberg are the principal Places of Trade in this Kingdom; yet as Cracow is the capital City, and as the Coins there differ in Value from thoſe at the Places abovementioned, as well in the Current Species, as in Monies of Exchange, it may not be improper to begin with them; but it muſt be remembered that the Exchange from Dantzic generally governs the reſt in this Kingdom.

At Cracow, the Capital of this Kingdom, Accounts are moſtly kept in Florins, Poliſh or Double Groſs, and Deniers, reckoned by 3 and 18, as at Berlin; yet ſome keep them in Rix-dollars, and double Groſs, reckoning 90 Groſs to a Rix-dollar.

The Current Coins are, viz.			s.	d.
A Denier	——	——	0	$0\frac{6}{7}$
A Shelon	= 6 Deniers	——	0	$0\frac{1}{7}$
A Groſs	= 3 Shelons	——	0	$0\frac{3}{7}$
A Penny	= $1\frac{1}{2}$ Groſs	——	0	$0\frac{8}{7}$
A Tinſe	= 30 Groſs	——	0	9
An Ort	= 36 Do. or 18 double Do.		0	$10\frac{4}{7}$
A Florin	= 2 Tinſes	——	1	6
A Rix-dollar	= 3 Florins, or 90 double Groſs		4	6
A Ducat	= 6 Florins	——	9	0

The Rix-dollar is alſo divided into 5 Orts, and the Ort into 18 Poliſh or double Groſs.——The Florin and double Groſs are imaginary.——The Par of the Rix-dollar of this Place is 4 *s.* 6 *d.* by which Exchanges are negociated with Hamburgh, or Holland, allowing Rix-dollar for Rix-dollar, with a conſiderable Premium.

EXCHANGES *from* DANTZIC, KONINGSBERG, *and* ELBING.

AT thoſe Places Accounts are kept in Florins, Groſhen or Groſs, and Pence, reckoning 30 Groſhen to a Florin, and 12 Pence or Deniers to a Groſhen.—Tho' ſome keep them in Rix-dollars, Groſhen, and Deniers.

The Current Coins are, viz.			s.	d.
A Denier	——	——	0	$0\frac{7}{180}$
A Shelon	= 4 Deniers or Pence		0	$0\frac{7}{45}$
A Groſhen	= 3 Shelons	——	0	$0\frac{7}{15}$
A Couſtic	= 5 Groſhen	——	0	$2\frac{1}{3}$
A Truſe	= 3 Couſtics	——	0	7
An Ort	= 18 Groſhen	——	0	$8\frac{2}{5}$
A Florin, Guil.	= 30 Ditto	——	1	2
A Rix-dollar	= 3 Florins	——	3	6
A Ducat	= 8 Ditto	——	9	4
A Frederic d'Or	= 5 Rix-dollars	—	17	6

Tho

Tho' the Ducat and Frederic d'Or are divided and rated as above, their intrinsic Values are only reckoned at 9 *s.* 2 *d.* and 17 *s.*

A Florin is also divided into 20 Abrasses, 60 Polckens, or half Groshen (90 Shelons, and 360 Deniers).—A Groshen, or Gros, is 12 Deniers, or Pence.

The Par of the Rix-dollar of these Places is 3 *s.* 6 *d.* and Exchanges are mostly negociated with Hamburgh, or Holland, by an uncertain Number of Polish Gros for a Pound Flemish, or a Rix-dollar of those Places; and the Merchants usually reckon what they get above 120 Groshen in Exchange for a Rix-dollar Banco, is so much Profit.

When Exchanges are made directly to England from those Places, they are rated by a Number of Florins for a Pound Sterling.—The Par is $17\frac{1}{7}$ Florins for a Pound; and the Course from 19 to 24.—In general England gets from 20 to 23 allowed *per* Pound Sterling.

EXAMPLE in the direct Manner.

How much will a Quantity of Corn sent from Dantzic, to the Value of 14726 Florins and 16 Groshen, amount to in Sterling Money, Exchange at $20\frac{1}{4}$ Florins for a Pound Sterling?

OPERATION *by the Rule of Three.*

F.		*£.*	*F.*	*G.*
If $20\frac{1}{4}$	:	1	:: 14726	16
4		4	30	
81			441796	
30		4		
2430 *Gr.*	)	1767184	(727	4 $8\frac{1}{2}$ The Anſ.
		Rem. 574	=	4 $8\frac{1}{2}$

When the Exchange is rated in Florins and Parts of a Florin, as in this Case, observe to proceed with the Parts as directed in Page 66, for equating the Parts in whole Numbers.

Exchanges from those Places with Holland are almost always rated by an uncertain Number of Polish Groshen or Gros, for a Pound Flemish of 6 Florins, or 120 Stivers 10 *s.* 9 *d.* $2\frac{2}{3}$

Sterling. The Par with Holland is 277 $\frac{7}{10}$ Groſhen for a Pound Flemiſh Current Money; but as Dantzic always deals with Holland in Banco Money, and the Banco Pound being reckoned worth 7 Guilders Current, the Par will therefore be 324 Groſhen for the ſaid Banco Pound.

The Courſe of Exchange generally runs from 370 to 400; and every 2 Groſhens that are given more or leſs in the Price of Exchange than 324, as aforeſaid, will be 3 Florins, 14 $\frac{6}{81}$ Stivers Banco *per Cent.* Flemiſh, Gain or Loſs with Holland, and 12*s.* 4 *d.* 0$\frac{2}{5}$ Gain or Loſs *per Cent.* Sterling.—See Page 240.

N. B. The Par of the Flemiſh Banco Pound being rather better than ſeven Guilders Current, is one Reaſon why the Courſe generally keeps above the Par of 324 Groſhen, as above, in Favour of Holland.—And in direct Exchanges to England, the Par of the Poliſh Florin may be reckoned near about a ſeventh worſe than Sterling Money, which will reduce the Par of the ſaid Florin to juſt about 1 *s.* Engliſh.—And every Florin above 20, for 1 *l.* Sterling, in the Price of Exchange, may be reckoned 5 *per Cent.* Gain to England, and ſo in Proportion.

KONINGSBERG *and* ELBING.

Theſe Places deal with Holland in Current Money, therefore the Par of the Flemiſh Pound is only 277 $\frac{7}{10}$ Groſhen here.—And the Courſe runs from 260 to 320.—Every 2 Groſhens, more or leſs than the Par, will be 4 Florins, 6$\frac{2}{5}$ Stivers Current *per Cent.* Flemiſh, Gain or Loſs, and 14*s.* 4$\frac{4}{5}$ *d.* *per Cent*, Sterling.

Of RIGA EXCHANGES.

THE Current Coins here are much the ſame as at Cracow, &c. viz.

		s.	*d.*
A black Whitten or Shilling	——	0	$0\frac{1}{10}$
A Whitten, or white Shilling	= 2 black Whittens	0	$0\frac{1}{5}$
A Groſs, or Groſhen	= 3 Whittens	0	$0\frac{3}{5}$
A Vording	= $1\frac{1}{2}$ Groſs, or $4\frac{1}{2}$ Whittens	0	$0\frac{9}{10}$
A Mark	= 6 Groſs	0	$3\frac{3}{5}$
A Guilder, or Florin	= 5 Marks, or 30 Groſs	1	6
A Rix-dollar	= 15 Ditto	4	6

Accounts are kept here in Rix-dollars and Groſhen, reckoning 90 Groſhen to a Rix-dollar, the Par of which is 4 *s.* 6 *d.* and Exchanges are negociated by the ſaid Rix-dollar with Holland, or Hamburgh; and it is always given in Exchanges for the Current Rix-dollar of thoſe Places, or for 50 Stivers; and tho' ſometimes a ſmall Premium be allowed to Holland, that is always added to the Charge of the Goods to make the Exchange certain. If this Place values on Holland or Hamburgh in Bank Money, the Exchange is rated by an uncertain Number of Groſhen for a Rix-dollar Banco; and the Courſe runs to 100 or more *per* Rix-dollar Banco.

If any direct Exchange is made to England, it is rated by an uncertain Number of Pence Engliſh for a Rix-dollar, or by a Number of Groſhen for a Pound Sterling.

Of EXCHANGES *from* REVEL *and* NARVA.

IN thoſe Places Accounts are kept in Rix-dollars and Whittens, reckoning 64 Whittens to a Rix-dollar; or in Copper Rix-dollars and Groſhen, reckoning 90 Groſhen to a Copper,

Specie, or Rix-dollar. The Specie Dollar is reckoned better than the Rix-dollar of 64 Whittens, by 2 or 3 Whittens.

Exchanges are negociated with Holland by giving the Copper Rix dollar of 64 Whittens for a Current Dollar of Amſterdam, allowing a Premium of ſo much *per Cent.*

Revel gives Hamburgh between 60 and 75 Whittens for the Rix-dollar Banco in Exchanges.

They have a Coin called the Albertus, or Croſs Dollar, Pruſſia Money, which they uſually pay to the Ruſſians in Specie, allowing them an Agio of 2 *per Cent.* which makes them of equal Value with the Ruſſian Specie.——The Ruſſians refuſe to take the Swediſh Money in Payment, it being made of much coarſer Silver than their own.

Narva ſometimes gives Holland an uncertain Number of Whittens, between 60 and 70 for the Current Rix-dollar of Amſterdam.

If any direct Exchange is made to England, it is rated by an uncertain Number of Pence and Parts for a Rix-dollar of 64 Whittens. The Par of which is about 4 *s.* 6 *d.* Sterling.

Of EXCHANGES *from* RUSSIA.

IN the trading Parts of this Empire, Accounts are kept in Rubles, Grives, and Moſcoſques, reckoned by 10 and 20; or in Rubles and Copeacks, reckoning 100 Copeacks to a Ruble.

Their Current Coins are, viz.		*s.*	*d.*
A Poluſca	—— ——	0	$0\frac{27}{200}$
A Moſcoſque, or Denuſca = 2 Poluſcas		0	$0\frac{27}{100}$
A Copeack = 2 Moſcoſques		0	$0\frac{27}{50}$
An Altin = 3 Copeacks		0	$1\frac{31}{50}$
A Grive = 10 Copeacks		0	$5\frac{2}{5}$
A Polpoltin = 25 Copeacks		1	$1\frac{1}{2}$
A Poltin = 5 Grives, or 50 Copeacks		2	3
A Dollar = 64 Copeacks		2	$10\frac{14}{25}$
A Ruble = 2 Poltins, or 100 Copeacks		4	6
A Ducat = 2 Rubles		9	0

The

They count their ſmall Money in Altins, adding 1 Copeack at every 33 to make up the Ruble. An Engliſh Crown Piece paſſes by Weight at between 110 and 130 Copeacks.

The Exchanges are negociated by the Ruble, or Copeack.—To Hamburgh they give an uncertain Number of Copeacks for the Rix-dollar Banco, and the Courſe runs from 100 to about 110, or 112.—To Holland, to which almoſt all their Exchanges are confined, they give the Ruble for an uncertain Number of Stivers, Current Money, the Courſe being generally from 45 to 50 *per* Ruble.—Every Stiver more or leſs in the Price of Exchange than 50 *per* Ruble, is 2 *l. per Cent.* Sterling, Gain or Loſs, or 12 Guilders *per* 100 *l.* Flemiſh.

When any direct Exchange is made from this Place to England, 'tis rated by an uncertain Number of Pence and Parts Sterling for a Ruble, the Courſe being from 50 to about 56 *d. per* Ruble.

EXAMPLE in the direct Manner.

How much will a Parcel of Hemp to the Value of 3475 Rubles and 70 Copeacks, amount to in England, Exchange at $52\frac{5}{8}$ *d.* per Ruble?

OPERATION by the *Rule of Three.*

R.	*d.*	*R.*	*C.*

INSTRUCTION I.

The Debtor Side of this Account ſhews the Exchange from Riga to Holland, which as from thence they give Rix-dollar for Rix-dollar; the Riga Money is reduced to Guilders of Holland, as Rix-dollars there are by multiplying them by $2\frac{1}{2}$. As to the Groſhen, (when they occur) they generally throw them into $\frac{1}{2}$, $\frac{1}{4}$, or $\frac{3}{4}$ Dollars at Riga, every 9 being equal to 5 Stivers of Holland.—The Creditor Side of this Account ſhews the Exchange from Holland to England,—firſt the Sum drawn for in Engliſh Money, then the Rate of Exchange, and then the Dutch Money equivalent to the Draught, which may be proved by the preceding Table for Dutch Exchanges. The next Article is the Agio on the Dutch Money, in the Draught, according to the Current Price, which may be found by the Agio Table, Page 66.———In General Accounts like this, the Draught and Agio are commonly included in one Sum of Guilders and Stivers, but with the Advice of each Draught they are kept ſeparate as in this Specimen.

INSTRUCTION II.

The Debtor Side of this Account ſhews the Exchange from Ruſſia to Holland. When 50 Stivers are allowed for a Ruble, the Rubles are reduced to Holland's Currency or Money of Account, by multiplying them by $2\frac{1}{2}$. When any Copeacks occur, they generally throw them into Quarters of a Ruble, or Rix-dollar.—1 Copeack being equal to a Groot, and two to a Stiver of Holland.

When the Exchange runs under 50 Stivers *per* Ruble, ('tis ſeldom above) the Rule of Proportion to reduce the Rubles to Dutch Money muſt ſtand thus: If 1 Ruble be equal to the Stivers and Parts in the Price of Exchange, ſo are the Rubles given, to the Anſwer in Dutch Money.——The Price of Commiſſion and Brokerage are eaſily found by the Rule of Proportion. The Creditor Side of this Account, being ſimilar to that of Riga preceding, needs no further Explication.

Mr

INSTRUCTION. The Left Hand Side of this Account ſhews how Dantzic values on Amſterdam, which is either in Pounds Flemiſh, as above, or in Rix-dollars. The Pounds Flemiſh are reduced to Guilders, Stivers, and Penningens, thus; multiply the Shillings and Pounds by 6, and the Product is Guilders and Stivers, obſerving that every 20 in the Shillings make a Guilder. In the Pence, every 2 make a Stiver, and 1 Penny is 8 Penningens. The Rix-dollars multiplied by 2½ reduces them to Guilders, &c. (ſee Exchanges from Dantzic). The Right Hand Side of the Account is only the common Exchanges from Holland, and may be proved by the preceding Tables for Dutch Exchanges.

Groſs

Groſs or Groſhen are reduced into Pounds Flemiſh, by dividing them by the Number in the Rate of Exchange, and the Remainder multiplied by 20 and 12, and divided each Time by the old Diviſor, will be the Schillings and Pence Flemiſh.

Of EXCHANGES *from* TURKEY, SMYRNA, SCANDEROON, ALEPPO, ALEXANDRETTO, *&c.*

BOoks and Accounts are kept in thoſe Places in Dollars and Aſpers, reckoning 80 Aſpers to a Dollar; or in Sultanes and Aſpers, reckoning 120 to a Sultane.

The principal Coins are, viz.

		s.	*d.*
A Mangrus	—— ——	0	$0\frac{9}{80}$
An Aſper	= 4 Mangruſes	0	$0\frac{9}{20}$
A Parae, or Meiden	= 3 Aſpers	0	$1\frac{7}{20}$
A Beſlic	= $1\frac{2}{3}$ Parae	0	$2\frac{1}{4}$
An Oſlic	= 2 Beſlics	0	$4\frac{1}{2}$
A Solota	= $2\frac{2}{5}$ Oſlics	0	$10\frac{4}{5}$
A Cara Grouch	= 5 Solotas, or 120 Aſpers.	4	6
A Zeriff	= $2\frac{1}{6}$ Cara Grouch	9	9

Several foreign Coins are current at thoſe Places, which paſs by Weight at an uncertain Number of Aſpers.

Exchanges are negociated by the Aſper, or Cara Grouch. The Par of the Cara Grouch is 4 *s.* 6 *d.* and it is given in Exchange for a Spaniſh Seville Dollar, the Peſo or Piaſtre of Leghorn and Genoa, or the Rix-dollar of Germany, Amſterdam, &c. allowing a Premium on the Negociation, as the Courſe of Exchange rules.—But in General Exchanges are rated by an uncertain Number of Aſpers for the Dollar, Peſo, &c.—— In the Courſe of Trade from England, the Merchants commonly buy Dollars in Spain, or Piaſtres

in Italy, which they give in Exchange with thoſe Places, at ſo many Aſpers *per* Dollar, viz. from 120 to about 130 *per* Dollar: And on the contrary are paid for Goods, &c. ſent thither by the Aſper in their own Coins, or in Spaniſh, or Italian Money.

Of EXCHANGES *from* ASIA.

AT all thoſe Places bordering on the Levant they keep their Accounts, and negociate their Exchanges, much in the ſame Manner as in the laſt Article of Turkey, &c. The Price of Exchange being almoſt always rated by an uncertain Number of Aſpers.

Of ARABIA.

THE Larin was formerly the principal Coin current in Aſia, which wanted 8 Sols of the Weight of a Spaniſh Dollar, or Piaſtre of Leghorn, but at preſent they are only current in Arabia.—80 Larins make a Tomon, and the Tomon contains 50 Abuſhes. They have alſo a Dollar which they reckon at 60, and ſometimes at 80 Aſpers; and the Chequin, which is valued at 100 Aſpers, worth about 8 *s.* Sterling.

Of PERSIA.

THE Money of this Empire is as follows: The Abuſhee, divided into 10 Biſti, or 4 Shakees, is valued at about 16 *s.* Sterling; $2\frac{1}{2}$ Shakees make a Larin, and 18 Larins a Tomond; 5 Abuſhees one Or, 10 Ors, or 50 Abuſhees, a Tomond: 14 Shakees, or $3\frac{1}{2}$ Abuſhees, are reckoned to be the Par of a Rix dollar, or 4 *s.* 6 *d.* Sterling.

But the Money moſtly current is as follows, viz. a Marmodree of 2 Shakees; the Abuſhee being 2 Marmodrees, and the Bovello of 12 Abuſhees

hees. They have alſo another Coin called a Caſhahis, which is worth a ſmall Matter more than the Shakee, or 4*d.* Sterling.

Of MOGULSTAN, *or* INDOSTAN.

IN this Empire of the Great Mogul's, the principal Coins are the Rupee of Gold, 2½ Drams and 13 Grains, which is divided into 24 Rupees of Silver, each Silver Rupee being valued at about 30*d.* Sterling. The Pecha is a Copper Coin, valued at a Half-penny; and they have double and quadruple Pieces of this Coin.

At SUMATRA the Coins are the Tale and Mace. The Tale is reckoned worth between 6 and 7 *s.* and the Mace 7 or 8 *d.* Sterling.

At GOA, their Money is moſtly equated by Rees of Portugal, a Zeraphim is valued at 240, a Baſarco 2, and 15 Baſarcos make a Vintin of Portugal. A Tagus is 42 Vintins, 4 Taguſes make a Paru, and 2½ Parues a Pagoda of Gold, worth between 3 and 4 *l.* Sterling.

At COROMANDEL, the Coins are the Pagoda of Silver, conſiſting of 36 Fanams, and the Fanam worth about 3 *d.* Sterling.

At PEQUE, Silver Coins weigh 2½ Drams and 2 Grains, and are valued at 20 Sols 6 Deniers of France; and their little Pieces of Gold, called Fianos, weigh 7 Grains, 15 whereof are valued at about 17½ *d.* Sterling.

At BANTAM, the Coins are Pieces of Copper pinted, having a Hole in the Middle to hang hem on a String, which they call Petties, 1000 hereof go to 5 *s.* Sterling; but the Merchants eep their Accounts in Rials and Dollars Spaniſh, hich paſs Current for all Sorts of Commodities.

At SIAM, the Coin in Gold is a Piece which eighs about 18 Grains more than the half Spaniſh Piſtol, and is counted to be worth about 0 *s.* 7 *d.* Sterling: The Silver Coin is about

the Largeneſs of a Hazle Nut, and is worth about 2 *s.* 5 *d.* Sterling.

Of the EAST INDIES.

AT BENGAL, 12 Pice is 1 Ana, and 16 Anas a Rupee, or 2 *s.* 6 *d.* Sterling.

At BOMBAY, 100 Rees is one Quarter, 4 Quarters is 1 Rupee, 910 Budgrooks is one Rupee, 80 Rees is one Laree, 3 Larees is one Xeraphim, and a Xeraphim is $\frac{3}{5}$ of a Rupee.

At SURAT, 16 Pice is one Ana, and 4 Anas is a Rupee, or 2 *s.* 3 *d.* Sterling.

At ANJENGO, 16 Viz is one Fanam, and $5\frac{1}{2}$ Fanams is one Rupee.

At CALLICUT and TELLICHERY, 16 Vizis is one Fanam, $5\frac{1}{4}$ Fanams is one Rupee, and 5 Tellicher Fanams make a Rupee.

At CARWAR, 6 Pice is one Tuttal, 48 Tuttals one Pagado. An Ickaree Pagado is $8\frac{3}{4}$ *per Cent.* better.

At MOCHA, 7 Carrets one Camaſpee, 60 Camaſhees one Spaniſh Dollar; and 80 Caveers is one Spaniſh Dollar.

At FORT ST GEORGE, 80 Caſh is one Fanam, 36 Fanams is one Pagoda or 9 Shillings Sterling; and 46 Caſh is one Rupee, or 2 *s.* 6 *d.* Sterling.

At BENCOOLEN, 2 Sattellers is one Sooco, 4 Soocos one Real. A Sooco is 15 *d.* Sterling, and a Rial 5 *s.* Sterling.

At CHINA, having no Gold nor Silver coined, they make all their Payments in Lumps of Gold and Silver by Weight, which they denominate by Talents and Meaſure.

In Trade, every Man carries about him a Pair of Sheers to cut and divide the Money, and Scales and Weights to weigh it; and they ac-

ccordingly proportion it to the Value of the Commodities they buy. Their Gold is reckoned to be worth about 3 *l.* 3 *s.* Sterling *per* Ounce. The Coins are, the Caſh, 10 of which make one Canderine, 10 Canderines one Mace, 10 Mace ne Tale, which is 6 *s.* 8 *d.* Sterling; but by Calculation it makes but 6 *s.* 3 *d.* Sterling.

N. B. They weigh all Monies by Dodgins, ike Steelyards, and they take none but good Silver: An Engliſh Crown goes for 8 Mace, and Rupees for one Tale.

A Rupee weighs 3 Mace 1 Canderine and 2 Caſh, but generally 3 Mace 2 Canderine; ſo that f you cut them you will loſe by them.

At JAPAN, their Money is a Piece of Gold, worth about 6 *l.* 11 *s.* 3 *d.* Sterling, and they have another Piece of Gold worth about *l.* 3 *s.* 9 *d.* Sterling, and their Gold is worth bout 63 *s.* Sterling *per* Ounce. Their Silver Pieces are called Ingots, which are of divers Weights, they are worth about 5 *s.* Sterling *per* Ounce: They have a Copper Money which paſſes for one Tale a Piece, and is reckoned to be of about the Value of 3½ Dutch Guilders.

Of EXCHANGES *from* AFRICA.

AT ALEXANDRIA, CAIRO, and all EGYPT, the current Coins of Gold are, viz. a Sultany, a Xeriff, and a Chequin, which are all much of an equal Value, being about 9*s.* 5,95*d.* or 9*s.* 6*d.* each, Sterling. The Silver Coins are Spaniſh Dollars and Meidens of Conſtantinople. The Dollar is reckoned worth 30 Meidens, and the Meiden 3 Aſpers. Exchanges are moſtly negociated by the Aſper.

In thoſe Places Accounts are kept in ſundry Methods. The Natives reckon by Aſpers and Meidens,—the Chriſtians by Aſpers and Dollars of 80 Aſpers. Some reckon by Dollars of Pargo, reckoning 3 Venetian Ducats to one Pargo Dollar. The Italian Ducats are commonly reckoned 10 *per Cent.* worſe than the Venetian Ducats.

At BRACA, TRIPOLY, BARBARY, TUNIS, &c. Accounts are kept in Dollars and Aſpers, reckoning 80 Aſpers to a Dollar. The Gold Coins are the Sultany, the Venetian Chequin, and the Spaniſh Piſtole. And thoſe often vary in their Values according to People's Neceſſities, or to the Plenty or Scarcity of Coin. The Chequin and Sultany ſometimes paſs for 19 Spaniſh, and the Piſtole at 33 Rials, the two former being worth about 9*s.* Sterling each, and the latter about 16*s.*

At ALGIERS, ARGIER, and ORAN, Accounts are kept in Dollars and Aſpers, as in the laſt Article. The Gold Chequin and Sultany at thoſe Places are divided into 9 Doubles, and the Spaniſh Piſtole into 15 or 16. The Silver Dollar or Piaſtre is about 4 Doubles, and a Double is valued at 2 Rials, or 20 Aſpers. Moſt of the Spaniſh Coins paſs Current at thoſe Places at an uncertain Number of Aſpers,

At SALLEE, Accounts are kept in Blankhills and Fluces, reckoning 20 Fluces to a Blankhill.

The

The Blankhill is valued to 2*d.* Sterling, or rather more; it is a ſmall Silver Coin, and the Fluce is a Copper one. They have a Ducat of Gold, valued at 48 Blankhills, or about 9*s.* Sterling. The Gold and Silver Coins of all Nations paſs Current here at ſo many Blankhills and Fluces.

At FEZ and MOROCCO, they keep their Accounts in Ducats (or Zeriffs) and Eighths. The Ducat is valued at about 9*s.* Sterling, and in their Dealings and Negociations they reckon by the Ducat, and its Subdiviſions of Eighths, and Parts of Eighths.

At GAMBIA and GUINEY they have no Coins, but deal with one another, as well as with the Europeans, by Way of Barter, or giving one Sort of Goods for another. The Europeans commonly give them little, odd, curious Things, as Hardware, &c. for the Produce of their Country.

They make Payments commonly in ſmall Pieces of Gold by Weight; and where they have not the Art of melting it down, they make Payments in Gold Duſt. At MINA, they pay each other with Kacorawns, which is Gold drawn out into a ſmall Wire, and cut afterwards into ſmall Pieces. In ſome Places they make Payments one to another with ſmall Pieces of Iron ſtamped with particular Marks.—About the River NIGER, Fiſh Shells, or Black-moor's Teeth go for Money; and in ETHIOPIA, Pepper Corns paſs Current as Money.

EXCHANGES *to and from the* WEST-INDIES *and* AMERICA.

IN the Britiſh Dominions in America and the Weſt Indies, they keep their Accounts in Pounds, Shillings, and Pence, as they do in London; and in America they generally call their Money Currency. In moſt of the Britiſh Settlements upon the Continent of America, they have few Coins of any Sort circulating among them; what few they have are generally French and Spaniſh Pieces: So that they are obliged to ſubſtitute a Paper Currency for a Medium of their Commerce, for Want of a Competency of Caſh, for Circulation.

The following Table ſhews at what Value the foreign Coins are to paſs in the Engliſh Colonies and Plantations on the Iſlands in America, according to an Act of Parliament made in the Sixth Year of Queen Anne for aſcertaining their Values.

The TABLE.

	Weight.		Fr. Val.		Cur. Value.		
	dwt.	*gr.*	*s.*	*d.*	*s.*	*d.*	*q.*
Dollar (old Plate) of Seville	17	12	4	6	6	0	
Ditto of new —	14	0	3	7 $\frac{1}{4}$	4	9	2 $\frac{2}{3}$
Mexico ditto —	17	12	4	6	6	0	
Pillar ditto —	17	12	4	6 $\frac{3}{4}$	6	0	
Peru ditto (old Plate)	17	12	4	5	5	10	2 $\frac{2}{3}$
Croſs Dollar —	18	0	4	4 $\frac{3}{4}$	5	10	1 $\frac{1}{3}$
Ducatoon of Flanders	20	21	5	6	7	4	
French Crown or Ecu	17	12	4	6	6	0	
Cruſadoe of Portugal	11	4	2	10 $\frac{1}{4}$	3	9	2 $\frac{2}{3}$
Three Guilder Piece of Holland —	20	7	5	2 $\frac{1}{4}$	6	10	3 $\frac{2}{3}$
Old Rix dollar of the Empire —	18	10	4	6	6	0	

The half Quarter, and other Parts in Proportion to their Denominations; and light Pieces in Proportion to their Weights.

And

And to remedy the Inconveniences which were cauſed by the different Rates at which Pieces of the ſame Species were current, it was ordered by Proclamation, and confirmed by the ſaid Act of Parliament, that after the 1ſt of January 1704, no Pillar, Mexico or Seville Pieces of Eight, tho' of full Weight as above, ſhall be received nor paid at above Six Shillings a Piece, and the Half, Quarters, and other leſs Pieces in Proportion.

And the Currency of all the other Pieces above-mentioned are not to exceed the ſame Proportion.

And the ſaid Act enjoins, That if any one ſhall receive or pay any of the ſaid Pieces for any more than as above, they ſhall forfeit Ten Pounds.

A WEST-INDIA TABLE.

WHEN any Sum is advanced upon an Ounce of Sterling Silver, above 5 *s.* for an Ounce; or when any Sum is advanced over 4 *l.* for an Ounce of Standard Gold, this Table ſhews how much the ſaid advanced Money amounts to *per Cent.* from 50 *l.* advanced upon (4 *l.*) an Ounce of Standard Gold, to the $\frac{1}{32}$ Part of a Penny; and upon Silver, from 2 *l.* advanced upon (5 *s.*) an Ounce to the $\frac{1}{128}$ Part of a Penny.

$\frac{1}{128}$ of a Penny ——	—	—	—	—	—	$3\frac{1}{8}$

EXPLANATION of the TABLE.

Suppoſe that Silver was bought in Jamaica at 7*s.* $5\frac{1}{2}$ *d.* of their Currency *per* Ounce, to know how much the Advance Money amounts to *per* Ounce?

	s.	*d.*	
From the given Price in Currency	7	$5\frac{1}{2}$	*per* oz.
Subtract the Sterling Value	5	0	*per* dit.
The Remain. is the Sum advanced	2	$5\frac{1}{2}$	*per* dit.

Then to know how much the advanced Price amounts to *per Cent.* look in the foregoing Calculation.

	l.	*s.*	*d.*	
First, for 2 *s.* upon Silver, which amounts to	40	0	0	*per Ct.*
Then look for 5 *d.* which is	8	6	8	*per Ct.*
Then look for $\frac{1}{2}$ *d.* which is		16	8	*per Ct.*
Then 2 *s.* $5\frac{1}{2}$ *d.* advanced on the Ounce amounts to	49	3	4	*per Ct.*

which is the Diſcount that Currency ſhould be at when Silver is ſold for 7 *s.* $5\frac{1}{2}$ *d. per* Ounce.

An EXAMPLE for GOLD.

Suppoſe that Gold is bought at Carolina at 9*l.* 15 *s.* 7 *d.* of their Currency *per* Once, and you would know how much the advanced Sum amounts to *per* Ounce.

From

	l.	*s.*	*d.*	
From the given Price	9	15	7	*per* oz.
Take the Sterling Value	4	0	0	*per* oz.
The Rem. is the advanced Price	5	15	7	*per* oz.

Then to know how much the advanced Price upon the ſaid Ounce of Gold amounts to *per Cent.*

	l.	*s.*	*d.*	
In the foregoing Table look for 5 *l.* which amounts to	125	0	0	*per Ct.*
Then look for 15 *s.* which is	18	15	0	*per Ct.*
Look alſo for 7 *d.* which is	0	14	7	*per Ct.*
The Sum Total ſhews that 5 *l.* 15 *s.* 7 *d.* Advance upon an Ounce of Gold, is at the Rate of	144	9	7	*per Ct.*

Which is the Diſcount that Currency ſhould be at, when an Ounce of Gold valued at 4 *l.* Sterling, is ſold for 9 *l.* 15 *s.* 7 *d.* of their Currency.

☞ Then to know how much any Sum of their Currency will amount to in Sterling, or the contrary, obſerve the next Article—for Ireland.

Of EXCHANGES *to and from* IRELAND.

AT Dublin, and over all Ireland, Books and Accounts are kept in Pounds, Shillings and Pence, as in England, and Exchanges to or from thence are always rated at ſo much *per Cent.* Advance, or Diſcount, on the Money of the different Kingdoms reſpectively.

The Par of One Shilling Engliſh, is one Shilling and a Penny Iriſh, and by that Proportion that of 100 *l.* Sterling will be 108 *l.* 6 *s.* 8 *d.* Iriſh. Therefore the Par between the two Nations will be 108$\frac{1}{3}$ *l. per Cent.* and whatever is given more or leſs in the Price of Exchange, will be ſo much Gain or Loſs *per Cent.*—The Courſe of Exchange runs from 6 to 12 *l.* and ſometimes to 15 *per Cent.*

EXAMPLE.

If a Merchant remits to Dublin 1758 *l.* Sterling

ing, Exchange at $9\frac{5}{8}$ *per Cent.* how much will the ame amount to there?

RULE.—As 100 *l.* is to 100 *l.* and the Rate of Exchange, ſo is the Sum given to be exchanged, o the Anſwer.—Obſerve to equate the firſt and ſecond Terms in whole Numbers, as directed in Page 66.

OPERATION by the *Rule of Three.*

l.	*l.*		*l.*
If 100	: $109\frac{5}{8}$	: :	1758
Or, if 800	: 877	: :	1758
			877

			12306
			14064

800)1541766(1927 *l.* 4 *s.* $1\frac{3}{4}$ *d.* Anſ.

Remaind. 166 = 4 *s.* $1\frac{3}{4}$ *d.*

Exchanges to Dublin being only an Advance of ſo much *per Cent.* may be calculated as ſo much Intereſt, which added to the Principal, will be the Sum to be received in Ireland. The following Table will therefore ſerve for calculating either the Exchanges to Ireland by, or the Intereſt on any Sum *per Ann.* in many Caſes.

TABLE *for calculating* INTEREST, *&c. by.*

FIrſt, at $\frac{1}{2}$ *per Cent.* take 1-10th of a tenth, and the $\frac{1}{2}$ of the laſt tenth will be the Intereſt, or Rate of Exchange demanded.

At $\frac{1}{3}$ *per C.* take a tenth of a tenth, and a third of the laſt tenth is the Exchange.

At $\frac{2}{3}$ *per C.* take a tenth of a tenth, and two-thirds of the laſt tenth is the Exchange.

At $\frac{1}{4}$ *per C.* take a tenth of a tenth, and a fourth of the laſt tenth is the Exchange.

At $\frac{3}{4}$ *per C.* take $\frac{3}{4}$ of a tenth, and a tenth will be the Exchange.

At $\frac{1}{5}$ *per C.* the fifth of the tenth of a tenth will be the Exchange.

At $\frac{2}{5}$ *per Cent.* take two-fifths of the tenth of a tenth for the Exchange.

At 1 *per C.* take a tenth of a tenth for the Exch.

At $1\frac{1}{2}$ *per C.* take a tenth of a tenth, and a half of the laſt tenth, adding the two laſt.

At $1\frac{1}{3}$ *per C.* take a tenth of a tenth, and a third of the laſt tenth, adding the 3d and 10th.

At $1\frac{2}{3}$ *per C.* take a tenth of a tenth, and two-thirds of the ſaid laſt tenth.

At $1\frac{1}{4}$ *per C.* take an eighth of a tenth.

At $1\frac{3}{4}$ *per C.* take a tenth of a tenth, and $\frac{3}{4}$ of the ſaid laſt tenth.

At $1\frac{3}{8}$ *per C.* take a tenth of a tenth, and three-eighths of the laſt tenth.

At 2 *per C.* take a fifth of a tenth for the Exch.

At $2\frac{1}{8}$ *per C.* take a fifth of a tenth, and a ſixteenth of the ſaid fifth.

At $2\frac{1}{4}$ *per C.* take a fifth of a tenth, and an eighth of the ſaid fifth, adding the fifth and eighth.

At $2\frac{1}{2}$ *per C.* take a fourth of a tenth.

At $2\frac{2}{3}$ *per C.* take a fifth of a tenth, and a third of the ſaid fifth.

At $2\frac{3}{4}$ *per C.* take a fourth of a tenth, and the tenth of the ſaid fourth.

At 3 *per C.* take a fourth of a tenth, and a fifth of the ſaid fourth, adding the fourth and the fifth.

At $3\frac{1}{3}$ *per C.* take a third of a tenth.

At $3\frac{1}{2}$ *per C.* take a fourth of a tenth and two-fifths of the ſaid fourth, adding the fourth and two-fifths.

At $3\frac{3}{4}$ *per C.* take a fourth of a tenth and a half of the ſaid fourth, adding the fourth and half.

At 4 *per C.* take a fifth of a fifth.

At $4\frac{1}{2}$ *per C* take a fourth and a fifth of a tenth.

At 5 *per C.* take a half of a tenth.

At $5\frac{1}{2}$ *per C* take a half of a tenth and a tenth of the ſaid half, adding the half and the tenth.

At 6 *per C.* take the half of a tenth, and add a fifth of the ſaid half, for the Exchange.

At $6\frac{1}{4}$ *per C.* take the fourth of a fourth for the Exchange.

At $6\frac{2}{3}$ *per C.* take the third of a fifth.

At $7\frac{1}{2}$ *per C.* take the half of a tenth and half of the ſaid half.

At $8\frac{1}{3}$ *per C.* take the twelfth.

At 10 *per C.* take the tenth.

At $12\frac{1}{2}$ *per Cent.* take the eighth.
At 15 *per C.* take the tenth and half of the ſaid tenth, adding the whole.
At $16\frac{2}{3}$ *per C.* take the ſixth.
At $17\frac{1}{2}$ *per C.* take a tenth and the half and the fourth of the ſaid tenth.
At 20 *per C.* take the fifth.
At $22\frac{1}{2}$ *per C.* take the fifth and eighth of the ſaid fifth, for the Exchange.
At 25 *per C.* take the fourth.

EXAMPLE by the TABLE.

How much will 1472 *l.* amount to in Ireland, Exchange at $12\frac{1}{2}$ *per C.*

OPERATION by the TABLES.

Of the EXCHANGES *of the Principal Foreign Nations with one another.*

EXCHANGES *of* HOLLAND.

HOLLAND gives in the Courſe of Exchange as under, viz.

To Hamburgh, Antwerp, and the Netherlands, from 60 to 70 *d. per* Dollar of 32 Schilling-Lubs, or 2 Marks; the Par being $66\frac{2}{3}$ *d. per* Dollar.

To France, from 50 to 56 *d.* Flemiſh for one Crown of 3 Livres, or 60 Sols. The Par being 54 *d.* very near.

To Spain, from 90 to 130 *d. per* Ducat of 375 Marevedies; the Par being $109\frac{4}{5}$ *d.* nearly.

To Portugal, from 40 to 60 *d. per* Cruſade; the Par being 50 *d. per* Cruſade of 400 Rees.

To Venice, from 80 to 100 *d. per* Ducat Banco of 124 Soldi; the Par being 93 *d. per* Ducat.

To Genoa, from 90 to 110 *d. per* Pezzo; the Par being 100 *d. per* Pezzo.

To Novi, the ſame.

To Leghorn, from 86 to 108 *d. per* Piaſtre; the Par being 100 *d. per* Piaſtre.

To Florence, from 100 to 130 *d.* for a Crown; the Par being $119\frac{73}{108}$ *per* Crown of 150 Soldi.

To Naples, from 70 to 80 *d. per* Ducat; the Par being $74\frac{2}{3}$ *d. per* Ducat of 10 Carlins.

To Rome, from 120 to 150 *d. per* Crown; the Par being $135\frac{65}{81}$ *d. per* Crown of 20 Julios.

To Milan, from 90 to 106 *d. per* Ducat; the Par being 102 *d.* nearly *per* Ducat or Crown of 117 Soldi.

To Bologna, from 85 to 100 *d. per* Dollar; the Par being $94\frac{4}{9}$ *d. per* Dollar of 85 Soldi.

To Geneva, the ſame as to France, the Par being the ſame.

To Germany and the Eaſt Country, as before: See the Exchanges from thoſe Places to England, in which the Exchanges are explained, and alſo the Pars computed, to Holland.

Of the FOREIGN EXCHANGES *of* HAMBURGH.

HAMBURGH gives in Exchange as follows, viz.

To Antwerp and the Netherlands, the Flemiſh Pound for a Flemiſh Pound, having a Premium, the Pounds being on a Par.

To Holland, the Dollar of 32 Schilling-Lubs for 60 to 70*d.* Flem. the Par being $66\frac{2}{3}$ *d.* of Holland.

To France, 48 to 56 *d.* Flemiſh, or 24 to 34 Schilling-Lubs for 1 Crown; the Par being $51\frac{4}{5}$ *d. per* Crown, and rather better.

To Spain, from 48 to 55 Schilling-Lubs for the Ducat of 375 Marevedies; the Par being $52\frac{4}{5}$ nearly.

To Portugal, from 40 to 60 *d. per* Cruſade; the Par being 48 *d.* for a Cruſade of 400 Rees.

To Francfort, the Dollar for 56 to 70 Cruitzers of Exchange, or the Dollar for a Florin of 60 Cruitzers, having a Premium; the Par being 60 Cruitzers of Exchange, for a Dollar of two Marks.

To Noremberg, the Dollar for 58 to 75 Cruitzers Current; the Par being 60.—Or Rix-dollars for Rix-dollars Current, having a Premium.

To Venice, from 86 to 100 *d. per* Ducat; the Par being $89\frac{3}{10}$ *d.* nearly.

To Leghorn and Genoa, from 90 to 100 *d. per* Piaſtre or Pezzo; the Par being 96 *d.*

To Novi, the ſame.

To Denmark and Poland, Rix-dollars for Rix-dollars, at ſo much *per Cent.* the Rix-dollars being on a Par with one another.

To Sweden, the Rix-dollar for 32 to 45 Copper Marks; the Par being $34\frac{5}{7}$ Marks for a Current Rix-dollar.

To Ruſſia, the Rix-dollar for 90 to 110 Copeaks; the Par being 100 Copeaks for a Current Rix-dollar.

Of

Of the FOREIGN EXCHANGES *of* FRANCE.

FRANCE gives in the Courſe of Exchange one Crown (the Par of which is 29,149 *d.*) as follows, viz.

To Holland and Hamburgh, for an uncertain Number of Pence as before, the Par being the ſame.

To Francfort, for 60 to 70 Cruitzers Current; the Par being 62½ Cruitzer *per* Crown, and rather better.—Or France gives 100 Crowns for 48 to 60 Rix-dollars of 90 Cruitzers Current.

To Noremburgh, for 45 to 56 Cruitzers Current; the Par being 48⅝ Cruitzers nearly *per* Crown.

To St Gall, for 54 to 64 Cruitzers; the Par being 55 and rather better.

To Spain, for 170 to 200 Marevedies; the Par being 183⅜ and rather better.

To Portugal, for 400 to 540 Rees; the Par being 431⅘ and ſomething more.

To Milan, for 60 to 70 Soldi of Exchange; the Par being 62.

To Bologna, for 45 to 55 Soldi; the Par being 48⅗ Soldi nearly.

To Sardinia, for 90 to 100 Soldi; the Par being 92½ Soldi *per* Crown, and rather better.

To Genoa, 100 to 130 Sols for a Pezzo; the Par being 111⅙ Sols nearly for 1 Pezzo of 115 Soldi.

To Novi, the ſame.

To Leghorn, the ſame as to Genoa *per* Piaſtre; the Par being the ſame.

To Venice, 100 Crowns for 55 to 65 Ducats Banco of 124 Soldi; the Par being 58 Ducats 5¼ Soldi.

To Naples, 100 Crowns for 70 to 78 Ducats of 10 Carlins; the Par being 72 Ducats 2¾ Carlins, and rather better.

To Rome, 100 Crowns for 35 to 45 ſtamp'd Crowns of 12 Julios; the Par being 39 Crowns 9 Julios, and rather better.

To

To Florence, 100 Crowns for 40 to 50 Crowns of 150 Soldi; the Par being 45 and a little more.
To Lucca, 100 Crowns for 40 to 50 Crowns of $7\frac{1}{2}$ Livres; the Par being $44\frac{5}{8}$ Crowns nearly.
To Poland, Denmark, and Ruſſia, 100 Crowns for 50 to 60 Rix-dollars, or Rubles; the Par being 54 nearly.
To Sweden, 100 Crowns for 75 to 85 Copper Rix-dollars of 24 Marks; the Par being 78 and rather better.
To moſt Places in Germany, France exchanges by Way of Holland, or Hamburgh.

Of the Foreign EXCHANGES *of* SPAIN.

SPAIN gives in the Courſe of Exchange as follows, viz.

To Holland, Hamburgh, and the Netherlands, the Piaſtre for an uncertain Number of Pence, and alſo to France, as before under the Exchanges of thoſe Places; the Pars being likewiſe the ſame.
To Portugal, the Piaſtre for 600 to 700 Rees; the Par being 637 Rees.
To Venice, from 300 to 360 Marevedies for the Ducat Banco of 24 Groſs; the Par being 318 nearly.
To Genoa and Leghorn, from 310 to 390 Marevedies for the Pezzo, or Piaſtre; the Par being $341\frac{5}{8}$ nearly.
To Novi, the ſame.
To Rome, from 440 to 490 Marevedies for one Crown of 12 Julios; the Par being 464 nearly.
To Florence, from 390 to 450 Marevedies *per* Crown of 150 Soldi; the Par being 409 nearly.
To Naples, from 230 to 290 Marevedies *per* Ducat of 10 Carlins; the Par being 255.
To Milan, from 230 to 380 Marevedies *per* Ducat of 117 Soldi; the Par being 348 nearly.

To

To Bologna, 300 to 360 Marevedies for the Dollar of 85 Soldi; the Par being $322\frac{5}{8}$ nearly.

To Sardinia, the Piaſtre of 372 Marevedies for the Dollar of 138 Soldi, having a Premium; the Piaſtre and Dollar being on a Par.

To Meſſina and Palermo, 350 to 400 Marevedies for the Crown of 12 Tarins; the Par being 380 *per* Crown nearly.

Of the Foreign EXCHANGES *of* PORTUGAL.

PORTUGAL gives in the Courſe of Exchange as follows, viz.

To Holland, Hamburgh, Antwerp, the Netherlands, France, and Spain, as before, under the Exchanges of thoſe Places; or ſometimes to Spain 210 to 230 Cruſades for 100 Ducats of 375 Marevedies; the Par being 220 nearly.

To Venice, from 700 to 800 Rees *per* Ducat Banco; the Par being 744 Rees *per* Ducat nearly.

To Genoa and Leghorn, 750 to 900 Rees for a Pezzo or Piaſtre; the Par being 800.

To Novi, the ſame.

To Florence, from 900 to 1000 Rees *per* Crown of 150 Soldi; the Par being 957.

To Naples, from 570 to 640 Rees *per* Ducat of 10 Carlins; the Par being 597 Rees.

To Sardinia, from 600 to 660 Rees *per* Dollar of 138 Soldi; the Par being 637.

To Meſſina and Palermo, 860 to 920 Rees *per* Crown of 12 Tarins; the Par being 889, very near, *per* Crown.

Of the Foreign EXCHANGES *of* VENICE.

VENICE gives in the Courſe of Exchange as follows, viz.

To Holland, the Netherlands, Hamburgh, France, Spain and Portugal as before, under the Exchanges of thoſe Places.

To Leghorn and Genoa, 100 Ducats Banco for 85 to 96 Piaſtres or Pezzos; the Par being 93 Piaſtres or Pezzos;—ſometimes an uncertain Number of Soldi Banco to Genoa for the Crown of 4 Lires.

To Novi the ſame.

To Naples, 100 Ducats Banco for 120 to 130 Ducats of 10 Carlins; the Par being 122, and a little more.

To Rome, 100 Ducats Banco for 60 to 72 Crowns of 12 Julios; the Par being $68\frac{1}{2}$ very near.

To Francfort, 100 Ducats Banco for 120 to 145 Florins of 60 Cruitzers of Exchange; the Par being $139\frac{1}{2}$ nearly.

To Noremburgh, the ſame for the like Number of Florins Current; the Par being the ſame.

To St Gall, 100 Ducats for 145 to 163 Florins of 60 Cruitzers, or of 10 Schillings; the Par being $158\frac{1}{10}$ Florins.

To Milan, 100 Ducats Banco for 85 to 96 Ducats of 117 Soldi; the Par being $91\frac{1}{3}$, rather more.

To Lucca, 100 Ducats Banco for 70 to 80 Crowns of $7\frac{1}{2}$ Livres; the Par being 77 nearly.

To Bologna, from 120 to 130 Soldi for the Ducat of 85 Soldi of this Place; the Par being 126 nearly.

To Bolſenna, 100 to 120 Soldi for the Rix-dollar of 93 Cruitzers; the Par being $112\frac{1}{3}$ nearly.

To Bergamo, 185 to 210 Soldi for the Ducat or Crown

Crowns of 7 Livres; the Par being $207\frac{2}{5}$ very near.

To Sardinia, from 95 to 110 Soldi for the Dollar of 138 Soldi; the Par being 106, and rather more.

To Sicily, from 130 to 160 Soldi for the Crown of 12 Tarins; the Par being 148 *per* Crown.

Of the FOREIGN EXCHANGES *of* GENOA.

THIS Place gives in the Courſe of Exchange as follows, viz.

To Venice, Spain, Portugal, &c. as before under the Exchanges of thoſe Places.

To Leghorn, 100 Pezzos for 100 Piaſtres, at ſo much *per Cent.* the Pezzo and Piaſtre being on a Par.

To Millan, the Crown or Piece of 4 Lires for 76 to 86 Soldi; the Par being 80 nearly.

To Naples, from 75 to 90 Soldi for the Ducat of 10 Carlins; the Par being 86 nearly.

To Rome, from 115 to 140 Soldi for the Crown of 10 Julios; the Par being $130\frac{1}{7}$ very near.

To Sardinia, from 80 to 95 Soldi for the Dollar of 138 Soldi; the Par being $91\frac{31}{54}$ *per* Dollar.

To Bologna, from 90 to 115 Soldi for the Dollar of 85 Soldi; the Par being $108\frac{33}{54}$ *per* Dollar.

To Bolſenna, a Pezzo for 90 to 115 Cruitzers of Exchange of this Place; the Par being $110\frac{1}{2}$ nearly.

To Meſſina and Palermo, or Sicily, 110 to 135 Soldi for the Crown of 12 Tarins; the Par being $127\frac{7}{9}$ *per* Crown.

Note, Spain, Portugal, Italy, &c. moſtly exchange with Poland, Denmark, Sweden, Ruſſia, and moſt Places in Germany, by Way of Holland, or Hamburgh.

Of the FOREIGN EXCHANGES *of* LEGHORN.

THIS Place gives in the Courſe of Exchange as under, viz.

To Venice, Spain, Portugal, France, Holland, &c. as under the Exchanges of thoſe Places; the Pars being the ſame.

To Rome, 100 Piaſtres for 70 to 78 Crowns of 12 Julios; the Par being $73\frac{7}{11}$ *per* Crown.

To Millan, 100 Piaſtres for 95 to 100 Ducats of 117 Soldi; the Par being $98\frac{2}{11}$ Ducats.

To Naples, 100 Piaſtres for 130 to 140 Ducats of 10 Carlins; the Par being 134 nearly.

To Geneva, 100 Piaſtres for 170 to 190 Crowns of 3 Livres; the Par being $185\frac{1}{3}$ nearly.

To Florence, 1 Piaſtre for 120 to 150 Soldi of this Place; the Par being $125\frac{1}{3}$, and rather better.

To Bologna, from 100 to 120 Soldi *per* Dollar of 85 Soldi of this Place; the Par being $113\frac{1}{3}$.

To Sicily, from 120 to 140 Soldi for the Crown of 12 Tarins; the Par being $133\frac{1}{3}$ *per* Crown.

To Sardinia, from 85 to 100 Soldi for the Dollar of 138 Soldi; the Par being $95\frac{5}{9}$ *per* Dollar.

To Bolſenna, 1 Piaſtre for 90 to 120 Cruitzers of Exchange of this Place; the Par being $110\frac{1}{2}$ nearly.

☞ Tho' the foregoing be the principal Places of Exchange, yet if the Exchanges from any other ſhould be required, as the Coins of all the Kingdoms and States in Europe are exactly equated herein, eſpecially the Pieces of Exchange, and as 'tis always obſerved which Places give the certain and which the uncertain Price under their reſpective Heads, they may from theſe be eaſily computed, and the Pars alſo readily calculated.

Of ARBITRATION of EXCHANGES.

THIS Article muſt be conſidered under two diſtinct Heads, viz. Simple and Compound Arbitration.

In Simple Arbitration the Prices of Exchange from one Place are generally given to other two, in order to find the Price between the ſaid two, which is called the Arbitrated Price of Exchange.——————Or, if a Factor has Orders from his Employer to remit a certain Sum of Money to a Place, provided he can do it at a certain Price of Exchange mentioned; and at the ſame Time is ordered to draw for it upon ſome other Place at a certain Price for the Value of the Sum he has remitted: Now as the Courſe of Exchange is always upon the Fluctuation, being ſeldom two Days alike, he has to conſider whether the Advantage in performing the one Part of his Commiſſion will be ſufficient to compenſate for the Loſs that may happen or ariſe from the other. In order to diſcover which Method will be of moſt Advantage to his Employer, he muſt make Uſe very often of ſeveral Operations, yet by ſimple Arbitration he will eaſily diſcover whether he can fulfil his Orders upon the Place deſired, in drawing for the Value he has remitted to the other, without Loſs, at the current Price. And in caſe he finds the Negociation would be attended with Loſs, he then writes to his Correſpondent, who, on the Receipt thereof, probably orders him to draw upon ſome other Place, or to wait till the Courſe falls, or becomes better.

Factors or Agents have generally an Allowance, which is called Commiſſion, of ſo much *per Cent.* for their Trouble; and if any Advantage attends the Negociation from the Current Price of Exchange to either, or both Places, that is properly due to the Employer.

INSTRUCTION.

In the Buſineſs of exchanging, one Place gives

the certain Price, and the other the uncertain.—England gives the certain (One Pound Sterling) to Holland, and the uncertain to almoſt all other Nations.—And,

When one Place gives the certain Price to two that give the uncertain, a Rate of Exchange muſt always be ſuppoſed between the two that give the uncertain; and the certain Price which one of them gives the other, muſt always be ſubſtituted. Or if one of the Places between which the Par of Exchange is wanted gives the certain, and the other the uncertain to the firſt Place, the Courſe from that Place which gives the certain Price to the firſt Place, muſt be ſubſtituted as the certain Price between them.—And if both Places give the certain to the firſt Place, the Courſe from that Place to the firſt, which gives the certain Price between the Places where the Par is wanted, muſt be ſubſtituted for the certain Price between them.

The Method of finding the Par of Exchange at three different Places, the Par of one with two of them being given, to find the Par between the other two, is as follows: And in order that this may be clearly underſtood, let it be ſuppoſed that each Corner of an equilateral Triangle repreſents one of the ſaid Places, and that two of the Sides be given to find the third. The ſingle Rule of Three will ſolve all Queſtions in Simple Arbitrations, provided due Care be taken in the ſtating thereof. From the two following Triangles of Equality, 'tis evident the Exchange at each Place is on a Par with thoſe of the other two, as they reciprocally prove each other; and if any Sum of Money ſhould be remitted from one to the other two, and from the latter home, it would be returned entire without Loſs.

EXAMPLES.

A Triangle of Equality, for Paris, Amſterdam, and London.

ANGLE I.

Suppoſe Bills at Paris, on London at 32 *d. per* Crown, and on Amſterdam at 54 *d. per* Groots *per Crown*, what muſt the Prices of Exchange be between London and Amſterdam, to be on a Par with the Exchange from Paris to thoſe Places?

OPE-

OPERATION.

d *d.* *s.* *d.*
If 32 : 54 : : 20 or 240
54
960
1200
d.
32)12960(405 Quotient.

Which Quotient divided by 12, produces 33 *s.* 9 *d.* the Anſwer.

ANGLE II.

Suppoſe Bills at London on Amſterdam are at 33 *s.* 9 *d. per* Pound Sterling, and on Paris at 32 *d. per* Crown of 3 Livres, or 60 Sols, what Price muſt the Exchange between Amſterdam and Paris be, to be on a Par with the other two?

OPERATION.

s. *s.* *d.* *d.*
If 20 : 33 9 : : 32
12 12
240 405
32
240)12960(54 *d.* of Holland *per* Crown, Anſw.

ANGLE III.

If Bills at Amſterdam on Paris be at 54 *d. per* Crown, and on England at 33 *s.* 9 *d. per* Pound, what Price muſt the Exchange between Paris and London be, to be on a Par with thoſe of Amſterdam to thoſe Places?

s. *d.* *s.* *d.*
If 33 9 : 20 : : 54
12 12
405 240
54
405)12960(32 *d.* Engliſh, *per* Crown, the Anſwer.

In this Triangle of Equality, if a Draught for 200 *l.* Sterling were remitted to Paris at 32 *d. per* Crown, it would be found to be worth 1500 Crowns there; and if the ſaid Crowns were re-

mitted to Amſterdam at 54 Dutch Pence *per* Crown, the Draught would have Credit there for 81000 *d.* or 2025 Guilders.

Again, if the Guilders were remitted to London at 33 *s.* 9 *d. per* Pound, the Draught will be found to amount to juſt 200 *l.* Therefore it appears that the Exchange at all theſe Places is exactly on a Par, ſince the 200 *l.* has gone thro' both France and Holland, and is remitted Home again entire.

Another Triangle of Equality, for London, Hamburgh, and Holland.

ANGLE I.

If London can remit to, or draw on Hamburgh, at 34 *s.* 2 *d. per* Pound, and to Holland at 35 *s.* 5 *d.* what Price muſt the Exchange be between Hamburgh and Holland, to be on a Par with the Exchange from London to thoſe Places?

	s.	*d.*		*s.*	*d.*		*Sch. L.*
If	34	2	:	35	5	: :	32
	12			12			2
	410			425			64
				64			

410)27200(66$\frac{1}{3}$ Groots, or Pence, Flemiſh, (the Anſwer.)

The Dollar of Hamburgh of 2 Marks, or 32 Schilling-Lubs, or 64 *d.* Flemiſh, being the certain Price of Exchange to Holland, is here ſubſtituted to find the arbitrated Price with Holland.

ANGLE II.

When Amſterdam can remit to London at 35 *s.* 5 *d.* and to Hamburgh at 66$\frac{1}{3}$ or rather 66$\frac{4}{12}$, what muſt the Rate of Exchange be between London and Hamburgh to be on an Equality with the other two?

OPERATION.

	d.		*d.*		*s.*	*d.*
If	66$\frac{4}{12}$	:	64	: :	35	5

	251		441			253
			251			

253)110691(473 *d.* = 36 *s.* $5\frac{1}{2}$ *d.* rather more (Anſwer.)

Note, As the Remittance exceeded the Order, and would conſequently come higher to France, in order to compenſate for this, London draws upon Holland at a lower or better Exchange than deſired,

desired to bring the Remittance and Draught on an Equality; if London cannot do this it will be loser, or if the Order was unlimited it must make France Debtor for the Balance. The lower the Exch. is to Holland from England (on Account of France) 'tis so much the better; the same holds good when England remits on its own Account, which occasions an inverse Proportion in this Case, it being as difficult a one as can well happen in Simple Arbitration. If the Exchange had been lower in France than the Order, the Proportion would also have been an inverse one, as the less Extreme would have then required a higher Exchange to Holland to make an Equality.—On Trial it will be found, that any Sum remitted to France at $31\frac{5}{8}$ *d.* and drawn for on Holland at 36*s.* $5\frac{1}{2}$ *d.* will amount to just as many Guilders there, as if remitted at $31\frac{3}{8}$ *d.* and drawn for at 36*s.* 9*d.*

Orders sent to a Place that gives the uncertain Price to two other Places.

I. If when London has Orders to remit to Genoa at $52\frac{1}{8}$ *d.* *per* Pezzo, and to draw upon Spain at 41 *d.* *per* Piastre, before the said Order be fulfilled, Bills on Genoa were at $53\frac{1}{2}$ *d.* *per* Pezzo, at what Price must London draw upon Spain to make the Remittance and Draught upon an Equality?

OPERATION.

	d.		*d.*
If $52\frac{1}{8}$	: $53\frac{1}{2}$	: :	41
Or, if 417	: 428	: :	41

41

428

1712

417)17548(42$\frac{1}{17\frac{1}{2}}$ *d.* *per* Piastre nearly. (Answ.)

II. If England be ordered to remit 1000 Ducats to Venice at 50 *d.* *per* Ducat, and to draw for the Value upon Spain at 40 *d.* *per* Piastre; and when the Order came to Hand, Bills on Venice were at $52\frac{1}{2}$ *d.* at what Price must England draw upon Spain

Spain to make the Draught equal to the Remittance?

d. *d.*
If 50 : 52½ : : 40
Or, if 100 : 105 : : 40
40

100)4200(42 *d.*

The Proof of this appears from what follows:

D. *d.* *Duc.*
First, if 1 : 50 : : 1000
50

l. *s.* *d.*
12)50000(4166 or 208 6 8

Rem. 8

According to the Order the 1000 Ducats would come to 208 *l.* 6 *s.* 8 *d.*

d. *Piaſt.* *d.*
Next, if 40 : 1 : : 50000 as before.
1

40)50000(1250 Piaſtres.

Then by the Courſe 1000 Ducats at 52½ *d.*

If 1 : 52½ : : 1000
Or, if 2 : 105 : : 1000
105

2)105000(52500 *d.* or 218 *l.* 15 *s.*

d. *Piaſt.* *l.* *s.*
Laſtly, if 42 : 1 : : 218 15
Or, if 42 : 1 : : 52500 *d.*
1

42)52500(1250 Piaſtres (Anſ.)

Thus it appears that remitting to Venice at 52½ *d.* *per* Ducat, and drawing upon Spain at 42 *d.* *per* Piaſtre, comes to the ſame Number of Piaſtres as remitting at 50 *d.* and drawing at 40 *d.* according to the Order.

An Order ſent to a Place that gives the certain Price to two other Places.

If *A* of Amſterdam gives *B* of Paris Orders to remit to *C* of London at 32 *d.* *per* Crown, and to

to draw for the Value on him at 56 *d.* Flemiſh *per* Crown; and if on Receipt of the ſaid Order *B* finds the Exchange on London at $32\frac{3}{8}$ *d.* and upon Amſterdam at $56\frac{3}{4}$ *d.* *per* Crown. Quere, if at theſe Prices the Order could be performed to *A*'s Advantage?

If 32 : 56 : : $32\frac{3}{8}$
Or if 256 : 56 : : 259
56

256)14504($56\frac{5}{8}$ *d.* Fl. and rather more (Anſwer.)

From this it appears, that the ſaid Order might be performed to the Advantage of *A* of Amſterdam, ſince the Crown of Paris would only coſt him $56\frac{5}{8}$ *d.* to be on the Par with the other Exchange, and by the Courſe *C* can allow or give him $56\frac{3}{4}$ *d.* *per* Crown, which would be nearly 1 *d.* Flem. upon every 8 Crowns in the Remittance Profit to *A*. And

☞ In the like Manner may the Gain or Loſs upon any Order (if 2 or 3 Places be only concerned) be computed, the Prices mentioned in an Order being always to be ſuppoſed to be on a Par with each other.

EXAMPLES *Promiſcuous.*

I. If London can remit to Amſterdam at 35 *s.* *per* Pound Sterling, and to Venice at 52 *d.* *per* Ducat Banco; what muſt the Rate of Exchange be between Amſterdam and Venice *per* Ducat, to be on an Equality with thoſe from London?

OPERATION.

s.	*s.* Fl.	*d.*
If 20	: 35	: : 52
12	12	
240	420	
		52

240)21840(91 *d.* Flem. the Anſwer.

EXAMPLE II.

If Amſterdam can remit to or draw on Paris at 58 *d.* *per* Crown, and on Cadiz at 80 *d.* *per* Piaſtre

ſtre of 272 Marevedies, what muſt the Exchange be between Paris and Cadiz to be on a Par with the other two?

d. Fl. *Mar.* *d.* Fl.
If 80 : 272 : : 58
58

80)15776(197$\frac{1}{5}$ Marevedies, the Anſwer.

Note, In this Caſe as Amſterdam gives the uncertain Price to both the other, and as Paris gives the certain Price to Cadiz, viz. the Crown, the Courſe from Paris to Amſterdam is to be ſubſtituted as the certain Price of the ſaid Crown, in order to find the arbitrated Price thereof to Cadiz.

EXAMPLE III.

If England owes a Sum of Money for Corn at Dantzick, and if Dantzick can draw on England at 21 Fl. 21 Groſhen *per* Pound Sterl. and on Holland at 372 Groſhen *per* Pound Flemiſh Banco; the Queſtion is, whether it would be more to the Advantage of England to make Payment to Holland, or allow Dantzick to draw for the Money directly to England, ſuppoſing the Exchange to Holland at the Time at 34 *s.* 10 *d.* *per* Pound Ster.

Gro. *s.* Fl. *Flor.*
If 372 : 20 : : 21 21 Gr
30

Or if 372 : 20 : : 651
20

372)13020(35 *s.* Anſwer.

Thus it appears that the arbitrated Price between Holland and England is 35 *s.* according to both the aforeſaid Exchanges, from Dantzick at that Time; and as the Courſe to Holland is only 34 *s.* 10 *d.* it would be more advantageous to make Payment directly to Dantzick, ſince it is better to get at the Rate of 35 *s.* *per* Pound than 34 *s.* 10 *d.* by about one Half *per Cent.*

To prove this, ſuppoſe England remits 100 *l.* to Holland at 35 *s.* the arbitrated Price here mentioned, it would go round this Triangle, and come Home entire, viz.—In Holland it would make 3500 *s.* Flemiſh, and that Sum remitted to Dantzick,

zick, would be 65100 Groſhen; then again the Groſhen ſent to England, would be juſt 100 *l.* according to the Prices of Exchange aforeſaid.

But when the Courſe to Holland exceeds the arbitrated Price, as it moſtly does, it is better to make Payment there, reckoning for every 4 *d.* in the Courſe above the arbitrated Price juſt about 1 *per Cent.* Gain.

EXAMPLE IV.

If *A* at London owes *B* at Peterſburgh 5000 Rubles, and *B* adviſes that he can draw for them directly on England at 50 *d.* Sterling *per* Ruble, or on Holland at 45 Stivers, or 90 *d.* Banco *per* Ruble; whether Method will be more advantageous to *A*, ſuppoſing the Exchange between Holland and England at the Time be at 36 *s.* 4 *d.* *per* Pound Sterling?

d St. *d* Fl. *s.* St.
If 50 : 90 : : 20
12
240
90

50)21600(432 *d.* or 36 *s.* the Anſwer.

Here 36 *s.* Flemiſh is the arbitrated Price between Holland and England, according to the other Prices from Peterſburgh. If the 5000 Rubles be drawn for on England they will come to 1041 *l.* 13 *s.* 4 *d*—if on Holland to 11250 Guilders; and if the Guilders were drawn for at 36 *s.* Exchange, they would alſo come to 1041 *l.* 13 *s.* 4 *d* as well as the Rubles directly from Ruſſia; which ſhews that 'tis equal whether Way Payment were made at theſe Rates; but as the Current Exchange with Holland was at 36 *s.* 4 *d.* if the 11250 Guilders aforeſaid be drawn for at that Price, they will only come to 1032 *l.* 2 *s.* $2\frac{3}{8}$ *d.* therefore *A* of London would ſave 9 *l.* 11 *s.* and better, by this Negociation coming thro' Holland, but if the Courſe of Exchange had been under the arbitrated Price, a direct Exchange would then have been better in Proportion thereto.

Ex-

EXAMPLE V.

A of London has 500 Mill-Rees owing from *B* at Portugal, and *B* adviſes him he can remit to London at 5 *s.* 4 *d. per* Mill-Ree, or to Amſterdam at 48 *d.* Flemiſh *per* Cruſade of 400 Rees, or 2 *s.* 3 *d.* Value, Sterling; now whether will it be more to the Advantage of *A* to have the Value remitted directly home, or to Amſterdam, admitting the Exchange to Holland at 35 *s.* *per* Pound Sterling at the Time.

☞ In this Caſe as the arbitrated Price is required between London and Amſterdam, and as Portugal gives the certain Price (the Mill-ree and Cruſade but of different Values) to both Places, that cannot be found without firſt finding the Value of the Mill-ree at Amſterdam proportionable to that of the Mill-ree at London, according to the Courſe, thus,

OPERATION.

	s.	*d.* St.		*d.* Fl.		*d.* St.
If	2	3	:	48	: :	64
Or if	27		:	48	: :	64
						48

27)3072(113$\frac{21}{27}$ *d.* Fl. the Value of a Mill-ree in Holland.

	d. St.		*d.* Fl.		*s.* St.
Then, if	64	:	113$\frac{21}{27}$	: :	20
	27		27		12
Or if	1728	:	3072	: :	240
			240		

1728)737280(426$\frac{2}{3}$ *d.* or 35 *s.* 6$\frac{2}{3}$ *d.* the arbitrated Price with Holland.

Thus it appears that if *A* orders *B* to remit to Holland at 48 *d. per* Cruſade, the Remittance would be equal to an Exchange of 35 *s* 6$\frac{2}{3}$ *d. per* Pound Sterling; and as the Courſe to Holland at the Time was only 35 *s.* *A* might draw for the ſaid Remittance at that Price, which would be about 1$\frac{1}{2}$ *per Cent.* better than if he ordered *B* to remit directly to London.

EXAMPLE VI.

If Amſterdam orders Hamburgh to remit to Cadiz at 120*d.* Flem. *per* Ducat of 375 Marevedies and to draw for the Value on London at 34 and 4*d.* *per* Pound Sterling; what Price must the Exchange be at between Amſterdam and Cadiz, ſuppoſing the Courſe between London and Amſterdam at 35*s.* 6*d.*

OPERATION

	s.	*d.*		*d.*		*s.*	*d.*
If	34	4	:	120	: :	35	6
	12					12	
Orif	412		:	120	: :	426	
						120	

412)51120(124*d.* rather better, the Anſwer.

Note, In this Caſe as four Places are concerned to find the Equality among them, that could not be found at one Operation, if the Equality from one to two of them, and alſo that of the third with two of the ſaid Places, had not been given. For here 120*d.* from Amſterdam muſt be ſuppoſed equal to a Ducat, as well as 120 from Hamburgh, and 33*s.* 4*d.* Flem. the Par of 1*l.* St. at Holland as well as at Hamburgh; therefore it follows, that if the Exch. from Holland (or Hamburgh) to England be advanced, that from Holland to Cadiz muſt be ſo too in Proportion thereto. If the Queſtion be propounded thus, this will appear ſtill more plain and eaſy; if Cadiz orders Amſterdam to remit to London at 33*s.* 4*d.* *per* Pound, and to draw for the Value at 120*d.* *per* Ducat, and when the Order came, the Exchange on England was at 35*s.* 6*d.* how much muſt the Exchange be between Amſterdam and Cadiz to be on a Par with the Remittance? ——Anſwer as before.

If four or more Places be concerned, ſee the next Article.

Of COMPOUND ARBITRATION.

COMPOUND ARBITRATION joins together ſeveral Rules of Three into one, or at one Operation performs a Series or Chain of the Single Rule of Proportion; and by the Relation that ſeveral Antecedents have to their Conſequents, the Proportion between the firſt Antecedent and the laſt Conſequent is diſcovered, as well as the Proportion between the other in their ſeveral Stations.

'Tis by this Rule that Merchants generally make their Calculations both in equating (or finding the Par at the current Prices) the Exchanges of Money, and alſo thoſe of Weights and Meaſures, in all Caſes where more than three Places are concerned.

INSTRUCTIONS.

I. Place the Antecedents in one Column, and the Conſequents in another in the Right Hand of them.

II. The firſt Antecedent, and the laſt Conſequent, to which an Antecedent is required, muſt always be of the ſame Denomination or Species.

III. The firſt Conſequent muſt be of the ſame Denomination with the ſecond Antecedent; and likewiſe the ſecond Conſequent to the third Antecedent, &c. throughout.

IV. If there be a Fraction in any of the Numbers, both the Antecedent and Conſequent muſt be multiplied into the Denominator of the ſaid Fraction, as they ſtand, and the Proportion holds the ſame as if no Fraction occurred.

The Terms being thus diſpoſed, proceed as follows, viz.

GENERAL RULE.

Multiply all the Antecedents into one another, alſo the Conſequents into each other; then divide the Product of all the Conſequents by the

Product of all the Antecedents, and the Quotient will be the Anſwer, or the Value of the Antecedent required.

EXAMPLE.

I. London being to remit 500 *l.* to Spain, how many Piaſtres of 272 Marevedies will it amount to there, excluſive of Charges, ſuppoſing the ſaid Sum to be remitted to Holland at 35 *s.* *per* Pound, from thence to France at 58 *d.* Flem. *per* Crown, from France to Venice at 100 Crowns *per* 60 Ducats Banco, and from Venice to Spain at 360 Marevedies *per* Ducat Banco?

Diſpoſition of the Terms.

Antecedents.		*Conſequents.*
If 1 *l.* Sterling is equal to		35 *s.* or 420 *d.* Flem.
58 *d.* Flemiſh	=	1 Crown of France
100 C. France	=	60 Ducats Venice
1 D. of Venice	=	360 Marevedies Spain
272 Marevedies	=	1 Piaſtre
How many Piaſtres for		500 *l.* Sterling?

58	420
100	60
5800	25200
272	360
11600	1512000
40600	75600
11600	9072000
Diviſor 1577600	500
	Piaſtres.

1577600)4536000000(2875$\frac{1}{3}$ near (Anſwer).

Now ſuppoſing the direct Exchange to Spain at the Time of this Remittance was at 42$\frac{1}{2}$ *d.* *per* Piaſtre, the 500 *l.* would only be found to be worth 2823$\frac{1}{2}$ Piaſtres, therefore 52 Piaſtres nearly would be ſaved by the Negociation aforeſaid, or about 2 *per Cent.* excluſive of Charges.

Proof

Proof of the Queſtion aforeſaid.

This Rule, like all the Rules of Three, is proved by the Doctrine of Contraries; therefore if the Poſition be begun with the laſt Conſequent (ſave that to which an Antecedent was required) and end with the laſt Antecedent, and all the other Conſequents be made Antecedents, and Antecedents Conſequents throughout, if they be multiplied and divided as before, the Quotient will give the laſt Conſequent in the former Caſe to which an Antecedent was required.

Diſpoſition of the Terms.

Piaſtres.
$2875\frac{125}{493}$
493

1417500 Piaſtres multiplied into the Fraction.

The Method of abridging the Terms of this Rule.

This Rule is rendered much more eaſy and practicable, by abridging or contracting the Terms by the Rule of Equalities, which is founded upon the third Axiom of the 1ſt Book of Euclid, viz.

That if from equal Numbers, equal Numbers be deducted, the Remainders will be equal; and if equal Numbers be divided by equal Numbers, their Quotients will be equal.

'Tis plain the Antecedents and Conſequents are all equal, (as they ſtand oppoſed to one another) therefore if any Antecedent and any Conſequent, in any Part of the Equation, be divided by any Number or Numbers that will divide both without Remainder, their Quotients will be equal; or if any of the Antecedents has a like Number with any of the Conſequents, ſuch Number may be cancelled in both.

The former Queſtion reſumed.

Diſpoſition of the Terms as before.

Antecedents.		*Conſequents.*
If —1 *l.* St.	=	420 *d.* Fl.—210
29—58 *d.*	=	1 C. —
—100 C.	=	60 D. —30
— 1 D.	=	360 M. —45
17—34—272 M.	=	1 Piaſtre
		500 —5

29
17

283500
5
—

493)1417500(2875$\frac{125}{493}$
(Anſwer as before.)

Inſtruction. To abridge the Terms begin with the greateſt firſt; now ſeeing 100 is contained 5 times in 500, therefore the Quotient 5 is removed to another Column oppoſite to the 500, and a Daſh placed at the 100, to ſhew that it is cancell'd; then divide 272 and 360 by 8, and place the Quotients 34 and 45 in the next Column oppoſite to each Number; next, half 58 and 420, and remove the Quotients 29 and 210 as before; laſtly, half the 34 (in the ſecond Column) and the 60, and remove the Quotas as before. Now

ſeeing

seeing you can reduce the Antecedents no lower, multiply all thoſe left into one Sum, and the Conſequents into another, divide the Product of the latter by the former, and the Quotient will be the Anſwer as before.

EXAMPLE II.

In which the Terms are abridged.

A Merchant of Amſterdam owing 800 *l.* Flem. to London, remits the ſame firſt to France at 56 *d.* Flem. *per* Crown, from thence he orders it to be remitted to Venice at 100 Crowns *per* 60 Ducats, from thence to Hamburgh at 100 *d.* Flem. *per* Ducat, from thence to Liſbon at 50 *d.* *per* Cruſade of 400 Rees, and laſtly from Liſbon to England at 5 *s.* 4 *d.* *per* 1000 Rees, or Millree. Now the Queſtion is how much the ſame will amount to in Sterling Money?—And how much will be ſaved, ſuppoſing the Exchange from Holland directly to England at 36 *s.* 10 *d.* at the Time?

Diſpoſition of the Terms.

If 56 *d.* Flem. be equal to 1 Crown of France
100 C. of France = 60 Ducats of Venice
1 Ducat = 100 *d.* of Hamburgh
50 *d.* Hamburgh = 400 Rees of Portugal
1000 Rees = 64 *d.* Engliſh
How many Pence Engliſh for } 800 *l.* Flemiſh, or 192000 *d.* Dutch.

The Numbers removed.

7—14— 56 = 1—
— 100 = 60— 30
— 1 = 100—
— 50 = 400— 8
—1000 = 64— 16
———192000— 192

30
——— *d.*
7)737280(105325$\frac{5}{7}$ =

438 *l.* 17 *s.* 1$\frac{5}{7}$ *d.* the Anſwer. Thus

Thus it appears that the 800 *l.* Flemiſh would come to 438 *l.* 17 *s.* $1\frac{5}{7}$ *d.* after going through all the aforeſaid Places, excluſive of Charges; and if it had been remitted to London at 36 *s.* and 10 *d.* according to the direct Courſe, it would only have had Credit for 434 *l.* 7 *s.* $9\frac{87}{121}$ *d.* Therefore the Holland Merchant would ſave 4 *l.* 10 *s.* Sterling nearly, by the Negociation tranſacted in the Manner aforeſaid.

EXAMPLE III.

To find the arbitrated Price when ſeveral Places are concerned.

If the arbitrated Price between Holland and England ſhould be demanded, ſuppoſing the Remittance ſhould go through all the Places aforeſaid, that may readily be found thus; make the 64 *d.* Sterling (the Price of the Mill-ree) the *firſt* Antecedent, and then all the former Conſequents will become Antecedents, and all the Antecedents Conſequents; then as this Rule muſt always end with the ſame Species or Denomination it is begun with, place 240, the Pence in a Pound Sterling, (the certain Price to Holland) for the laſt Conſequent. The Terms being thus diſpoſed, abbreviate, multiply and divide them as before, and the Quotient will be the arbitrated Price demanded; which being compared with the direct Courſe, it may be eaſily diſcovered whether Method will be more advantageous, and how much ſo, to the Place where the Negociation was begun.

The Prices in the former Queſtion reſumed.

Diſpoſition of the Terms.

If 64 *d.*	=	1000 Rees
400 Rees	=	50 *d.* Hamburgh

Antec. left the Diviſor 34)1875(55 5/34 arbitrated Price *per* Piaſtre, the Anſwer.

INSTRUCTION.

Cancel 94 on each Side of the Equation; then to abridge the other Terms, firſt obſerve that 400 contains 100 4 Times, ſo the 4 is removed,—then 3 goes 210 Times in 630, which 210 is removed,—then divide 56 and 210 in the ſecond Column by 7, and remove the Quotas 8 and 30 to the next Columns,—then obſerving 8 in the ſecond Column will go 40 Times in 320, cancel the 8 and remove 40 oppoſite to 320. Here it is to be obſerved,

ſerved, that it makes no Difference how far the Terms be removed, or in what Column on either Side the Equation the Numbers ſtand;—— next divide the 40 by 4, which cancel and place 10 oppoſite to the 40,—and laſtly, ſeeing 10, 30, and 50 are all the Conſequents left, and 272 all the Antecedents, half all the Conſequents, and in Lieu thereof, half 272 thrice, or divide by 8, and you'll find you can abridge no more.—Then to know how much the 1360 Piaſtres will amount to at $55\frac{5}{24}$ *d.* Sterling *per* Piaſtre, that may be found by the Single Rule of Three, or by placing the ſaid Number for the laſt Conſequent, and repeating the Prices as before, thus:

Antecedents.		*Conſequents.*
If — 94	=	100—
— 1	=	320— 40—10
—272	=	630—210—30
—4—400	=	50
—8— 56	=	1—
— 3	=	94—
How many Pence Sterl. for	=	1360— 5

10 Conſeq. left
30
300
50
15000
5
75000 Pence Sterl. =
312 *l.* 10 *s.* the Anſwer.

Here, as the Antecedents are all cancelled, the Conſequents left, multiplied into one another, give the Anſwer.—Thus it appears that *A* would make 312 *l.* 10 *s.* of the 1360 Piaſtres, whereas if he had drawn for them, or ordered *B* to remit, he would have only made 283 *l.* 6 *s.* 8 *d.* of them, according to the Courſe, by a direct Exchange at 50 *d. per* Piaſtre; therefore he would ſave

ſave 29 *l.* 3 *s.* 4 *d.* by the Negociation tranſacted in the Manner aforeſaid.

Further Obſervations upon this Rule.

The Antecedents and Conſequents being all equal as before obſerved, the Products of the former will be equal to thoſe of the latter; if therefore any one of the Antecedents, or of the Conſequents be left out, the Value thereof may be found by multiplying all thoſe left together for a Diviſor, and thoſe on the oppoſite Side of the Equation for a Dividend, and the Quotient ariſing from the Diviſion will be the Anſwer; as in the former Queſtion, ſuppoſe the Value of 50 *d.* of Holland ſhould be required?

N. B. When you find an Antecedent it is always of the ſame Denominaton with the preceding Conſequent to it; and when you find a Conſequent it is of the ſame Denomination with the following Antecedent to it.

To find the Antecedents.

EXAMPLE V.

The Terms in the former Queſtion reſumed.

If —— 94 = 100—
— 1 = 320— 40
— 272 = 630—210—30—10
Rees — = 50—
—8—— 56 = 1—
—— 3 = 94—
—3—15—750—75000 = 1360—5—

Here 40 and 10, being all the Conſequents left, and the Antecedents being all cancelled by Equalities, multiplied together give 400 Rees, which are the Value of 50 *d.* of Holland, according to the other Rates of Exchange.

To find the Conſequents.

In the ſame Queſtion let the Conſequent to a Piaſtre, or 272 Marevedies, of Spain be required?

If

EXAMPLE VI.

The Terms resumed.

If — 94 = 100—
— 1 = 320—40—10
— 272 = Rees of Portugal
—4 — 400 = 50—
7 — 56 = 1—
3 = 94—
30—300—1500—7500 = 1360—5—

30 Antecedents left

Proof of the former Question.

EXAMPLE IX.

If 5 Yards of Engl. are equal to 7 Ells of Paris,
4 Ells Paris = 7 Ells Amsterdam,
5 Ells Amst. = 6 Ells Hamburgh,
How many Ells of Hamburgh for } 100 Yards of England.

The Terms removed.

If—5 = 7
—4 = 7
—5 = 6
——— 100—20—4—

7 Consequents left.
7
49
6
294 Ells of Hamburgh.
(Answer.)

N. B. Tho' this Rule will find the Equality of the Weights and Measures of foreign Nations when the Proportions are given, yet as that may be found by the Single Rule of Three by the Application of the Tables for Weights and Measures aforesaid; and since these cannot fluctuate in their Proportions or Values, Arbitrations of them must be looked on rather as an Amusement than of real Use and Advantage.

Sir ISAAC NEWTON's TABLE *of the Aſſays, Weights and Values of moſt* FOREIGN SILVER *and* GOLD COINS, *actually made at the* MINT, *by Order of the* PRIVY COUNCIL.

N. B. *The Gold Coins having been valued when Guineas were at* 21 *s.* 6 *d. are here reduced to the preſent Standard of* 21 *s.*

EXPLANATION.

It is to be obſerved, that the Engliſh Pound *Troy* contains 12 Ounces; 1 Ounce, 20 Pennyweights; 1 Pennyweight, 24 Grains; and 1 Grain 20 Mites.——The preſent Engliſh Standard for Gold Coin is 22 Carats of fine Gold, and two Carats or $\frac{1}{12}$ of Alloy.——The Silver Coin contains eleven Ounces two Pennyweights fine Silver, and eighteen Pennyweights of Alloy in the Pound.——The firſt Column of the Table expreſſeth the Fineneſs of the aſſayed Piece; the Letters B ſignifying *better*, and *W worſe* than the Engliſh Standard.—The ſecond Column, the abſolute Weight of the

the Piece.——The third Column, its Standard Weight, or its Quantity of Standard Metal.——The fourth Column, its Value in Engliſh Money.—For Example, in the ſecond Article of Silver Coin, the new Seville Piece of Eight is 1½ Pennyweight in the Pound worſe than the Engliſh Standard Weight, 13 Pennywt. 21 Grains and 15 Mites of Sterling Silver; and is in Value 43.11*d.* of a Penny.

In the Royal Mint, a Pound of Standard Gold is cut or divided into 44¼ Parts, each a Guinea, at which Rate a Guinea will weigh 5 Pennywt. 9 Grains, .4382 Parts.

They were firſt coined in King CHARLES IId's Reign, and went for 20 Shillings, and had their Name from the Gold whereof they were made, being brought from that Part of Africa called Guiney, which the Elephant likewiſe on them denotes.

A TABLE *ſhewing into how many Shillings a Pound Weight of Silver hath at ſeveral Times been coined, from Mr Lowndes, and Biſhop Fleetwood.——Very uſeful for the Readers of the Hiſtory of England.*

The Aunes or Ells of Amſterdam, Haerlem, Leyden,

Leyden, the Hague, Rotterdam, and other Cities of Holland; as alſo that of Nuremberg, being all equal, are comprehended under thoſe of Amſterdam; as thoſe of Oſnabrug are under thoſe of France, and thoſe of Berne and Baſil are equal to thoſe of Hamburgh, Francfort, and Leipſic.

EXPLANATION.

By the Help of theſe Tables, and the Application of the Rule of Three, any foreigh Weights or Meaſures may be reduced to their Equivalents in Engliſh, or Engliſh Weights, &c. to their equivalent Quantities abroad.

EXAMPLE I.

What are 500 lb. of Lyons equal to in England?

By the Table, as 106 lb. of Lyons : 100 lb of England : : 500 lb. of Lyons : 471 lb. 12 oz. nearly.

EXAMPLE II.

Required how much 500 Aunes or Ells of Geneva are equal to at Amſterdam?

By the Table, if 60 Aunes of Geneva be equal to 100 Amſterdam, 500 will, by the Rule of Proportion, be equal to $833\frac{1}{3}$.

EXAMPLES for the following TABLE.

How many Setiers will 20 Laſts of England make at Paris?

The Proportion will run thus; as 82 Buſhels : 19 Setiers : : 20 Laſts or 1600 Buſhels : 370,74 Setiers, nearly.

The Quantity of a Setier, or any other Weight or Meaſure mentioned in theſe Tables, is found thus; as 19 Setiers : 82 Buſhels Engliſh : : 1 Setier : $4\frac{1}{3}$ Buſhels, nearly. In the like Manner any foreign Meaſures, &c. may be equated, or Engliſh reduced to foreign.

A TABLE of the AGREEMENT which the CORN MEASURES, in the principal Places in Europe, have with thoſe of England and Amſterdam.

Note, For every Farthing that One Pound doth coſt, reckon Two Shillings and Four-pence, and that is the Price of the Hundred Weight.

EXPLANATION.—If you buy Goods at 2 d. Three Farthings per lb. look in the Table for 2 d. 3 Farthings in the firſtColumn, and againſt it you will find 1l. 5s. 8d. and ſo much at that Rate 112lb. comes to. If 1 cwt. or 112lb. coſt 3l. 19s. 4d. to know how much it is by the lb. look for 3 l. 19 s. 4d. in the ſecond Colum of the Table, and right againſt it, next to the Left Hand, you will find 8d. Half-penny: So much at that Rate it comes to by the lb. Again, if you buy 1 cwt. of Goods for 3l. 19s. 4d. and retail it at 11 d. the Pound, it comes at that Rate to 5 l. 2 s. 8 d. then take 3l. 19s. 4d. from it, and you will find yourſelf by the Remainder 1 l. 3s. 4d. Gainer, &c. and in this Manner you may with much Eaſe calculate the Price of, or Profit on the Cwt.
